

CONTENTS

M. Berger and A. Sloan - Explicit solutions of partial differential equations	1
L.L. Helms - Hyperfinite spin models	15
C.W. Henson and L. Moore - Nonstandard analysis and the theory of Banach spaces	27
S.A. Kosciuk - Stochastic solutions to partial differential equations	113
D. Laugwitz - Ω -calculus as a generalization of field extension - An alternative approach to non- standard analysis	120
T.L. Lindstrøm - Stochastic integration in hyperfinite dimensional linear spaces	134
E. Perkins - Stochastic processes and nonstandard analysis	162
M.M. Richter and M.E. Szabo - Towards a nonstandard analysis of programs	186
K.D. Stroyan - Infinitesimal analysis of ℓ^∞ in its Mackey topology	204
