Preface — V

Chapter 1

Types and properties of gas streams — 1

- 1.1 Introduction — 1
- 1.2 Types of gas streams — 2
 - 1.2.1 Biogas — 2
 - 1.2.2 Coalbed methane — 6
 - 1.2.3 Coal gas — 7
 - 1.2.4 Flue gas — 11
 - 1.2.5 Landfill gas — 14
 - 1.2.6 Natural gas — 16
 - 1.2.7 Refinery gas — 22
 - 1.2.8 Synthesis gas — 27
- 1.3 Constituents of gas streams — 28
 - 1.3.1 Methane — 31
 - 1.3.2 Ethane — 32
 - 1.3.3 Propane — 33
 - 1.3.4 Butane — 33
 - 1.3.5 Olefin derivatives — 34
 - 1.3.6 Higher molecular weight hydrocarbon derivatives — 34
 - 1.3.7 Non-hydrocarbon constituents — 36
- 1.4 Chemical and physical properties — 37
 - 1.4.1 Chemical properties — 41
 - 1.4.2 Physical properties — 46
- 1.5 Uses — 48
- References — 54

Chapter 2

Liquefaction of gases — 59

- 2.1 Introduction — 59
- 2.2 The liquefaction process — 63
 - 2.2.1 The refrigeration cycle — 69
 - 2.2.2 The evaporation step — 70
 - 2.2.3 The compression step — 71
 - 2.2.4 The condensation step — 72
- 2.3 Processes — 73
- 2.4 Storage and transfer facilities — 83
 - 2.4.1 General requirements — 84
 - 2.4.2 Specific requirements — 86

2.4.2.1	Cryogenic process system —	87
2.4.2.2	Pumps and compressors —	88
2.4.2.3	Storage tanks —	88
2.4.2.4	Insulation —	89
2.4.2.5	Relief devices —	89
2.4.2.6	Instrumentation —	89
2.4.2.7	Other requirements —	90
2.5	Liquefied natural gas carriers —	91
2.6	Liquefied petroleum gas —	94
	References —	95

Chapter 3

Combustion of gases — 97

3.1	Introduction —	97
3.2	History of combustion —	99
3.3	Combustion fundamentals —	102
3.3.1	Combustion chemistry of gases —	105
3.3.2	Flammability and flame propagation —	112
3.3.3	Combustion products and pollutants —	113
3.4	Gaseous fuels —	113
3.4.1	Natural gas —	114
3.4.2	Hydrogen —	115
3.4.3	Methane —	117
3.4.4	Ethane —	117
3.4.5	Propane —	118
3.4.6	Butane —	118
3.4.7	Liquefied petroleum gas —	119
3.5	Combustion processes and combustors —	121
3.5.1	Types of combustors —	124
3.5.2	Ignition system —	128
3.5.3	Furnace —	128
3.5.4	Boiler —	128
3.5.5	Ash-handling system —	130
3.5.6	Flue-gas stack —	130
3.6	Gaseous fuel combustion systems —	131
3.6.1	Gas engine —	131
3.6.2	Gas turbine —	131
3.7	Power generation —	132
3.7.1	Thermal power plants —	132
3.7.2	Cogeneration (combined heat and power) —	132
3.7.3	Trigeneration —	133
3.7.4	Combined cycle —	133

3.8	Combustion diagnostics and control — 134
3.8.1	Diagnostics — 134
3.8.2	Advanced combustion control — 135
3.8.2.1	Safety — 135
3.8.2.2	Fire prevention — 135
3.8.2.3	Explosion prevention — 136
3.8.3	Combustion emissions and controls — 138
3.8.3.1	Emissions — 138
3.8.3.2	Greenhouse gases — 141
3.8.3.3	Controls — 142
3.8.4	Pollutant reduction and flue-gas cleaning — 144
3.8.4.1	Greenhouse gas emissions — 145
3.8.4.2	Smog and acid rain — 146
	References — 147

Chapter 4

Conversion of gases to liquids — 149

4.1	Introduction — 149
4.2	Occurrence, resources, and properties — 151
4.2.1	Non-associated gas — 153
4.2.2	Associated gas — 154
4.2.3	Composition — 155
4.2.4	Natural gas liquids — 156
4.2.5	Other gas streams — 156
4.3	Processes — 157
4.3.1	Direct conversion of methane — 159
4.3.2	Synthesis gas production — 161
4.3.3	Gas to methanol — 164
4.3.4	Gas to dimethyl ether — 166
4.3.5	Gas to olefins — 167
4.3.6	Gas to naphtha (gasoline) — 168
4.3.7	Fischer-Tropsch process — 169
4.3.7.1	Process description — 170
4.3.7.2	Chemistry — 171
4.3.7.3	Products — 173
4.3.7.4	Catalysts — 174
4.3.7.5	Commercial processes — 174
4.3.8	Other processes — 178
4.4	The future — 180
	References — 181

Chapter 5**Conversion of gases to chemicals — 184**

- 5.1 Introduction — **184**
- 5.2 Thermal reactions — **186**
 - 5.2.1 Thermal decomposition — **188**
 - 5.2.2 Steam cracking — **192**
- 5.3 Catalyst-promoted reactions — **195**
 - 5.3.1 Fluid catalytic cracking — **197**
 - 5.3.2 Hydrocracking — **198**
 - 5.3.3 Catalytic reforming — **200**
- 5.4 Hydrogenation reactions — **201**
- 5.5 Dehydrogenation reactions — **204**
- 5.6 Dehydrocyclization reactions — **207**
- 5.7 Chemical reactions — **209**
 - 5.7.1 Alkylation — **210**
 - 5.7.2 Halogenation — **211**
 - 5.7.3 Hydration — **213**
 - 5.7.4 Oxidation — **213**
 - 5.7.5 Polymerization — **214**
 - 5.7.6 Rearrangement — **215**
 - 5.7.7 Substitution — **215**
- 5.8 Organic petrochemicals from gases — **215**
 - 5.8.1 Chemicals from methane — **218**
 - 5.8.1.1 Acetic acid — **223**
 - 5.8.1.2 Aldehyde derivatives — **223**
 - 5.8.1.3 Carbon disulfide — **224**
 - 5.8.1.4 Chloromethane derivatives — **224**
 - 5.8.1.5 Dimethyl carbonate — **227**
 - 5.8.1.6 Dimethyl ether — **227**
 - 5.8.1.7 Ethylene — **228**
 - 5.8.1.8 Ethylene glycol — **229**
 - 5.8.1.9 Formaldehyde — **230**
 - 5.8.1.10 Hydrocarbon derivatives — **231**
 - 5.8.1.11 Hydrogen cyanide — **234**
 - 5.8.1.12 Methyl alcohol — **234**
 - 5.8.1.13 Methylamine — **237**
 - 5.8.1.14 Nitro derivatives — **238**
 - 5.8.1.15 Urea — **238**
 - 5.8.2 Chemicals from ethane — **239**
 - 5.8.2.1 Chlorination — **240**
 - 5.8.2.2 Oxidation — **241**
 - 5.8.2.3 Thermal cracking — **242**

5.8.3	Chemicals from propane —	242
5.8.3.1	Chlorination —	243
5.8.3.2	Dehydrogenation —	243
5.8.3.3	Nitration —	244
5.8.4	Chemicals from butane isomers —	244
5.8.4.1	Aromatic derivatives —	245
5.8.4.2	Chlorination —	246
5.8.4.3	Isomerization —	247
5.8.4.4	Oxidation —	247
5.9	Inorganic chemicals from gases —	249
	References —	255

Chapter 6

The Fischer–Tropsch process — 258

6.1	Introduction —	258
6.2	History and development of the process —	262
6.3	Fischer–Tropsch chemistry —	265
6.3.1	Chemical principles —	265
6.4	Synthesis gas —	271
6.4.1	Feedstocks —	272
6.4.2	Production —	276
6.4.3	Properties —	278
6.4.4	Product distribution —	279
6.5	Process parameters —	283
6.6	Reactors and catalysts —	285
6.6.1	Reactors —	285
6.6.2	Catalysts —	288
6.7	Products and product quality —	291
6.7.1	Gases —	292
6.7.2	Liquids —	295
6.8	Refining Fischer–Tropsch products —	296
	References —	298

Chapter 7

Corrosion caused by gases — 300

7.1	Introduction —	300
7.2	Corrosion chemistry —	301
7.2.1	General chemistry —	302
7.2.2	Anodic reactions —	303
7.2.3	Cathodic reactions —	304
7.3	Types of corrosion —	304
7.3.1	Acidic corrosion —	305

7.3.2	Atmospheric corrosion —	305
7.3.2.1	Dry corrosion —	306
7.3.2.2	Wet corrosion —	306
7.3.3	Biocorrosion —	307
7.3.4	Carburization —	308
7.3.5	Crevice corrosion —	308
7.3.6	De-alloying —	309
7.3.7	Erosion-corrosion —	309
7.3.8	Hydrogen damage —	310
7.3.9	Oxidative corrosion —	310
7.3.10	Sour water corrosion —	311
7.3.11	Sulfidic corrosion —	312
7.3.12	Uniform and localized corrosion —	313
7.4	Effect of temperature —	314
7.5	Corrosion during gas processing and use —	315
7.5.1	Corrosion by hydrogen sulfide —	320
7.5.2	Corrosion by carbon dioxide —	324
7.5.3	Other corrosive agents —	324
7.6	Inhibition of corrosion —	325
7.6.1	Acid gas removal —	326
7.6.2	Sour water stripper —	328
7.6.3	Sulfur recovery units —	328
7.6.3.1	Claus process —	329
7.6.3.2	Other units —	330
7.6.4	Acid gas flare header —	331
7.6.5	Heat exchangers —	331
7.7	Corrosion monitoring —	332
7.7.1	Corrosion coupons —	333
7.7.2	Electrical resistance methods —	334
7.7.3	Field signature methods —	335
7.7.4	Linear polarization resistance monitoring —	335
7.7.5	Galvanic monitoring —	336
7.7.6	Other methods —	336
7.7.6.1	Iron powder test —	336
7.7.6.2	Hydrogen penetration monitoring —	337
7.7.6.3	Radiography —	337
7.7.6.4	Biological monitoring —	337
7.7.6.5	Sand/erosion monitoring —	337
7.8	Corrosion control in gas processing plants —	338
7.8.1	Cathodic protection —	339
7.8.2	Galvanic cathodic protection —	340
7.8.3	Impressed current cathodic protection —	340

7.8.4	Cathodic shielding —	341
7.9	Corrosion control in pipelines —	341
7.9.1	Protective coatings —	342
7.9.2	Cathodic protection —	342
7.10	Corrosion control in offshore structures —	344
7.10.1	Hull components —	344
7.10.2	Tanks —	345
7.10.3	Riser systems —	346
7.10.4	Miscellaneous areas —	346
7.11	Corrosion management —	347
	References —	349

Chapter 8

Gases and the environment — 353

8.1	Introduction —	353
8.2	Energy security —	357
8.2.1	Reserves —	357
8.2.2	Energy security —	358
8.3	Emissions and pollution —	359
8.3.1	Greenhouse gas emissions —	362
8.3.2	Air pollutants —	365
8.3.2.1	Emissions during exploration, production, and delivery —	367
8.3.2.2	Emissions during processing —	371
8.3.2.3	Emissions during combustion —	372
8.3.2.4	Emissions during flaring —	374
8.4	Acid rain and smog —	375
8.5	Particulate matter —	377
8.6	Regulations —	378
8.6.1	Historical aspects —	379
8.6.2	Federal regulations —	383
8.7	Pollution mitigation —	385
	References —	386

Glossary — 389

Conversion factors and constants — 449

1	Area —	449
2	Compressibility factor —	449
3	Concentration conversion —	450
4	Density —	450
5	Conversion —	451
6	Gas constant —	452

XIV — Contents

7	Length conversion —	453
8	Periodic table of the elements —	454
9	Pressure unit conversion factors —	454
10	Sludge conversion —	454
11	Standard gas conditions —	455
12	Temperature conversion —	455
13	Thermodynamic data at 25 °C for selected constituents of natural gas —	455
14	Weight conversion —	456
15	Volume conversion —	456
16	Other conversions —	456
