

	Page
<u>Introduction</u>	1
<u>I. Generalities.</u>	9
I.1. Simple Artinian Rings.	9
I.2. Orders and Maximal Orders.	17
I.3. Localization in Grothendieck Categories.	24
I.4. Localization of Non-commutative Rings.	29
<u>II. Some Non-commutative Algebra.</u>	36
II.1. Birational Extensions of Rings.	36
II.2. Rings Satisfying a Polynomial Identity. Generalities.	46
II.3. Azumaya Algebras.	66
II.4. Further Results on P.I. Rings.	80
<u>III. Graded Rings.</u>	100
III.1. Generalities on Graded Rings.	100
III.2. Graded Rings with Polynomial Identity.	108
III.3. Graded Birational Extensions.	114
<u>IV. The Finishing Touch on Localization.</u>	119
IV.1. Relative Localization and Bimodules.	119
IV.2. Base change and T-functors.	143
IV.3. Bimodule Localization of P.I. Rings.	163
<u>V. Structure Sheaves and Schemes.</u>	170
V.1. Presheaves, Sheaves and Localization.	170
V.2. Presheaves and Sheaves on $\text{Proj}(R)$.	182
V.3. Bimodules and Structure Sheaves over Spec and Proj .	203
<u>VI. Algebraic Varieties.</u>	227
VI.1. Affine Geometric Spaces.	227
VI.2. Algebraic Varieties.	239
VI.3. Examples.	258
<u>VII. Coherent and Quasicoherent Sheaves of Modules over an Algebraic k-variety.</u>	270
<u>VIII. Products, Subvarieties, etc.</u>	295
<u>IX. Representation Theory Revisited.</u>	326
<u>X. Birationality and Quasivarieties.</u>	334
<u>XI. A non-commutative Version of the Riemann-Roch Theorem for Curves.</u>	352
XI.1. Rational Points.	352
XI.2. Non-commutative Curves.	359
XI.3. Genus and the Riemann-Roch theorem.	371

<u>XII. Work in Progress.</u>	382
XII.1. Geometric Homomorphisms and Curves.	382
XII.2. Zariski's Main Theorem.	384
XII.3. Some Remarks on Cohomology.	385
XII.4. P.M. Cohn's Scheme.	387
XII.5. Brauer Groups of Projective Curves.	388
<u>References.</u>	389
<u>Index.</u>	399
