
I. Table of Contents

I. Table of Contents	1
II. List of Figures	6
III. List of Tables	8
1 Introduction	9
1.1 Intestinal parasites	9
1.2 <i>Strongyloides ratti</i>	13
1.3 Heat shock proteins	15
1.3.1 Heat shock protein 60	16
1.3.2 Heat shock protein 10	17
1.4 Objective of this thesis	18
2 Materials and Methods	19
2.1 Reagents, disposals, instruments	19
2.1.1 Solutions and buffers	19
2.1.2 Media and additives	22
2.1.3 Enzymes	23
2.1.4 Molecular weight standards	24
2.1.5 Primer	24
2.1.6 Plasmids	27
2.1.7 Bacteria and yeast strains	35
2.1.8 Antibodies	35
2.1.9 Computer-based sequence analysis	36
2.2 <i>Strongyloides ratti</i> life cycle and culturing	37
2.2.1 Animals	37
2.2.2 Host infection	37
2.2.3 Host immunisation	37
2.2.4 Baermann technique	37
2.3 Molecular biological methods	38
2.3.1 Production of competent bacteria (Nishimura <i>et al</i> 1990)	38
2.3.2 Transformation of DNA into bacteria	39
2.3.3 Purification of plasmid DNA	39

2.3.3.1	Plasmid purification from bacterial cultures	39
2.3.3.1.1	Mini-scale plasmid isolation	39
2.3.3.1.2	Alternative mini-scale plasmid isolation	39
2.3.3.1.3	Plasmid-DNA isolation from 100 ml cultures (Midi preps)	40
2.3.3.1.4	DNA-fragment purification	40
2.3.3.1.5	DNA-fragment extraction from agarose gels	40
2.3.4	Total RNA isolation from <i>S. rattii</i> infectious larvae or parasitic females	40
2.3.4.1	Total RNA isolation	40
2.3.4.2	Phenol/chloroform extraction	41
2.3.4.3	Precipitation of RNA	41
2.3.5	gDNA isolation from <i>S. rattii</i> infectious larvae and precipitation	42
2.3.6	Polymerase chain reaction (PCR)	42
2.3.7	5' and 3' cDNAs amplification	42
2.3.8	DNA agarose gel electrophoresis	43
2.3.9	Sequencing of DNA	43
2.3.10	Enzymatic manipulation of DNA	43
2.3.10.1	Restriction analysis	43
2.3.10.2	Plasmid DNA fragment	44
2.3.10.3	Enzymatic manipulation of vector DNA prior to ligation	44
2.3.10.4	Ligation of plasmid vector and insert DNA	44
2.3.11	Photometric quantification of nucleic acids	45
2.3.12	Southern blot analysis	45
2.3.12.1	Random prime RNA labelling	46
2.3.13	Whole mount <i>in situ</i> hybridisation	46
2.3.13.1	Tissue preparation	46
2.3.13.1.1	Primary fixation of iL3	46
2.3.13.1.2	Fixation of iL3 onto slides	47
2.3.13.1.3	Kryo-block preparation	47
2.3.13.2	Dig-labelling of RNA probes	48
2.3.13.3	Prehybridisation, hybridisation and posthybridisation procedures	48
2.3.13.4	Detection procedure	49
2.4	Cell cultures	49
2.4.1	Yeast cell culture	49
2.5	Protein biochemical methods	50
2.5.1	Mammalian two-hybrid	50

2.5.1.1	Transfection	52
2.5.1.2	Renilla luciferase assay	53
2.5.2	Yeast two-hybrid	53
2.5.2.1	Filter and fluid β -Galactosidase assays	55
2.5.3	Western blot analyses	55
2.5.3.1	Sodium dodecylsulfate polyacrylamide gel electrophoresis (SDS-PAGE)	55
2.5.3.2	Electroblotting transfer (semi dry blot) and immunological detection of proteins	56
2.5.3.3	Coomassie staining of polyacrylamide gels	56
2.5.3.4	Silver staining of polyacrylamide gels	56
2.5.3.5	Ponceau-S staining	56
2.5.3.6	Drying of polyacrylamide gels	57
2.5.4	Protein expression	57
2.5.4.1	Expression of recombinant protein in <i>E. coli</i>	57
2.5.4.2	Transfection and expression of recombinant protein in the Baculovirus system	57
2.5.5	Enzyme-linked immunosorbent assay (ELISA)	59
2.5.6	Mass spectrometry (Liquid Chromatography Electrospray Ionisation Tandem MS-LC ESI MS/MS)	59
2.5.6.1	Supernatant extraction	59
3	Results	61
3.1	Identification and cloning of the putative <i>S. ratti</i> HSP10 sequence	61
3.2	Characterisation of the <i>S. ratti</i> HSP10 transcript	62
3.3	Identification and cloning of the putative <i>S. ratti</i> HSP60 transcript	65
3.4	Characterisation of <i>S. ratti</i> HSP60 iL3 transcript	66
3.5	Characterisation of putative <i>S. ratti</i> HSP10 and HSP60 transcripts of parasitic females	69
3.6	Localisation of putative HSP10 and HSP60 transcripts in <i>S. ratti</i> iL3 by <i>in situ</i> hybridisation	70
3.7	Identification of HSP10 and HSP60 proteins in supernatants of <i>S. ratti</i> iL3 and parasitic females	72
3.8	Characterisation of the putative <i>S. ratti</i> HSP10 and HSP60 genes	73
3.8.1	<i>S. ratti</i> HSP10 and HSP60 Southern blot analyses	73
3.8.2	<i>S. ratti</i> HSP10 and HSP60 gene analyses	74
3.8.3	Analyses of the intergenic region of <i>S. ratti</i>	75

3.9	Characterisation of the <i>S. ratti</i> HSP10 and HSP60 as putative binding partners using two-hybrid approaches	78
3.9.1	Mammalian two-hybrid analysis	78
3.9.2	Yeast two-hybrid analysis	81
3.10	DNA immunisation with recombinantly expressed <i>S. ratti</i> HSP10	85
3.11	Putative <i>S. ratti</i> HSP60 expression in <i>E. coli</i>	87
3.12	Putative <i>S. ratti</i> HSP10 expression in the baculovirus system	88
4	Discussion	89
4.1	Identification of <i>Sr</i> HSP10 and <i>Sr</i> HSP60	89
4.2	Characterisation of <i>Sr</i> HSP10 and <i>Sr</i> HSP60	90
4.3	Characterisation of <i>Sr</i> HSP10 and <i>Sr</i> HSP60 genes	92
4.4	Characterisation of <i>Sr</i> HSP10 and <i>Sr</i> HSP60 as binding partners	Fehler! Textmarke nicht definiert.
4.5	The immunological role of <i>Sr</i> HSP10	95
4.6	Outlook	97
5	Summary	98
6	Appendix	99
6.1	Mammalian and yeast two-hybrid <i>Sr</i> HSP60 bait-constructs	99
6.1.1	<i>Sr</i> HSP60 cDNA sequences of the mammalian two-hybrid bait-constructs	99
6.1.2	<i>Sr</i> HSP10 cDNA sequences of the mammalian two-hybrid prey-constructs	100
6.1.3	<i>Sr</i> HSP60 cDNA sequences of the yeast two-hybrid bait-constructs	101
6.1.4	<i>Sr</i> HSP10 cDNA sequences of the yeast two-hybrid prey-constructs	101
6.2	<i>Sr</i> HSP10 and <i>Sr</i> HSP60 Southern blot probes	102
6.2.1	<i>Sr</i> HSP60 Southern blot probe cDNA sequences	102
6.2.2	<i>Sr</i> HSP10 Southern blot probe cDNA sequence	103
6.3	<i>Sr</i> HSP60 subfragment cDNA sequence for <i>E. coli</i> expression excluding the mitochondrial leading sequence	103
6.4	<i>Sr</i> HSP60 cDNA and amino acid sequences including the 5' and 3' UTR	104
6.5	<i>Sr</i> HSP10 cDNA and amino acid sequences including the 5' and 3' UTR	105
6.6	<i>Sr</i> HSP60 and <i>Sr</i> HSP10 parasitic female cDNA sequences	106
6.6.1	<i>Sr</i> HSP60 parasitic female cDNA sequence	106
6.6.2	<i>Sr</i> HSP10 parasitic female cDNA sequence	108
6.7	<i>Sr</i> HSP60 and <i>Sr</i> HSP10 gDNA sequences	109

7	References	110
8	Abbreviations and Units	119
8.1	Abbreviations	119
8.2	Units	120
8.3	Amino acids	121
