

CONTENTS

I.	SHAPE AND HOMOTOPY DOMINATION	
	S. Ferry:	
	Finitely dominated compacta need not have finite type.....	1
	R. Geoghegan	
	Fixed points in finitely dominated compacta: the geometric meaning of a conjecture of H. Bass.....	6
	H. Hastings and A. Heller:	
	Splitting homotopy idempotents.....	23
II.	GEOMETRIC TOPOLOGY AND DIMENSION THEORY	
	D. Coram:	
	Approximate fibrations - a geometric perspective.....	37
	J. Dydak:	
	Local n -connectivity of quotient spaces and one-point compactifications.....	48
	S. Ferry:	
	A simple-homotopy approach to the finiteness obstruction...	73
	R. Lacher:	
	Generalized three-manifolds.....	82
	S. Nowak and S. Spieł:	
	Some properties of deformation dimension.....	93
	J. Walsh:	
	Dimension, cohomological dimension, and cell-like mappings.	105
III.	COMPLEMENT THEOREMS AND EMBEDDINGS UP TO SHAPE	
	L. Husch and I. Ivanšić:	
	Embedding compacta up to shape.....	119
	L. Husch and I. Ivanšić	
	On shape concordances.....	135
	R. Sher:	
	Complement theorems in shape theory.....	150
	G. Venema:	
	Embeddings in shape theory.....	169
IV.	SHAPE AND STRONG SHAPE. STEENROD HOMOLOGY	
	F. Bauer:	
	Under what conditions are shape homology $\overline{E}_*$ and Steenrod homology s_{E_*} isomorphic?.....	186
	F. Cathey	
	Strong shape theory.....	215
	S. Mardešić	
	Inverse limits and resolutions.....	239
	L. Mdžinarishvili:	
	Application of the shape theory in the characterization of exact homology theories and the strong shape homotopic theory	253
	ADDRESSES OF PARTICIPANTS.....	263
