EXPOSITORY PAPERS

R.G. Stanton* and R.C. Mullin: Some properties of H-designs	1
R.G. Stanton* and H.C. Williams: Computation of some number-theoretic coverings	8

INVITED PAPERS

Brian Alspach: The search for long paths and cycles in vertex-transitive graphs and digraphs	14
C.C. Chen* and N.F. Quimpo: On strongly hamiltonian abelian group graphs	23
R.L. Graham*, Wen-Ching Winnie Li, and J.L. Paul: Monochromatic lines in partitions of $\mathbb{Z}^n$	35
J.S. Hwang: Complete stable marriages and systems of I-M preferences	49
Peter Lorimer: The construction of finite projective planes	64
Ronald C. Read: A survey of graph generation techniques	77
J.J. Seidel: Graphs and two-distance sets	90
John Sheehan: Finite Ramsey theory is hard	99

R.G. Stanton:	
Further results on covering integers of the form $1+k2^n$ by primes .	107

CONTRIBUTED PAPERS

R.A. Bailey:	
Distributive block structures and their automorphisms	115
David Billington:	
Connected subgraphs of the graph of multigraphic realisations of a degree sequence	125
J.E. Dawson:	
A construction for a family of sets and its application to matroids	136
Peter Eades:	
Regularity and optimality for trees	148
R.B. Eggleton* and D.A. Holton:	
Simple and multigraphic realizations of degree sequences	155
L.R. Foulds:	
Critical link identification in a network	173
L.R. Foulds* and R.W. Robinson:	
Enumeration of binary phylogenetic trees	187
W. Haebich* and J-L. Lassez:	
Minimisation of multiple entry finite automata	203
A. Hartman:	
A singular direct product for quadruple systems	211
Katherine Heinrich* and W.D. Wallis:	
The maximum number of intercalates in a latin square	221
D.A. Holton and C.H.C. Little*:	
Elegant odd rings and non-planar graphs	234
Mordechai Lewin:	
On critical sets of edges in graphs	269

K.L. McAvaney:	
Further evidence for a conjecture on two-point deleted subgraphs of cartesian products	272
D.G. Rogers* and L.W. Shapiro:	
Deques, trees and lattice paths	293
Deborah J. Street:	
Graeco-latin and nested row and column designs	304
R. Taylor:	
Constrained switchings in graphs	314
W.D. Wallis:	
One-factorisations of wreath products	337
Peter Wild:	
Divisible semisymmetric designs	346
Sheila Oates-Williams:	
Graphs and universal algebras	351
Sheila Oates-Williams* and Anne Penfold Street:	
Universal fabrics	355

REMAINING ADDRESSES

Alan Brace:	
A report on combinatorial mathematics in China	
Erich Durnberger:	
Some results on discontinuous homeomorphism groups of surfaces	
R.L. Graham:	
Distance matrices of trees	
A.M. Herzberg, C.W.L. Garner, and G.H.J. van Rees*:	
Latin queen squares	
D.A. Holton*, B.D. McKay, and M.D. Plummer:	
A nine point theorem for 3-connected cubic graphs, a twenty-three point conjecture for 3-connected cubic planar graphs and many ill-conceived ideas on related topics
