Contents

Part I **Introduction**

Chaos and Order in Nature
By H. Haken (With 7 Figures) 2

Part II **Fluid Dynamics. Order and Chaos in Fluid Dynamics**

Rayleigh-Benard Convection in High Prandtl Number Fluid
By P. Bergé (With 11 Figures) 14

Rayleigh-Benard Experiment in a Low Prandtl Number Fluid, Mercury
By S. Fauve, A. Libchaber (With 8 Figures) 25

Transition to Turbulence Via the Statistical Limit Cycle Route
By F.H. Busse (With 6 Figures) 36

Divergence of Coherence Length and Excitation of Resonance in Taylor Vortex Flow. By A. Brandstäter, G. Pfister, I. Rehberg, E.O. Schulz-DuBois (With 5 Figures) 45

Non-Equilibrium Phase Transitions in a Kundt's Tube
By A. Hübler, G. Schubert, G. Meyer-Kress (With 3 Figures) 49

Part III **Chaos in Fluids, Solid State Physics, and Chemical Reactions**

Stochastization of Coherent Structures by a Periodic Field
By I.S. Aranson, M.I. Rabinovich, M.M. Sushchik (With 6 Figures) 54

Turbulence and Scaling in Solid State Physics
By B.A. Huberman 64

Dynamic Instabilities Observed in the Belousov-Zhabotinsky System
By C. Vidal (With 6 Figures) 69

Part IV **Instabilities and Bifurcations: Theoretical Approaches**

Hopf-Landau Bifurcation Near Strange Attractors
By G.R. Sell 84

Dispersive Instabilities in Nonlinear Systems: The Real and Complex Lorenz Equation. By J.D. Gibbon (With 3 Figures) 92

Bifurcations and Multistability in Nonlinear Optics
By D.F. Walls, P. Zoller, P.D. Drummond, C.V. Kunasz (With 8 Figures) 102

Part V **Plasma Instabilities**

Coherent Wave Interactions in Plasmas and Active Molecular Media
By H. Wilhelmsson (With 1 Figure) 112

Instability as a Property of Plasma States
By E. Räuchle (With 12 Figures) 118

Phenomena of Self Organization in Dense Plasma
By H. Krompholz, G. Herziger (With 10 Figures) 131

Part VI **Phase Transitions**

Closed-Form Approximation and Interpolation Formulae for the 3-Dimensional Ising Model. By Bai-lin Hao (With 3 Figures) 144

Part VII **Path Integrals: Recent Developments**

Path Integral Approach to Fluctuations in Dynamic Processes
By H. Leschke 156

Definitions of Path Integrals for General Diffusion Processes
By Ch. Wissel 163

The Uses of Path Integrals for Diffusion in Bistable Potentials
By U. Weiss (With 6 Figures) 177

Part VIII **General Systems Approaches**

Structural Stability of Stochastic Systems
By W. Ebeling 188

Structure-Building Phenomena in Systems with Power-Product Forces
By W. Mende, M. Peschel (With 1 Figure) 196

Part IX **Morphogenesis**

Spatial-Temporal Coordination of Mitotic Activity in Developing Sea Urchin Embryos. By E. Parisi, S. Filosa, A. Monroy (With 6 Figures) 208

Part X **Once Again in Chaos: Theoretical Approaches**

Modeling Chaotic Systems
By R. Shaw (With 7 Figures) 218

Feigenbaum Sequences in Conservative and Dissipative Systems
By R.H.G. Helleman (With 6 Figures) 232

On the Perfect Delay Convention or the Revolt of the Slaved Variables
By M. Diener, T. Poston (With 23 Figures) 249

The Mechanism by Which Many Partial Difference Equations Destabilize
By W. Briggs, A.C. Newell, T. Sarie (With 5 Figures) 269
