

TABLE OF CONTENTS

GELEITWORT (by G. Pickert)

PART I: INVITED PAPERS

1.	F. BUEKENHOUT:	The basic diagram of a geometry	1
2.	J. DOYEN:	Linear spaces and Steiner systems	30
3.	D.R. HUGHES:	On designs	43
4.	U. OTT:	Some remarks on representation theory in finite geometry	66
5.	K. STRAMBACH:	Geometry and Loops	111

PART II: CONTRIBUTED PAPERS

1.	J. ANDRÉ:	On possible orders of noncommutative tactical spaces	149
2.	Th. BETH, D. JUNGnickel:	Mathieu groups, Witt designs, and Golay codes	157
3.	A. BEUTELSPACHER, U. PORTA:	Extending strongly resolvable designs	180
4.	A.E. BROUWER:	Some unitals on 28 points and their embedding in projective planes of order 9	183
5.	W. FUMY:	The large Witt design - materialized	189
6.	E. KÖHLER:	k-difference-cycles and the construction of cyclic t-designs	195
7.	E.S. LANDER:	Characterization of biplanes by their automor- phism groups	204
8.	H. LÜNEBURG:	Ein einfacher Beweis für den Satz von Zsigmondy über primitive Primteiler von $A^N - 1$	219
9.	A. NEUMAIER:	On a class of edge-regular graphs	223
10.	N. PERCSY:	Geometries uniquely embeddable in projective spaces	231
11.	K.E. WOLFF:	Strong point stable designs	242
