

G. Govil R. V. Hosur

Conformation of Biological Molecules

New Results from NMR

With 92 Figures

Springer-Verlag
Berlin Heidelberg New York 1982

Contents

1	General Theory	1
1.1	Introduction	1
1.2	What is Conformation?	2
1.3	Conformational Theory	4
1.4	Structure of Long-Chain Polymers	8
1.5	Problems in NMR Studies of Biological Molecules	9
1.5.1	^1H -NMR	9
1.5.2	^2H -NMR	11
1.5.3	^{13}C -NMR	12
1.5.4	^{15}N -NMR	14
1.5.5	^{31}P -NMR	15
1.5.6	Other Nuclei	16
2	NMR Techniques in Conformational Studies	18
2.1	Coupling Constants	18
2.2	Chemical Shifts of Hydrogen-Bonded Protons	22
2.3	Magnetic Anisotropy of Chemical Bonds or Groups	23
2.4	^{13}C Chemical Shifts	25
2.5	^{31}P Chemical Shifts	26
2.6	Relaxation Times (T_1 and T_2)	26
2.7	Nuclear Overhauser Effect	29
2.8	Paramagnetic Reagents	30
2.9	Use of Liquid Crystals as Solvents	35
2.10	Deuterium Quadrupole Coupling Constants	36
2.11	Solvent Accessibility	36
2.12	From NMR Parameters to Spatial Structures	37
3	Nucleosides, Nucleotides and Nucleic Acids	39
3.1	Description of Nucleotide Structures	39
3.2	Glycosidic Bond Rotations	43
3.3	Sugar Ring Conformation: Pseudorotation	46
3.4	Backbone Angles	51
3.4.1	Torsion Angles ϕ'	51
3.4.2	Angles ϕ	53
3.4.3	Angles ψ	55
3.4.4	Torsion Angles ω' , ω	55
3.5	NMR Studies on Nucleosides	58

3.6	Small Nucleotides	58
3.6.1	2', 3'- and 5'-Mononucleotides	61
3.6.2	Cyclic Nucleotides	61
3.6.3	Pyridine Nucleosides and Nucleotides	62
3.6.4	5'-Di- and Triphosphates	62
3.7	Dinucleoside Phosphates and Short Segments of Nucleic Acids	63
3.8	Random-Coil Polynucleotides	66
3.8.1	Oligo- and Polyribonucleotides	67
3.8.2	Deoxyribonucleotides	70
3.9	Helical Polynucleotides	70
3.10	t-RNA	74
3.11	Drug-Nucleic Acid Interactions	79
4	Amino Acids, Peptides and Proteins	81
4.1	Description of the Structure of Peptide Units	81
4.2	Theoretical Considerations. The ϕ , ψ Maps	87
4.3	NMR Techniques in the Study of Peptide Conformations	92
4.3.1	<i>cis-trans</i> Isomerization (Angle ω)	92
4.3.2	ϕ and ψ Angles	94
4.3.3	Side-Chain Conformations	96
4.3.4	Detection of N-H $\cdots$ O=C Hydrogen Bonds	97
4.3.5	Molecular Symmetry	99
4.3.6	Conformational Mobility	99
4.3.7	^1H and ^{13}C Chemical Shifts	100
4.4	Conformations of Amino Acids	101
4.5	Linear Peptides	102
4.5.1	Dipeptides	105
4.5.2	Tripeptides	106
4.5.3	Tetrapeptides	107
4.5.4	Pentapeptides	108
4.5.5	Hexapeptides	108
4.5.6	Larger Peptides. Peptide Hormones.	108
4.5.6.1	Angiotensin	108
4.5.6.2	Leuteinizing Hormone-Releasing Hormone (LRF)	109
4.5.6.3	Peptides Containing α -Aminobutyric Acid (A_{B})	109
4.5.6.4	Human Parathyroid Hormone (PTH)	110
4.5.6.5	Insulin	110
4.6	Cyclic Peptides	110
4.6.1	Dipeptides	110
4.6.2	Tripeptides	115
4.6.3	Tetrapeptides	116
4.6.4	Pentapeptides	116
4.6.5	Hexapeptides	117
4.6.6	Larger Cyclic Peptides, Peptide Hormones and Antibiotics	119
4.6.6.1	Oxytocin and Vasopressin	119

4.6.6.2	Gramicidin S	121
4.6.6.3	Valinomycin	122
4.7	Homopolymeric Peptides. Helix-Coil Transition	124
4.8	Characterization of Protein Structures by NMR	128
4.8.1	Spatial Arrangement of Atoms in the Molecules	129
4.8.2	Protein Mobility	130
4.8.3	Enzyme – Substrate Binding	130
4.8.4	Thermodynamic Parameters	130
4.8.5	Conformation of Specific Proteins	133
4.8.5.1	Lysozyme	133
4.8.5.2	Basic Pancreatic Trypsin Inhibitor (BPTI)	134
4.8.5.3	Dihydrofolate Reductase	136
4.8.5.4	Antibody Combining Site	137
4.8.5.5	Myelin Basic Protein (MBP)	137
4.8.5.6	Calcium-Binding Proteins	137
4.8.5.7	Elastin and Tropoelastin	137
4.8.5.8	Ribonuclease	138
4.8.5.9	Hemoproteins and Hemoenzymes	138
4.8.5.10	Collagen	140
4.8.5.11	α -Chymotrypsin	140
4.9	Protein-Nucleic Acid Interaction	141
4.9.1	Specificity	141
4.9.2	Nature of Intermolecular Forces	142
4.9.3	Applications	143
5	Polysaccharides	144
5.1	Structures of Polysaccharides and Carbohydrates	144
5.2	Conformations of Monosaccharides	144
5.3	Conformations of Polysaccharides	148
5.4	Glycoproteins and Peptide-Carbohydrate Interactions	152
6	Lipids and Molecular Organization in Membranes	155
6.1	Biomembranes	155
6.2	General Properties of Phospholipids	157
6.3	Conformations of Phospholipids	157
6.3.1	Conformations of the Glycerol Moiety	158
6.3.2	Conformations in the α -Chains	160
6.3.3	Conformations in the β and γ Chains	161
6.4	Membrane Organization and Fluidity	163
6.4.1	Fluidity	163
6.4.1.1	Rotational Motions	164
6.4.1.2	Lateral Diffusion on the Surface of the Membrane	165
6.4.1.3	Flip-Flop Motions	165

6.4.2	Determination of Organization	165
6.4.2.1	^{31}P -NMR	166
6.4.2.2	^2H -NMR	167
6.4.2.3	Other Studies	170
6.5	Lipid-Protein and Lipid-Cholesterol Interactions	172
