

TABLE OF CONTENTS

- Summary, some motivation and acknowledgments	1
- Chapter I : Introduction, definitions, formal study and statement of the results	7
§ 1 Introduction	8
§ 2 The blowing-up method	14
§ 3 Statement of the fundamental theorem	20
§ 4 Decomposition in sectors for singularities of vector fields in $\mathbb{R}^2$ and characteristic lines	22
§ 5 Statement of the results concerning characteristic lines and decomposition in sectors for certain germs of planar diffeomorphisms; reduction to the fundamental theorem	26
§ 6 Statement of the principal $\mathbb{C}^\infty$ results	34
§ 7 Statement of the topological results	39
§ 8 Some applications and examples	43
- Chapter II : Stability of type I- and type II- singularities . .	48
§ 1 Singularities of the "hyperbolic contraction"-type	48
§ 2 Singularities of the "quasi-hyperbolic contraction"-type .	51
§ 3 Singularities which are quasi-hyperbolic contractions with respect to a degenerate Finsler-metric	64
§ 4 The "attracting corner"-singularities	74
§ 5 Attracting arcs	79
§ 6 "Saddle-type"-corners	80

- Chapter III : Stability of type III-singularities	83
§ 1 Simplified form of the "type III-singularities"	84
§ 2 Existence of a C^∞ center manifold	86
§ 3 Reduction of the C^∞ problem to a formal problem	105
§ 4 Reduction of the formal problem (30) to a difference equation	108
§ 5 Resolution of the difference equations (39) and (40)	113
- Chapter IV : Proof of the C^∞ results	126
§ 1 On the unicity of germs of flat C^∞ diffeomorphisms commuting with attracting diffeomorphisms of type I and II	127
§ 2 Characterization of germs of flat C^∞ diffeomorphisms commuting with saddle-type diffeomorphisms of type I (and II)	139
§ 3 Construction of C^∞ conjugacies in hyperbolic and parabolic sectors with only type I singularities	153
§ 4 Construction of differentiable invariants in elliptic sectors	160
§ 5 Final touch to the proofs of theorem B and C	170
- Chapter V : Proof of the topological results	173
§ 1 Preliminary results	173
§ 2 Final touch to the proof of the theorems D and E	190
§ 3 Final touch to the proof of the theorems F and G	192
- References	193
- Subject index	196
