

TABLE OF CONTENTS

Chapter I. Parametrizations of algebroid curves.

1.1. Preliminary concepts.....	1
1.2. The tangent cone.....	9
1.3. Local parametrization.....	11
1.4. Transversal parameters. Multiplicity	21
1.5. Resolution of singularities.....	27

Chapter II. Hamburger-Noether expansions of algebroid curves.

2.1. Puiseux expansions. Discussion	45
2.2. Hamburger-Noether expansions of plane algebroid curves.	53
2.3. Intersection multiplicity of plane curves.....	60
2.4. Hamburger-Noether expansions for twisted curves.....	62

Chapter III. Characteristic exponents of plane algebroid curves.

3.1. Report on Equisingularity Theory.....	69
3.2. Characteristic exponents.....	76
3.3. Characteristic exponents and Hamburger-Noether expansions	81
3.4. Characteristic exponents and the Newton polygon.....	88
3.5. Characteristic exponents and Puiseux series.....	107

Chapter IV. Other systems of invariants for the equisingularity of plane algebroid curves.

4.1. Newton coefficients.....	117
4.2. Maximal contact of higher genus.....	121
4.3. The semigroup of values.....	127
4.4. The degree of the conductor of $\bar{\square}$ in $\square$	135

Chapter V. Twisted algebroid curves.

5.1. Preliminary concepts and notations.....	141
5.2. Equisingularity E.s.1. Generic plane projections.....	146
5.3. Equisingularity E.s.2. Space quadratic transformations.	158
5.4. Equisingularity E.s.3. Coincidence of semigroups of ...	161
values.
