Participants	ix
Surfaces of general type with geometric genus zero: a survey	1
Ingrid Bauer, Fabrizio Catanese and Roberto Pignatelli	
Holomorphic symplectic geometry: a problem list	49
Arnaud Beauville	
Generalized Lagrangian mean curvature flow in Kähler manifolds that are almost Einstein	65
Tapio Behrndt	
Einstein metrics and preserved curvature conditions for the Ricci flow ...	81
Simon Brendle	
Differential Harnack estimates for parabolic equations	87
Xiaodong Cao and Zhou Zhang	
Euler characteristic of a complete intersection	99
Sławomir Cynk	
Cremona special sets of points in products of projective spaces	115
Igor V. Dolgachev	
Stable bundles and polyvector fields	135
Nigel Hitchin	
Buser-Sarnak invariant and projective normality of abelian varieties	157
Jun-Muk Hwang and Wing-Keung To	
Complete Kähler-Einstein manifolds	171
Marco Kühnel	

Fixed point subalgebras of Weil algebras: from geometric to algebraic questions	183
Miroslav Kureš	
Self-similar solutions and translating solutions	193
Yng-Ing Lee	
Aspects of conformal holonomy	205
Felipe Leitner	
Bifurcation braid monodromy of plane curves	235
Michael Lönne	
A survey of Torelli and monodromy results for holomorphic-symplectic varieties	257
Eyal Markman	
On singularities of generically immersive holomorphic maps between complex hyperbolic space forms	323
Ngaiming Mok	
Generically nef vector bundles and geometric applications	345
Thomas Peternell	
Dolbeault cohomology of nilmanifolds with left-invariant complex structure	369
Sönke Rollenske	
Smooth rationally connected threefolds contain all smooth curves	393
G.K. Sankaran	
Submanifolds in Poisson geometry: a survey	403
Marco Zambon
