INTRODUCTION

CHAPTER 1

The Prosthodontic Environment 1

1.1	Introduction	1
1.2	Scope of chapter	2
Part 1	Lost and defective teeth	2
1.3	Prevalence and causes of tooth loss	2
1.4	Defective teeth	8
1.5	The need and demographics of fixed versus removable prosthodontics	9
Part 2	The realm of fixed prosthodontics	12
1.6	Prosthetic dentistry and its subspecialties	12
1.7	Elementary principles of fixed prosthodontics	13
1.8	The fixed prosthodontic workflow	17
1.9	In fine...	18
	References	18

ORAL ENVIRONMENT

CHAPTER 2

Anatomy and Pathophysiology 21

2.1	Scope of chapter	21
2.2	Terminology	21
2.3	Teeth and periodontal support	22
2.4	Dental arches	32
2.5	Head	35
	References	41

CHAPTER 3

Esthetics and Color 43

3.1	Introduction	43
3.2	Scope of chapter	44
3.3	Esthetics, cosmetics, and normal anatomy	44
3.4	Esthetic parameters as perceived by patients and dentists	45

Part 1	Constructing a smile	45
3.5	Objective	46
3.6	Constraints	46
3.7	Setting the maxillary central incisors	46
3.8	Tooth arrangement	48
3.9	Incisors	49
3.10	Gingival esthetics	51
3.11	Summary	52
Part 2	Color	53
3.12	Light and color perception	53
3.13	Color spaces	56
3.14	The color of teeth	61
3.15	Measuring color	63
3.16	The role of illumination	63
	References	65

CHAPTER 4

Forces and Mastication 69

4.1	Introduction	69
4.2	Scope of chapter	69
4.3	Mastication	70
4.4	Neurological controls	76
4.5	Forces generated during clenching and chewing	83
4.6	Bruxism	87
4.7	Long-term forces	88
4.8	Clinical implications	91
	References	92

CHAPTER 5

Mandibular Movements and Functional Occlusion 97

5.1	Introduction	97
5.2	Scope of chapter	98
Part 1	Functional anatomy of the temporomandibular joint	98
5.3	The disc	98
5.4	Articular surfaces	100
5.5	Synovial membrane	101
5.6	Ligaments and capsule	101

5.7	Joint remodeling	102	7.5	Dental diagnosis	179
Part 2	Jaw movements	102	Part 3	Treatment objectives	185
5.8	Envelope of motion	102	7.6	General principles	185
5.9	Posterior guidance – temporomandibular joints	104	7.7	Setting treatment objectives for single teeth	188
5.10	Anterior guidance – anterior teeth, disclusion	108	7.8	Setting treatment objectives for small edentulous spaces	190
5.11	Mandibular positions	108	7.9	Compounding factors	193
5.12	Interarch occlusal contacts	111	7.10	Setting treatment objectives for multiple missing teeth	200
5.13	Vertical dimension of occlusion	117	Part 4	Treatment sequence	201
Part 3	Historical perspective	119	7.11	Establish preprosthetic arches: preprosthetic phase	202
5.14	Early authors (1800–1960)	119	7.12	Construct the prosthesis: prosthetic phase	203
5.15	The advent of anterior disclusion mechanics	121	Part 5	Prospective diagnosis	204
5.16	Gnathology	121	7.13	Diagnostic wax-up	204
5.17	In fine...	123	7.14	Intraoral diagnostic aids	206
References		123	7.15	Computer imaging	206

CHAPTER 6

Materials and Structures 127

6.1	Introduction	127
6.2	Scope of chapter	128
Part 1	Structures	128
6.3	Tooth as a supporting structure	128
6.4	Fracture	133
6.5	Strength	136
6.6	Models and modeling	140
Part 2	Biologic compatibility	144
6.7	Testing for biocompatibility	144
6.8	Prevalence of adverse reactions	148
6.9	Biocompatibility of metals	149
6.10	Biocompatibility of resin-based materials	155
6.11	Biocompatibility of ceramic materials	159
6.12	In fine...	160
References		161

TREATMENT PLAN

CHAPTER 7

Treatment Planning 167

Part 1	Introduction	167
7.1	Indications for fixed dental prostheses	167
7.2	Scope of chapter	169
7.3	Project management	170
Part 2	Diagnosis	171
7.4	General diagnosis	171

7.5	Dental diagnosis	179
Part 3	Treatment objectives	185
7.6	General principles	185
7.7	Setting treatment objectives for single teeth	188
7.8	Setting treatment objectives for small edentulous spaces	190
7.9	Compounding factors	193
7.10	Setting treatment objectives for multiple missing teeth	200
Part 4	Treatment sequence	201
7.11	Establish preprosthetic arches: preprosthetic phase	202
7.12	Construct the prosthesis: prosthetic phase	203
Part 5	Prospective diagnosis	204
7.13	Diagnostic wax-up	204
7.14	Intraoral diagnostic aids	206
7.15	Computer imaging	206
Part 6	Documentation and communications	206
7.16	Written treatment plan	206
7.17	Treatment plan presentation	206
7.18	Written confirmation	207
References		207

PREPROSTHETIC PHASE

CHAPTER 8

Periodontics 209

8.1	Introduction	209
8.2	Scope of chapter	218
8.3	Periodontal surgery	219
8.4	Principles of osseous surgery	223
8.5	Surgical crown exposure (crown lengthening)	227
8.6	Augmenting soft tissue volume	237
8.7	Covering a local gingival recession (connective tissue and pedicle flap)	243
8.8	In fine...	250
References		251

CHAPTER 9

Orthodontics 257

9.1	Introduction	257
9.2	Scope of chapter	258
9.3	Indications for preresorative tooth movement	259

9.4	Preliminary diagnostics	261
9.5	The physiology of orthodontic movements	261
Part 2 Clinics		269
9.6	Mechanics	269
9.7	Active elements	273
9.8	The downsides of orthodontic movements	275
9.9	Basic workflow	276
9.10	Examples	279
	References	286

CHAPTER 10

Operative Dentistry 289

10.1	Introduction	289
10.2	Scope of chapter	298
Part 1 Bleaching		299
10.3	Adjustments of crown color – bleaching	299
10.4	In-office bleaching	303
10.5	Home bleaching	305
10.6	Walking bleach	307
10.7	Microabrasion	308
Part 2 Foundation restorations		309
10.8	Foundation restorations	309
10.9	Clinics	323
10.10	In fine...	332
	References	332

CHAPTER 11

Endosseous Implants 339

Part 1 Perspective		339
11.1	Early developments	339
11.2	The principles of implant surgery as per 1980	342
11.3	Scope of chapter	343
Part 2 The biology of osseointegration		343
11.4	Titanium	343
11.5	Implant design features	345
11.6	Osseous healing	350
11.7	The morphology of the implant emergence	354
Part 3 Bone as a self-optimizing structure		357
11.8	Bone mass optimization	358
11.9	Internal repair	359
11.10	Adaptation to increased stress	360
Part 4 Clinics		364
11.11	Scope of section	364
11.12	Diagnostics and planning	364
11.13	Implant placement technique	368
11.14	Implant placement with bone augmentation	377
11.15	In fine...	382
	References	382

PROSTHETIC PHASE

CHAPTER 12

Tooth-anchored Cemented Restorations 389

12.1	Introduction	389
12.2	Scope of chapter	390
Part 1 Function and design of tooth-anchored fixed dental prostheses		390
12.3	Applications	390
12.4	Basic components and terminology	390
12.5	Design principles	392
12.6	FDP function under load	394
12.7	FDP framework design	405
12.8	External FDP configuration	412
12.9	Dowel crowns	416
Part 2 Clinics		417
12.10	Diagnostics and planning	417
12.11	Abutment design	420
12.12	Clinical abutment preparation	422
12.13	Preparation workflow	428
12.14	In fine...	436
	References	437

CHAPTER 13

Implant Prosthodontics 441

13.1	Introduction	441
13.2	Scope of chapter	442
Part 1 Principles		442
13.3	Submerged and transgingival systems	442
13.4	Basic components	442
13.5	Connectors	446
13.6	Fundamentals of screw-clamping	450
13.7	Chewing with natural teeth versus chewing with implants	455
Part 2 Clinics		455
13.8	Full-arch screw-fastened FDPs	456
13.9	Contemporary designs	460
13.10	Multiunit FDPs in partially edentulous arches	462
13.11	Single-unit FDPs	464
13.12	Impressions	465
13.13	Angled abutments	468
13.14	Evaluating framework fit	469
13.15	Screw-retention versus cementation	470
Part 3 Perspectives		472
	References	473

CHAPTER 14**Adhesive Restorations****477**

14.1	Introduction	477
14.2	Scope of chapter	477
Part 1	Principles of bonding	478
14.3	Bonding to enamel	478
14.4	Bonding to dentin	480
14.5	The clinics of dentin bonding	482
14.6	Principles of dentin bonding revisited	488
14.7	The chemistry of dentin bonding polymers	488
Part 2	Laminate veneers	491
14.8	Introduction	491
14.9	Applications	492
14.10	Principles of preparations for laminate veneers	493
14.11	Color corrections using laminate veneers	496
14.12	Patient appraisals and long-term outcomes	497
14.13	The clinics of laminate veneers	499
Part 3	Bonded multiunit prostheses	506
14.14	Field of application, advantages, limitations, contraindications	508
14.15	Abutment design and frameworks	508
14.16	Long-term survival of resin-bonded fixed dental prostheses	510
14.17	The clinics of resin-bonded fixed dental prostheses	510
14.18	Alternative frameworks	511
14.19	Long-term survival of FR-FDPs	516
	References	517
	Appendix: Bonding monomers, polymerization additives, etchants, and solvents	521

CHAPTER 15**Provisional Restorations****529**

15.1	Introduction	529
15.2	Scope of chapter	529
Part 1	Principles	529
15.3	Objectives and indications of provisional treatment	529
15.4	Drawbacks of provisional restorations	534
15.5	Materials for provisional restorations	535
Part 2	Clinics	540
15.6	Workflow for fabricating provisional restorations	540
15.7	Provisional restorations for laminate veneers	553
15.8	Adapting and repairing provisional restorations	555
	References	556

CHAPTER 16**Impressions****559**

16.1	Introduction	559
16.2	Scope of chapter	559
Part 1	Principles	560
16.3	Concepts and definitions	560
16.4	Materials	561
16.5	Trays	565
Part 2	Clinics	567
16.6	Overview of materials and techniques	567
16.7	'One step, double mix' technique	568
16.8	Clinical workflow	569
	References	578

CHAPTER 17**Occlusal Relationships****581**

17.1	Introduction	581
17.2	Scope of chapter	581
17.3	Principles governing occlusal schemes	582
Part 1	Instruments and procedures	583
17.4	Articulators	583
17.5	Facebows	589
17.6	Recording interarch relationships	592
17.7	Effects of articulator settings on occlusal anatomy	595
Part 2	The clinics of conformative restorations	598
17.8	Overview	598
17.9	Workflow for conformative occlusions	600
Part 3	The clinics of reorganized restorations	607
17.10	Workflow for reorganized occlusions	607
17.11	Design and location of occlusal contacts	610
	References	613

CHAPTER 18**Laboratory Procedures****615**

18.1	Introduction	615
18.2	Scope of chapter	615
Part 1	Working models	616
18.3	The production of working models	616
18.4	General considerations on working models	616
18.5	Technical workflow in model fabrication	621
18.6	In fine...	627

Part 2 Waxing, investing, and casting metal frameworks	627
18.7 Introduction	627
18.8 Metals	628
18.9 Waxes	632
18.10 Investing	636
18.11 Casting	638
18.12 Technical workflow for waxing, investing, and casting	641
Part 3 Fabricating frameworks using CAD-CAM machining	649
18.13 Introduction	649
18.14 CAD-CAM procedures and components	649
18.15 Scanning three-dimensional objects	649
18.16 The computer interface	651
18.17 The fabrication unit	652
Part 4 Ceramic veneering	656
18.18 Introduction	656
18.19 Materials	656
18.20 Ceramic layers	661
18.21 Technical workflow for layering ceramics	665
18.22 Layering and firing a porcelain veneer	671
Part 5 Communicating with a dental laboratory	672
18.23 General principles, records, and documents	672
18.24 Color selection	674
References	677

CHAPTER 19

Try-In and Cementation

19.1	Introduction	683
19.2	Scope of chapter	683
Part 1	Try-in procedures	683
19.3	Framework try-in	684
19.4	Bisque-bake try-in	685
19.5	Final try-in	690
Part 2	Cementation	690
19.6	Families of dental cements	691
19.7	Application guidelines	696
19.8	Biologic properties	696

19.9	Physical properties	699
Part 3 Clinics		701
19.10	Temporary cementation	701
19.11	Permanent cementation	702
19.12	Conventional cementation	705
19.13	Adhesive cementation	709
19.14	Longevity	715
References		716

FOLLOW-UP

CHAPTER 20

Maintenance

20.1	Introduction	721
Part 1	Concepts	722
20.2	Maintenance procedures – terminology	722
20.3	Preventing disease	722
20.4	Preventing the recurrence of disease	723
20.5	Calculus and saliva	724
20.6	Brushing, scaling/curettling, and power-driven instrumentation	725
20.7	The effects of removing bacterial plaque	725
20.8	Antiseptics	727
20.9	Fluorides	728
Part 2	Clinics	729
20.10	The overall scheme: re-evaluation and cleaning sessions	731
20.11	Intermediary cleaning sessions	731
20.12	Re-evaluation sessions	735
20.13	Setting a recall interval	735
20.14	Personal oral hygiene	737
20.15	In fine...	738
	References	738
