

Contents

1. Introduction and historical survey by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	1
2. Fundamentals of coal petrology	5
2.1 The geological basis of coal formation by M. TEICHMÜLLER and R. TEICHMÜLLER (translation: D. G. MURCHISON)	5
2.11 Origin of peat swamps	5
2.111 Evolutionary development of the flora	5
2.112 Climate	6
2.113 Palaeogeographic and tectonic requirements	9
2.113.1 Palaeogeography	10
2.113.2 Tectonic structure	16
2.12 Peat growth, compression and the time of coal formation	17
2.13 Development of the coal facies	18
2.131 Type of deposition (autochthonous, allochthonous)	19
2.132 Peat-forming plant communities	20
2.133 Depositional milieux (telmatic, limnic, brackish-marine, calcium-rich)	27
2.134 Nutrient supply (eutrophic, oligotrophic)	30
2.135 pH value, bacterial activity, sulphur	31
2.136 Temperature of the peat	34
2.137 Redox potential (aerobic, anaerobic)	34
2.138 Characteristics of coal facies in different geologic periods and different coal basins	36
2.14 Diagenesis of peat and coalification	37
2.141 Peat diagenesis (peatification)	37
2.142 Coalification	38
2.142.1 The coalification process	38
2.142.2 Causes of coalification	55
2.142.3 Coalification and bituminization	66
2.142.4 Coalification and diagenesis of minerogenic rocks	82
2.2 The microscopically recognizable constituents of coal	87
2.21 The macerals of coal by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	87
2.211 The concept of 'macerals'	87
2.212 The three maceral groups	87
2.212.1 The vitrinite group	91
2.212.11 Description of the macerals	91
2.212.111 Telinite	91
2.212.112 Collinite	93
2.212.113 Corpocollinite	96
2.212.114 Vitrodetrinite	96
2.212.12 Physical properties of vitrinite	96
2.212.121 Fracture, lustre and fissuring	96
2.212.122 Density of vitrinite	97
2.212.123 Refractive index and absorption index of vitrinite	97
2.212.124 Reflectance of vitrinite	98
2.212.125 Microhardness of vitrinite	99
2.212.126 Porosity, ultrafine structure and X-ray structure of vitrinite	99
2.212.13 The chemical properties of vitrinite	99
2.212.2 The macerals of the exinite group	100

2.212.21	Sporinite	101
2.212.211	General remarks and morphology of fossil spores	101
2.212.212	Tenuisporos and crassisporos	103
2.212.213	Sporinite and micrinite	105
2.212.214	Occurrence of sporinite and its stratigraphic significance	105
2.212.215	Physical properties of sporinite	105
2.212.216	Chemical properties of sporinite	106
2.212.22	Cutinite	107
2.212.221	Origin	107
2.212.222	Morphology of cutinite in polished surfaces and macerated preparations	108
2.212.223	Occurrence and stratigraphic significance of cutinite	111
2.212.224	Cuticular analysis	113
2.212.225	Physical properties of cutinite	114
2.212.226	Chemical properties of cutinite	114
2.212.23	Resinite	115
2.212.231	General remarks	115
2.212.232	Morphography of resinite in polished surfaces and in thin sections	116
2.212.233	Occurrence and stratigraphic significance of resinite	116
2.212.234	Physical properties of resinite	118
2.212.235	Chemical properties of resinite	119
2.212.24	Alginite	120
2.212.241	General remarks	120
2.212.242	Morphography of <i>Pila</i> and <i>Reinschia</i> alginite	121
2.212.243	Occurrence of alginite	124
2.212.244	Physical and chemical properties of alginite	124
2.212.25	Liptodetrinite	125
2.212.26	Coalification of the exinite macerals	125
2.212.3	The macerals of the inertinite group	127
2.212.31	Fusinite	127
2.212.311	Description of fusinite	127
2.212.312	Occurrence of fusinite	129
2.212.313	Physical and chemical properties of fusinite	129
2.212.32	Semifusinite	130
2.212.321	Description of semifusinite	130
2.212.322	Occurrence of semifusinite	130
2.212.323	Physical and chemical properties of semifusinite	132
2.212.33	Macrinite	132
2.212.331	Description of macrinite	132
2.212.332	Occurrence of macrinite	132
2.212.333	Physical and chemical properties of macrinite	132
2.212.34	Inertodetrinite	133
2.212.341	Description of inertodetrinite	133
2.212.342	Occurrence of inertodetrinite	133
2.212.343	Physical and chemical properties of inertodetrinite	133
2.212.35	Micrinite	135
2.212.351	Description of micrinite	135
2.212.352	Occurrence of micrinite	135
2.212.353	Physical and chemical properties of micrinite	135
2.212.36	Sclerotinite	135
2.212.361	Sclerotinite in Tertiary coals	135
2.212.362	Sclerotinite in Carboniferous coals	136
2.212.363	Occurrence of sclerotinite	138
2.212.364	Physical properties of sclerotinite	138

2.22 The microlithotypes of coal and their strength by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	140
2.221 The concept of microlithotypes	140
2.221.1 The monomaceral microlithotypes	143
2.221.11 Vitrite	143
2.221.12 Liptite	144
2.221.13 Inertite	144
2.221.2 The bimaceral microlithotypes	145
2.221.21 Clarite	145
2.221.22 Vitrinertite	147
2.221.23 Durite	148
2.221.3 Trimacerite	148
2.222 The physical and chemical properties of microlithotypes	149
2.223 Carbominerites	150
2.23 Minerals and trace elements occurring in coal by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	153
2.231 Clay minerals	158
2.232 Carbonate minerals	164
2.233 Sulphides	165
2.234 Oxides and hydroxides	168
2.235 Phosphates	169
2.236 Heavy minerals	169
2.237 Salts	170
2.238 Trace elements	170
2.24 The lithotypes of humic and sapropelic coals by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	171
2.241 The lithotypes of humic coals	171
2.241.1 Vitrain (bright coal)	172
2.241.2 Clarain	172
2.241.3 Durain (dull coal)	172
2.241.4 Fusain	172
2.242 Sapropelic coals	173
2.242.1 Cannel coals	173
2.242.2 Transitions from cannel to boghead coals	175
2.242.3 Boghead coals	175
2.243 Carbonaceous shale, cannel and boghead shale	177
2.25 Gondwana coals by D. CHANDRA and G. H. TAYLOR	177
2.251 Introduction	177
2.252 Conditions of deposition	178
2.253 Macroscopic seam characteristics	180
2.254 Microscopic petrography	181
2.254.1 Macerals	181
2.254.11 Exinite group	182
2.254.111 Alginite	182
2.254.112 Sporinite	183
2.254.113 Resinite	183
2.254.114 Cutinite	185
2.254.12 Vitrinite group	185
2.254.13 Inertinite group	187
2.254.131 Micrinite	187
2.254.132 Macrinite	187
2.254.133 Inertodetrinite	189
2.254.134 Sclerotinite	189
2.254.135 Semifusinite	190
2.254.136 Fusinite	190

2.254.2	Microolithotypes	191
2.254.3	Mineral matter	191
2.254.31	Clay minerals	193
2.254.32	Carbonate minerals	193
2.254.33	Sulphide minerals	193
2.254.34	Silica minerals	194
2.254.35	Other minerals; mineral associations	194
2.255	Rank: Thermal and tectonic alteration	195
2.256	Use and assessment	197
2.26	Oxidized coals by D. CHANDRA	198
2.261	Microstructure and reflectance	199
2.261.1	Oxidation at lower temperature (up to $\sim 150^{\circ}\text{C}$)	199
2.261.2	Oxidation at higher temperature (greater than $\sim 150^{\circ}\text{C}$)	202
2.261.3	Oxidation rims	203
2.27	Thermally altered coals by D. CHANDRA and G. H. TAYLOR	206
2.271	Introduction	206
2.272	Microstructure	207
2.272.1	Groundmass	207
2.272.2	Original constituents	209
2.272.3	Newly-formed constituents	209
2.273	Reflectance	213
2.273.1	Relation between reflectance and chemical composition	213
2.273.2	Effect of pressure on thermally affected coals	214
2.273.3	Evaluation of temperature of alteration of affected coals	215
3.	Origin of the petrographic constituents of coal by M. TEICHMÜLLER (translation: D. G. MURCHISON)	219
3.1	Introduction and methods of investigation	219
3.2	Origin of macerals	223
3.21	General	223
3.22	The vitrinite group	225
3.221	Chemical and botanical precursors	225
3.222	Alteration during the peat and brown-coal stages	227
3.223	Individual macerals	231
3.223.1	Telinite, telocollinite	231
3.223.2	Desmocollinite, vitrodetrinite, degradinite	235
3.223.3	Gelocollinite	237
3.223.4	Corpocollinite	239
3.224	Alteration of vitrinite in the bituminous coal and anthracite stages	242
3.23	The liptinite (exinite) group	245
3.231	Chemical and botanical precursors	245
3.232	Alteration during peatification and coalification	245
3.233	Individual macerals	247
3.233.1	Sporinite	247
3.233.2	Cutinite	251
3.233.3	Resinite	252
3.233.31	Terpene resinite	253
3.233.32	Lipid resinite	258
3.233.33	Secondary 'resinite' (exsudatinitite)	259
3.233.4	Alginite	263
3.233.5	Suberinite	268
3.233.6	Liptodetrinite	269
3.233.7	Bituminite	269
3.24	The inertinite group	271
3.241	Chemical and botanical precursors	271

3.242 Alteration during peatification and coalification	272
3.243 Individual macerals	272
3.243.1 Fusinite and semifusinite	272
3.243.11 Pyrofusinite	272
3.243.12 Degradofusinite (oxyfusinite)	274
3.243.13 Rank fusinite	275
3.243.14 Primary fusinite	277
3.243.2 Sclerotinite	279
3.243.3 Macrinite	281
3.243.4 Inertodetrinite	283
3.243.5 Micrinite	283
3.3 Origin of microlithotypes	285
3.31 Vitrite	286
3.32 Clarite	286
3.33 Durite	288
3.34 Trimacerite	289
3.35 Vitrinertite	289
3.36 Fusite, semifusite	290
3.37 Rare microlithotypes	290
3.4 Origin of sapropelic coals (cannels and bogheads)	291
3.5 Origin of liptobioliths	294
4. Methods and tools of examination	295
4.1 Sampling and preparation of polished surfaces or thin sections by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	295
4.11 Sampling	295
4.12 Preparation of polished surfaces	296
4.13 Preparation of polished surfaces from particulate samples	296
4.131 Preparation of specimens without pressure	297
4.132 Preparation of specimens under pressure	298
4.133 Grinding	298
4.134 Polishing	299
4.14 Preparation of thin sections of coal	299
4.2 Methods of examination of coal	300
4.21 Macropetrographic seam section and microscopic seam section analysis by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	300
4.211 Macropetrographic seam section	300
4.211.1 Survey of the gross structure of the seams	300
4.211.2 Macropetrographic description of the seam	300
4.212 Microscopic analysis of seam profiles	305
4.212.1 Sampling and preparation of polished sections	305
4.212.11 Pillar samples	305
4.212.12 Drill cores	305
4.212.13 Preparation of polished surfaces	306
4.212.14 Performance of the analysis	306
4.22 Maceral analysis on polished surfaces of particulate coal samples by M.-Th. MACKOWSKY (translation: F. Zierke and G. H. TAYLOR)	308
4.221 General remarks	308
4.222 Instruments	309
4.223 Procedure and evaluation	309
4.224 Evaluation of the results and accuracy of analysis	311
4.23 Microlithotype analysis on particulate coal samples by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	312
4.231 General remarks	312

4.232 Instruments	312
4.233 Procedure for the analysis	313
4.233.1 Microlithotype analysis	313
4.233.11 Grouping of microlithotypes	313
4.233.12 Procedure	314
4.233.13 Evaluation and presentation of results	315
4.233.14 Accuracy of analysis	315
4.233.2 Combined maceral-microlithotype analysis	315
4.233.21 Procedure of analysis	315
4.233.22 Accuracy of analysis	319
4.24 Rank determination by measurement of reflectance on vitrinites by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	319
4.241 General remarks	319
4.242 Equipment for reflectance measurements	326
4.243 Measuring procedure	326
4.244 Evaluation and presentation of the results	327
4.245 Accuracy of the measurement	328
4.246 Reflectance measurements on other macerals or maceral groups	329
4.25 Determination of the rank of coals contained in a blend by reflectance measurements on vitrinite by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	329
4.251 General remarks	329
4.252 Equipment and checking of the measuring system	330
4.253 Procedure	330
4.254 Evaluation and expression of the results	331
4.255 Mean error of the as-determined proportions	332
4.26 Mineral distribution analysis by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	332
4.261 General remarks	332
4.262 Instruments	333
4.263 Distribution of the total mineral content	334
4.264 Distribution of individual minerals	335
4.265 Distribution of different types of association	336
4.27 Etching of polished coal surfaces by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	337
4.271 General remarks	337
4.272 Procedure	337
4.28 Determination of hardness and strength by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	341
4.281 Hardness testing	341
4.281.1 General remarks	341
4.281.2 Method of measurement	341
4.282 Mechanical strength	345
4.282.1 General remarks	345
4.282.2 Testing methods	346
4.282.21 Vickers' macrostrength	346
4.282.22 Compressive strength	346
4.282.23 Grindability and structural strength	346
4.282.24 Vibro-impact strength (after Späth)	348
4.29 Fluorescence microscopy by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	348
4.291 General remarks	348
4.292 The modern fluorescent-light microscope	349
4.293 Practical aspects	350
4.294 Quantitative determination of intensity and spectrometry	351

4.295	Photography in fluorescent light	352
4.296	Supplement to Ch. 4.29	354
4.3	Coke microscopy by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	356
4.31	General remarks	356
4.32	Examination of Rose specimens	357
4.33	Quantitative determination of the coke structure after E. HOFFMANN	357
4.34	Determination of the optical character of coke	360
4.4	Rank determination on sedimentary rocks other than coal by M. TEICHMÜLLER (translation: D. G. MURCHISON)	361
4.41	Selection of samples	362
4.42	Concentration of coaly inclusions	363
4.43	Section preparation	364
4.44	Reflectivity measurement	365
4.45	Spectral fluorescence measurement	371
5.	Applied coal petrology	375
5.1	Seam identification by E. STACH (translation: F. ZIERKE and G. H. TAYLOR)	375
5.11	Methods of seam identification	375
5.12	Seam identification using petrological methods	375
5.121	Marker seams	375
5.122	Macroscopic seam sections and seam formation curves	376
5.123	Microscopic seam identification — dull layers	378
5.124	Crassidurite seams	379
5.125	Maceral analysis	379
5.13	Seam identification using sporology	379
5.131	Spore analysis	379
5.132	Spore frequency diagrams	380
5.14	Seam identification using determination of rank	380
5.15	Seams showing particular petrographic features	380
5.2	Application of coal petrological methods in geology including oil and natural gas prospecting by M. TEICHMÜLLER (translation: D. G. MURCHISON)	381
5.21	The importance of coal petrology in the solution of stratigraphic, palaeogeographic and tectonic problems	382
5.22	Application of coal petrology in the solution of geothermal problems	393
5.23	Coal petrology and ore prospecting	399
5.24	The importance of coal petrology in prospecting for oil and natural gas	399
5.25	Further possible applications of coal petrological methods	413
5.3	The application of coal petrography in technical processes by M.-Th. MACKOWSKY (translation: F. ZIERKE and G. H. TAYLOR)	413
5.31	General remarks	413
5.32	Coal getting	414
5.33	Coal preparation	415
5.331	General remarks	415
5.332	Cleaning	418
5.332.1	Possibilities to reduce the sulphur content	419
5.332.2	Possibilities to concentrate pyrite	420
5.332.3	Determination of 'misplaced' material	421
5.332.4	The electrostatic cleaning processes	421
5.34	Carbonization	423
5.341	Properties of coking coal	424
5.342	Transition from coal to coke	439
5.343	Influence of grain size distribution	445
5.344	Prediction of coke properties	446
5.344.1	The method of BROWN, TAYLOR & COOK	448

5.344.2 The method of AMMOSOV et al. and SCHAPIRO et al.	448
5.344.3 The method of SIMONIS & MACKOWSKY	451
5.35 Formed coke and hot briquetting — Smokeless fuels	455
5.36 Briquetting (using pitch as a binder)	462
5.37 Combustion of coal	467
5.38 Spontaneous combustion of coal	474
5.4 Liquefaction (Hydrogenation)	476
