J. Solf · R. Staubert · H. E. Suess · J. Trümper · G. Weigelt · R. M. West · R. Wolf · H. D. Zeh

Herausgeber: K. Schaifers und H. H. Voigt

Springer-Verlag Berlin · Heidelberg · New York 1981

Contents

1 Astronomical instruments

1.1 Optical telescopes (R. WOLF)	1
1.1.1 Introduction.	1
1.1.2 Optics	1
1.1.3 Mounting.	3
1.1.4 Drive and control	4
1.1.5 Building and dome.	5
1.1.6 Future developments	6
1.1.7 List of large optical telescopes erected after 1960	6
1.1.8 References for 1.1.7	11
1.1.9 General references for 1.1	12
1.2 Solar telescopes (C. J. DURRANT)	13
References for 1.2.	17
1.3 Photoelectric photometry (A. BEHR)	18
1.3.0 Symbols and definitions.	18
1.3.1 Acronyms and nomenclature	18
1.3.2 Photoelectric radiation detectors	18
1.3.3 Measuring techniques.	21
1.3.4 High speed photometry	21
1.3.5 Detectors for two-dimensional (imaging) photometry	21
1.3.6 The measured radiant flux.	24
1.3.7 Accuracy of measurements	25
1.3.8 References for 1.3	26
1.4 Photographic emulsions (R. M. WEST).	26
1.4.1 Introduction.	26
1.4.2 Definitions	27
1.4.3 Emulsions in use in astronomy – hypersensitization	27
1.4.4 Exposure and calibration	29
1.4.5 Processing	29
1.4.6 Storage.	29
1.4.7 Measurements.	29
1.4.8 Copying	30
1.4.9 Outlook.	30
1.4.10 References for 1.4.	30
1.5 Spectrometers and spectrographs (J. SOLF).	30
1.5.1 Definitions	30
1.5.2 Grating spectrometers	31
1.5.3 Fabry-Perot spectrometers.	32
1.5.4 Fourier transform spectrometers	32
1.5.5 References for 1.5	32
1.6 Optical high resolution methods (G. WEIGELT/G. SCHMAHL)	32
1.6.1 Michelson's stellar interferometry and related techniques	33
1.6.2 Intensity interferometry of Hanbury Brown and Twiss	33
1.6.3 Labeyrie's speckle interferometry and related techniques.	33
1.6.4 References for 1.6	34

1.7 X-ray and γ-ray instruments (R. STAUBERT/J. TRÜMPER)	35
1.7.1 X-ray instruments	35
1.7.1.1 Non-focusing instruments	35
1.7.1.1.1 Non-focusing/non-imaging/non-dispersive instruments	35
1.7.1.1.2 Non-focusing/imaging instruments	36
1.7.1.2 Spectrometers and polarimeters	36
1.7.1.3 Focusing X-ray telescopes	37
1.7.1.3.1 X-ray mirror systems	37
1.7.1.3.2 X-ray imaging detectors	38
1.7.1.3.3 Focal plane spectrometers	38
1.7.2 γ -ray instruments	38
1.7.3 X- and γ -ray satellites	39
1.7.4 References for 1.7	39
1.8 Infrared techniques (D. LEMKE)	42
1.8.1 Infrared detectors	42
1.8.1.1 Detector types	42
1.8.1.2 Detector parameters	43
1.8.1.3 Low background detectors	44
1.8.2 Atmospheric transmission and emission	44
1.8.3 Infrared telescopes	44
1.8.3.1 Chopper	45
1.8.3.2 Optics of the IR telescope	45
1.8.3.3 Telescope platforms	45
1.8.4 Infrared photometry	45
1.8.4.1 Photometric bands	46
1.8.4.2 Absolute calibration	46
1.8.4.3 Limiting magnitudes	46
1.8.4.4 Filters	47
1.8.5 Infrared spectroscopy	47
1.8.5.1 Circular variable filter CVF	47
1.8.5.2 Prism, grating	47
1.8.5.3 Fourier spectrometer	47
1.8.5.4 Fabry-Perot	47
1.8.5.5 Heterodyne spectroscopy	47
1.8.6 Infrared polarimetry	48
1.8.7 Spatial resolution instrumentation	48
1.8.8 References for 1.8	48
1.9 Radio astronomical receiver systems (O. HACHENBERG)	50
1.9.1 Radiometers (receivers)	50
References for 1.9.1	50
1.9.2 The radio telescopes	51
1.9.2.1 Radio telescopes for m wavelengths	51
References for 1.9.2.1	53
1.9.2.2 Radio telescopes for lower dm and cm ranges	53
1.9.2.3 Radio telescopes for mm wavelengths	57
References for 1.9.2.2 and 1.9.2.3	60
1.9.2.4 Very-long-baseline interferometer	61
References for 1.9.2.4	62

2 Positions and time determination, astronomical constants

2.1 Determination of astronomical latitude and longitude (H. ENSLIN)	63
2.1.1 Introduction	63
2.1.2 Polar motion	63
2.1.3 Definition and observation of astronomical latitude and longitude	63

2.1.4 Definition and realization of the terrestrial reference system	64
2.1.4.1 Origin of the coordinates of the pole	64
2.1.4.2 Origin of longitudes	64
2.1.5 Errors in latitude and longitude or time	65
2.1.6 Coordinates of observatories.	65
2.1.7 Polar coordinates	66
2.2 Time determination (H. ENSLIN)	70
2.2.0 Notations used in 2.2.	70
2.2.1 Systems of time measurement	70
2.2.2 Sidereal, solar, and universal time	71
2.2.2.1 Definitions of sidereal and solar time, relations between their units	71
2.2.2.2 Universal time (UT).	71
2.2.2.3 Standard times	72
2.2.2.4 Equation of time	72
2.2.2.5 Julian date, modified Julian date; Greenwich sidereal date	72
2.2.3 Ephemeris time (ET)	73
2.2.3.1 Definition of epoch and unit, and determination of ephemeris time	73
2.2.3.2 Lengths of the year	73
2.2.3.3 Lengths of the month	74
2.2.4 Atomic time.	74
2.2.4.1 Definition of the second of the International System of Units (SI)	74
2.2.4.2 International atomic time (TAI).	74
2.2.4.3 Coordinated universal time (UTC)	74
2.2.4.4 Dynamical time for ephemerides (TD)	74
2.2.5 Time signals.	75
2.2.6 Long term fluctuations of the earth's rotation speed	75
2.2.7 References for 2.1 and 2.2.	77
2.3 The system of astronomical constants (W. FRICKE)	79
2.3.1 Introduction.	79
2.3.2 Units.	79
2.3.3 The IAU (1976) system of astronomical constants	80
2.3.4 Notes	80
2.3.5 References for 2.3	81

3 The solar system

3.1 The sun	82
3.1.1 The quiet sun	82
3.1.1.1 Solar global parameters (C. J. DURRANT)	82
References for 3.1.1.1	83
3.1.1.2 Solar interior (C. J. DURRANT)	83
3.1.1.2.1 Standard models.	83
3.1.1.2.2 Non-standard models.	84
3.1.1.2.3 Solar neutrinos	84
3.1.1.2.4 Global oscillations	85
3.1.1.2.5 Convection zone.	86
3.1.1.2.6 Solar rotation	86
3.1.1.2.7 General magnetic field	87
3.1.1.2.8 References for 3.1.1.2.	87
3.1.1.3 Solar energy spectrum (C. J. DURRANT).	89
3.1.1.3.1 Absolute energy distribution.	89
3.1.1.3.2 Relative energy distribution	91
3.1.1.3.3 Limb polarization	94
3.1.1.3.4 References for 3.1.1.3.	94
3.1.1.4 Solar photosphere and chromosphere (C. J. DURRANT)	96
3.1.1.4.1 Models.	96

- 3.1.1.4.2 NLTE studies 98
 - 3.1.1.4.3 Morphology of the solar photosphere and chromosphere 99
 - 3.1.1.4.4 References for 3.1.1.4. 100
 - 3.1.1.5 Solar transition region and quiet corona (C. J. DURRANT) 102
 - 3.1.1.5.1 Models 102
 - 3.1.1.5.2 Physical parameters 102
 - 3.1.1.5.3 Diagnostics 103
 - 3.1.1.5.4 Morphology 103
 - 3.1.1.5.5 References for 3.1.1.5. 103
 - 3.1.1.6 Radio emission of the quiet sun (O. HACHENBERG) 105
 - 3.1.1.6.1 Flux density of the quiet sun 105
 - References for 3.1.1.6.1 106
 - 3.1.1.6.2 The brightness distribution across the solar disk 107
 - References for 3.1.1.6.2 111
 - 3.1.2 Solar activity 112
 - 3.1.2.1 Active regions (A. BRUZEK) 112
 - 3.1.2.1.1 Features of active regions 112
 - 3.1.2.1.2 Active region development 112
 - 3.1.2.1.3 Spotgroups 112
 - 3.1.2.1.4 Activity indices, global data (daily values) 112
 - 3.1.2.1.5 References for 3.1.2.1. 112
 - 3.1.2.2 11-year solar cycle (A. BRUZEK) 113
 - References for 3.1.2.2 113
 - 3.1.2.3 Sunspots (A. BRUZEK) 113
 - 3.1.2.3.1 General characteristics 113
 - 3.1.2.3.2 Magnetic field 114
 - 3.1.2.3.3 Spot umbra 114
 - 3.1.2.3.4 Spot penumbra 116
 - 3.1.2.3.5 Sunspot energy 116
 - 3.1.2.3.6 References for 3.1.2.3. 116
 - 3.1.2.4 Faculae and plages (A. BRUZEK) 118
 - 3.1.2.4.1 Continuum 118
 - 3.1.2.4.2 Facula models 118

 - 3.1.2.8.3 References for 3.1.2.8.1 and 3.1.2.8.2 291

3.1.2.8.4 Noise storms	291
3.1.2.8.5 References for 3.1.2.8.4	295
3.1.2.8.6 Solar radio bursts	295
3.1.2.8.6.1 Microwave bursts	296
3.1.2.8.6.2 Fast-drift bursts (Type III bursts)	298
3.1.2.8.6.3 Slow-drift bursts (Type II bursts)	302
3.1.2.8.6.4 Continuum bursts (Type IV bursts)	303
3.1.2.8.6.5 References for 3.1.2.8.6	304
3.2 The planets and their satellites	129
3.2.1 Mechanical data of the planets and satellites	129
3.2.1.1 The planets; orbital elements and related properties (F. GONDOLATSCH)	129
References for 3.2.1.1	132
3.2.1.2 Dimensions and mechanical properties, rotation of the planets (F. GONDOLATSCH)	132
References for 3.2.1.2	135
3.2.1.3 Satellites and ring systems of the planets (F. GONDOLATSCH)	136
3.2.1.3.1 Orbital elements, diameters, masses of the satellites	136
3.2.1.3.2 Ring systems of the planets Jupiter, Saturn, Uranus	138
3.2.1.3.3 References for 3.2.1.3.	140
3.2.1.4 Earth data (F. GONDOLATSCH)	141
3.2.1.4.1 Figure, mass, gravity	141
3.2.1.4.2 Rotation of the earth, precession.	142
3.2.1.4.3 Orbital motion of the earth	143
3.2.1.4.4 References for 3.2.1.4.	143
3.2.1.5 The moon (F. GONDOLATSCH).	143
3.2.1.5.1 Distance, size, gravity, librations	143
3.2.1.5.2 Orbital motion	145
3.2.1.5.3 References for 3.2.1.5.	146
3.2.1.6 The orbital relations (W.-H. IP/W. I. AXFORD).	146
3.2.1.6.1 The planets	146
3.2.1.6.2 The satellites	147
3.2.1.6.3 The planetary rings	148
3.2.1.6.4 References for 3.2.1.6.	148
3.2.2 Physics of the planets and satellites (W.-H. IP/W. I. AXFORD)	149
3.2.2.1 Introduction	149
3.2.2.2 Internal compositions and structures.	149
3.2.2.2.1 The terrestrial planets	149
3.2.2.2.2 The outer planets	151
3.2.2.2.3 The satellites	152
3.2.2.2.4 The planetary rings	153
3.2.2.2.5 References for 3.2.2.2.	154
3.2.2.3 Surface properties.	155
3.2.2.3.1 The terrestrial planets	156
3.2.2.3.2 The satellites	159
3.2.2.3.3 References for 3.2.2.3.	166
3.2.2.4 Temperatures of the planets and satellites	168
References for 3.2.2.4	170
3.2.2.5 Atmospheres	170
3.2.2.5.1 Mercury	170
3.2.2.5.2 Venus	170
3.2.2.5.3 Mars.	171
3.2.2.5.4 The outer planets	172
3.2.2.5.5 The moon	174
3.2.2.5.6 The Galilean satellites	174
3.2.2.5.7 Titan.	175
3.2.2.5.8 References for 3.2.2.5.	175
3.2.2.6 Magnetic fields	178
3.2.2.6.1 The planets	178

3.2.2.6.2 The moon	178
3.2.2.6.3 The satellites of Jupiter	178
3.2.2.6.4 References for 3.2.2.6.	179
3.2.2.7 Appendix to 3.2.2.	179
3.2.2.7.1 Jupiter	179
3.2.2.7.2 Saturn	180
3.2.2.7.3 References for 3.2.2.7.	182
3.3 Small bodies in the solar system	183
3.3.1 The asteroids (minor planets) (J. SCHUBART)	183
3.3.1.1 Representative orbits	183
3.3.1.2 Statistics of orbits.	184
3.3.1.3 Sizes and physical characteristics	185
3.3.1.4 References for 3.3.1	186
3.3.2 Meteors and meteorites (E. K. JESSBERGER).	187
3.3.2.0 Definitions	187
3.3.2.1 Meteors	188
3.3.2.1.1 Significance of meteor study.	188
3.3.2.1.2 Orbits	188
3.3.2.1.3 Classification	190
3.3.2.1.4 References for 3.3.2.1.	188
3.3.2.2 Meteorites	191
3.3.2.2.1 Definition	191
3.3.2.2.2 Significance of meteorite study.	191
3.3.2.2.3 Orbits	191
3.3.2.2.4 Classification and chemical composition	191
3.3.2.2.5 Mineralogy and petrology.	194
3.3.2.2.6 Organic matter	195
3.3.2.2.7 Rare gases	195
3.3.2.2.8 Isotopic anomalies	196
3.3.2.2.9 Origin of meteorites	197
3.3.2.2.10 Meteorites on earth	198
3.3.2.2.11 References for 3.3.2.2	198
3.3.3 Comets (J. RAHE)	202
3.3.3.1 Mechanical data	202
3.3.3.2 Photometric observations; polarimetry	215
3.3.3.3 Spectroscopic observations	216
3.3.3.4 Nucleus	220
3.3.3.5 Coma	222
3.3.3.6 Tails	223
3.3.3.7 The nature of cometary dust	225
3.3.3.8 Laboratory studies and space experiments relevant to comets (References only)	225
3.3.3.9 References for 3.3.3	225
3.3.4 Interplanetary dust and zodiacal light (H. FECHTIG/C. LEINERT/E. GRÜN).	228
3.3.4.1 Introduction	228
3.3.4.2 Methods of measurements	228
3.3.4.2.1 Direct methods	228
3.3.4.2.2 Zodiacal light photometry.	230
3.3.4.3 Direct measurements of interplanetary dust.	230
3.3.4.4 Observations of the zodiacal light	234
3.3.4.4.1 Definitions	234
3.3.4.4.2 Intensity and polarization in the visible (400–700 nm)	234
3.3.4.4.3 Spectrum and colour	236
3.3.4.4.4 Thermal emission	237
3.3.4.4.5 Radial gradient of intensity	237
3.3.4.4.6 Symmetry plane of zodiacal light.	237
3.3.4.4.7 Temporal variations	237

3.3.4.5 Interpretation of zodiacal light observations	237
3.3.4.5.1 Spatial distribution.	237
3.3.4.5.2 Size distribution	238
3.3.4.5.3 Scattering and absorption	238
3.3.4.5.4 Models	238
3.3.4.6 Dynamics of interplanetary dust	239
3.3.4.6.1 Sources.	239
3.3.4.6.2 Forces	239
3.3.4.6.3 Sinks.	240
3.3.4.7 References for 3.3.4	241
