

CONTENTS

Effect of mobile phase composition on the retention behavior of oligonucleotides in reversed phase chromatography Z. El Rassi, C. Horvath	1
Quantitative structure retention relationships for oligonucleotides J. Jacobson, Z. El Rossi, C. Horvath	15
Spherical and irregular silica. Does shape influence the selectivity? H. Müller, H. Engelhardt	25
The current role of HPLC for the routine analysis of endogenous compounds in clinical chemistry M. Schöneshöfer, I. Molnar	41
Analysis of unconjugated cortisone and 6 β -OH-cortisol in human urine by high performance liquid chromatography B. Weber, M. Schöneshöfer	63
High performance liquid chromatography of proteinies on reversed phase exemplified with human interferon and other proteinies: Review and scope of the method H. J. Friesen	77
HPLC of membrane bound proteins Dj.. Josić, W. Reutter, I. Molnar	109
Separation of proteins by size exclusion and reversed phase high pressure liquid chromatography W. Schwarz, J. Born, H. Tiedemann, I. Molnar	123
High performance liquid chromatography as applied to the studies of the fibrinogen structure M. Kehl, F. Lottspeich, A. Henschen	137
The HPLC of divalent sulfur J. Möckel, T. Freyholdt, J. Weiss, I. Molnar	161
Aspects of affinity chromatography in HPLC K. Buchholz, A. Borchert, V. Kasche	187
The role of HPLC in pharmakokinetics W. Krause	197
Improvement of column performance in HPLC using a special inlet port W. Lamer, I. Molnar	213
Dissolution rate determination of low dose oral contraceptives using automated HPLC, with column switching technique A. Hühn	227

Practical aspects of the routine determination by HPLC of free noradrenaline and adrenaline in urine and plasma K. P. Krings, B. Neidhart, Ch. Lippmann	241
Separation of catecholoeestrogens and their monomethyl ethers by reversed phase HPLC with ternary mobile phase E. Kraas, M. Schütt, E. Zietz, R. Knuppen	275
Quantitative determination of aryloxypropanolamines in plasma and organs of the rat by ion-pair reversed phase HPLC H. Winkler, B. Lemmer	293
HPLC-analysis of estrogen-active anabolica in meat with the estrogen-receptor-test as specific detection system H. G. Grohmann, H. J. Stan	307
Methods of detection in modern HPLC W. Baumann	315
Fluorimetric determination of drugs in biological materials by means of high performance liquid chromatography P. Haefelfinger	335
Rapid determination of sodium gluconate and glucose in fermentation fluids R. Lenz, G. Zoll	355
Retention in practical HPLC I. Molnar	363
The selection of optimal conditions in HPLC III. Practical aspects of low volume, small bore, packed columns in HPLC H. H. Lauer, G. P. Rozing	409
List of Symbols used in the Text	435
Chromatograms	439
Author Index	441
Subject Index	443
