

CONTENTS

List of contributors.....	VII
Preface.....	XI
Opening Remarks	
R.F. Scagel.....	1

Part I. Strategies of growth and reproduction

Physiology of carbon fixation in benthic marine algae.	
J. Willenbrink.....	7
Seasonal patterns of carbon assimilation and utilization by kelps.	
K.H. Mann, A.R.O. Chapman and J. Gagne.....	23
Engelmann's theory: The compelling logic.	
J. Ramus.....	29
Seasonality in larger brown algae and its possible regulation by the environment.	
K. Luning.....	47

Part II. Nutrition and culture

Inorganic nutrition of marine macro-algae in culture.	
J. McLachlan.....	71
Nutrient uptake and growth in the Laminariales and other macrophytes: A consideration of methods.	
P.J. Harrison and L.D. Druehl.....	99
Nitrogen nutrition of <u>Macrocystis</u> .	
W.N. Wheeler.....	121
Uptake of inorganic ions and their long distance transport in Fucales and Laminariales.	
J.Y. Floc'h.....	139
Translocation of organic compounds in Laminariales.	
K. Schmitz.....	167

Part III. Marine macrophytes in coastal ecosystems

The regulation of macroalgal associations in kelp forests.

M.S. Foster..... 185

Roles for detritus in complementing productivity of coastal systems.

J.R. Sibert..... 207

Degradation of the kelps *Macrocystis integrifolia* and *Nereocystis luetkeana* in British Columbia coastal waters.

L.J. Albright, J. Chocair, K. Masuda and M. Valdes..... 215

Part IV. Polysaccharides, kelp farming and harvest

Toward improved understanding of polysaccharide synthesis and storage in marine algae.

R.G.S. Bidwell..... 237

Farming *Macrocystis* at coastal and oceanic sites.

W.J. North, V. Gerard and J. Kuwabara..... 247

Macrocystis harvest strategy in British Columbia.

L.M. Coon..... 265

Subject index..... 283
