## CHAPTER 1. DIMINISHING RETURNS

|     |                                     |   |
|-----|-------------------------------------|---|
| 1.1 | Introduction. . . . .               | 1 |
| 1.2 | Restrictions of the Study . . . . . | 3 |
| 1.3 | Outline of the Monograph. . . . .   | 4 |

## CHAPTER 2. THE PRODUCTION TECHNOLOGY

|     |                                                   |    |
|-----|---------------------------------------------------|----|
| 2.1 | Introduction. . . . .                             | 5  |
| 2.2 | The Input Correspondence. . . . .                 | 7  |
| 2.3 | The Production Function . . . . .                 | 11 |
| 2.4 | Properties of the Production Technology . . . . . | 15 |
| 2.5 | Special Production Structures . . . . .           | 21 |

## CHAPTER 3. LAWS OF BOUNDED OUTPUT AND DIMINISHING AVERAGE RETURNS

|     |                                                                                 |    |
|-----|---------------------------------------------------------------------------------|----|
| 3.1 | Introduction. . . . .                                                           | 25 |
| 3.2 | Essential and Weak Limitational Subsets of<br>Factors of Production . . . . .   | 27 |
| 3.3 | Essential and Strong Limitational Subsets of<br>Factors of Production . . . . . | 34 |
| 3.4 | The Production Axioms and Bounded Output. . . . .                               | 39 |
| 3.5 | Law of Bounded Average Returns. . . . .                                         | 43 |

## CHAPTER 4. CONGESTION, NULL JOINTNESS AND LAWS OF VARIABLE PROPORTIONS

|     |                        |    |
|-----|------------------------|----|
| 4.1 | Introduction . . . . . | 51 |
|-----|------------------------|----|

|     |                                                                                     |    |
|-----|-------------------------------------------------------------------------------------|----|
| 4.2 | Congestion of Production Factors. . . . .                                           | 53 |
| 4.3 | Properties of OL-, MOL- and OP- Congestion. . . . .                                 | 58 |
| 4.4 | Null Joint Factors of Production. . . . .                                           | 62 |
| 4.5 | OP- Congestion and Null Joint Factors of<br>Production. . . . .                     | 67 |
| 4.6 | Laws of Variable Proportions. . . . .                                               | 70 |
| 4.7 | An Empirical Example of Congested and Null<br>Joint Factors of Production . . . . . | 75 |

## CHAPTER 5. THE LAW OF DIMINISHING RETURNS AT THE EXTENSIVE MARGIN

|     |                                                                                                              |    |
|-----|--------------------------------------------------------------------------------------------------------------|----|
| 5.1 | Introduction. . . . .                                                                                        | 78 |
| 5.2 | Diminishing Returns to Extensive Use of a<br>Production Factor . . . . .                                     | 79 |
| 5.3 | Holothetic Production Structure and Diminishing<br>Returns to Extensive Use of a Production Factor . . . . . | 83 |

## CHAPTER 6. STANDARD NOTATIONS AND MATHEMATICAL APPENDIX

|     |                                   |    |
|-----|-----------------------------------|----|
| 6.A | Some Standard Notations . . . . . | 85 |
| 6.B | Mathematical Appendix . . . . .   | 87 |

|    |                         |    |
|----|-------------------------|----|
| 7. | BIBLIOGRAPHY. . . . .   | 92 |
| 8. | SUBJECT INDEX . . . . . | 95 |
