Preface — V

List of Contributing Authors — IX

Jasna Jankovic and Jürgen Stumper

1 Introduction — 1

Part I: Structural and compositional characterization

Sara Pedram, Richard Andres Ortiz Godoy, Maryam Ahmadi, Amir Peyman Soleymani, Mariah Batool, and Jasna Jankovic

2 Microstructural and spectroscopic characterization of PEMFCs — 7

David A. Cullen, Deborah J. Myers, and Piotr Zelenay

3 Characterization approaches for atomically dispersed platinum group metal-free catalysts — 87

Jason K. Lee, Pranay Shrestha, Ahmed M. Hasan, and Aimy Bazylak

4 Synchrotron X-ray imaging of PEMFCs — 113

Adam P. Hitchcock

5 PEMFC analysis using soft X-ray spectromicroscopy: methods and applications — 137

Part II: Performance modeling/characterization

Aslan Kosakian and Marc Secanell

6 Membrane-electrode-assembly modeling using OpenFCST — 173

Wolfgang Olbrich, Thomas Kadyk, Ulrich Sauter, and Michael Eikerling

7 Physical models of performance — 231

Yuze Hou, Qing Du, Dietmar Gerteisen, Kui Jiao, and Nada Zamel

8 Pore-scale simulation in the electrode of PEMFC – a review and tutorial — 277

Max Cimenti and Jürgen Stumper

9 Voltage loss breakdown in PEM fuel cells — 315

Jake deVaal and Jürgen Stumper

**10 Relationships between stack performance, transfer leaks and
H₂-emissions — 415**

Part III: Catalysis/CL components

Lei Zhang, Xulei Sui, Junjie Li, Kieran Doyle-Davis, and Xueliang Sun

11 Electrocatalysts: from nanostructures to single atoms — 461

Index — 489
