

CONTENTS

Emil Grosswald, "An orthonormal system and its Lebesgue constants."	1
George E. Andrews, "Mordell integrals and Ramanujan's 'lost' notebook."	10
Bruce C. Berndt and B.M. Wilson, "Chapter 5 of Ramanujan's second notebook."	49
Robert Anderson and Harold Stark, "Oscillation Theorems."	79
Larry Joel Goldstein, "On the generalized density hypothesis, I."	107
Steven M. Gonek, "The zeros of Hurwitz's zeta function on $\sigma = 1/2$."	129
Julia Mueller, "Gaps between consecutive zeta zeros."	141
James Lee Hafner, "On the representation of the summatory functions of a class of arithmetical functions."	148
Lawrence C. Washington, "P-adic L-functions at $s = 0$ and $s = 1$."	166
Paul Erdős, "Some problems and results on additive and multiplicative number theory."	171
Ronald Alter, "Computations and generalizations on a remark of Ramanujan."	183
Paul T. Bateman, Paul Erdős, Carl Pomerance and E.G. Straus, "The arithmetic mean of the divisors of an integer."	197
Harvey Cohn, "The next Pellian equation."	221
T.W. Cusick, "Best Diophantine approximations for ternary linear forms, II."	231
Harold G. Diamond and Kevin S. McCurley, "Constructive elementary estimates for $M(x)$."	239
Peter Hagis, Jr., "On the second largest prime divisor of an odd perfect number."	254
J.C. Lagarias, "A complement to Ridout's p-adic generalizations of the Thue-Siegel-Roth theorem."	264
D.H. and Emma Lehmer, "Cyclotomy for non-squarefree moduli."	276
Melvyn B. Nathanson, "Waring's problem for sets of density zero."	301
D.J. Newman, "Sequences without arithmetic progressions."	311

Joseph Lehner,	
"On polygon groups."	315
D.M. Bressoud,	
"Theta function identities and orthogonal polynomials,"	325
B. Gordon and K. Hughes,	
"Ramanujan congruences for $q(n)$."	333
M.I. Knopp and J. Lehner,	
"Gaps in the Fourier series of automorphic forms."	360
Thomas A. Metzger,	
"Gaps in the Fourier series of automorphic forms II."	382
Morris Newman,	
"Modular functions revisited."	396
L.A. Parson and Mark Sheingorn,	
"Bounding the norm of the Poincare θ -operator."	422
Audrey Terras,	
"Analysis on positive matrices as it might have occurred to Fourier." ..	442
