

CONTENTS

Part I. Topics in Complex Differential Geometry

by *S. Kobayashi* and *C. Horst*

Preface	8
0. Notations and conventions	9
1. Basic concepts of complex differential geometry	11
2. Affine structures and holomorphic affine connections	30
3. Projective structures and holomorphic projective connections	36
4. Quadric structures and holomorphic conformal structures	44
5. Holomorphic tensor fields	54
References	64

Part II. Function Theory on Noncompact Kähler Manifolds

by *H. Wu*

Preface	68
0. Background Material	70
1. First Lecture	97
2. Second Lecture	106
3. Third Lecture	119
4. Fourth Lecture	129
5. Fifth Lecture (Open Problems)	139
Bibliography	149
Index	156
