

CONTENTS

On the largest initial completion of categories of algebra J. Adámek and G.E. Strecker	1
The coreflective hull of the contiguous spaces in the category of merotopic spaces H.L. Bentley and H. Herrlich	16
On nuclear limit vector spaces S. Bjørn	27
Higher order sheaves and Banach modules F. Borceux	40
On the non-unique extension of topological to bitopological properties G.C.L. Brümmer	50
A categorical approach to probability theory Michèle Giry	68
Ascoli's theorem for topological categories J.W. Gray	86
Rigid spaces and monoidal closedness G. Greve	105
The Puppe and Nomura operators in the category of homotopy pairs K.A. Hardie and A.V. Jansen	112
Universal completions of concrete categories H. Herrlich	127
Relative nilpotent groups P. Hilton	136
Factorization of cones II, with an application to weak Hausdorff spaces R.E. Hoffmann	148
An essay on free compact groups K.H. Hofmann	171
Spectral dualities involving mixed structures S.S. Hong and L.D. Nel	198

Categories of orderable spaces	205
M. Hušek	
Factorization theorems for geometric morphisms, II.	216
P.T. Johnstone	
Factorizations of functors having left adjoints	234
J.M. McDill	
Enriched algebraic categories with applications in functional analysis	247
L.D. Nel	
On subcategories of Banach spaces in sheaves	260
J.W. Pelletier and R. Rosebrugh	
Connectednesses and disconnectednesses in S-Near	275
G. Preuss	
Local monoreflectivity in topological categories	293
G. Salicrup	
An algebraic version of Cantor-Bendixson analysis	310
H. Simmons	
On regular-projective spaces in topological-algebraic categories	324
W. Sydow	
Boolean completion and m-convergence	333
G. Takeuti	
Birkhoff's Theorem for categories	351
W. Tholen	
Structure Functors	358
M.B. Wischniewsky	
On compact space objects in topoi	375
O. Wyler and H.J. Porta
