THEODORE S. MOTZKIN: SELECTED PAPERS

CONTENTS

		Page
Preface		xi
Introduction		xiii
Publications of Theodore S. Motzkin		xix
Selected Papers		
Papers on Linear Inequalities and Linear Programming		
[54]	Contributions to the Theory of Linear Inequalities (1952)	1
[57]	(With H. Raiffa, G. L. Thompson, and R. M. Thrall) The double description method (1953)	81
[62]	(With I. J. Schoenberg) The relaxation method for linear inequalities (1954)	104
[65]	The probability of solvability of linear inequalities (1955)	116
[70]	The assignment problem (1956)	121
Papers on Convexity		
[5]	Sur quelques propriétés caractéristiques des ensembles convexes (On some characteristic properties of convex sets) (1935)	138
[6]	Sur quelques propriétés caractéristiques des ensembles bornés non convexes (1935)	144
[61]	(With E. G. Straus and F. A. Valentine) The number of farthest points (1953)	151
[84]	Convex type varieties (1960)	163
[96]	(With E. G. Straus) Representation of points of a set as linear combinations of boundary points (1961)	166
Papers on Algebra		
[19]	Sur l'équation irréductible $z^n + a_1 z^{n-1} + \ldots + a_n = 0$, $n > 1$, à coefficients complexes entiers, dont toutes les racines sont sur une droite. Les 11 classes de droites admissibles (On the irreducible equation $z^n + a_1 z^{n-1} + \ldots + a_n = 0$, $n > 1$, with complex integer coefficients, and collinear roots. The 11 classes of admissable straight lines) (1945)	170
[39]	The Euclidean algorithm (1949)	172
[53]	(With O. Taussky) Pairs of matrices with property L (1952)	177
[68]	(With O. Taussky) Pairs of matrices with property L. II (1955)	184
[86]	Determinants whose elements have equal norm (1960)	199
[113]	The arithmetic-geometric inequality (1967)	203
[132]	On $L(S)$-tuples and l-pairs of matrices (1972)	223

Papers on Combinatorics and Graph Theory

[29] (With A. Dvoretzky) A problem of arrangements (1947) 230

[30] (With A. Dvoretzky) The asymptotic density of certain sets of real numbers (1947) 239

[34] Relations between hypersurface cross ratios, and a combinatorial formula for partitions of a polygon, for permanent preponderance, and for non-associative products (1948) 246

[36] (With B. Bernheim) A criterion for the divisibility of n-gons into k-gons (1949) 255

[49] The lines and planes connecting the points of a finite set (1951) 265

[72] (With E. G. Straus) Some combinatorial extremum problems (1956) 279

[81] (With O. Ore) Subsets and subgraphs with maximal properties (1959) 287

[90] (With B. Grünbaum) Longest simple paths in polyhedral graphs (1962) 292

[98] (With B. Grünbaum) The number of hexagons and the simplicity of geodesics on certain polyhedra (1963) 301

[99] The evenness of the number of edges of a convex polyhedron (1964) 309

[102] (With E. G. Straus) Maxima for graphs and a new proof of a theorem of Turán (1965) 311

[115] Cooperative classes of finite sets in one and more dimensions (1967) 317

[116] (With P. E. O'Neil) Bounds assuring subsets in convex position (1967) 325

[117] Shadows of finite sets (1968) 329

[136] Sets for which no point lies on many connecting lines (1975) 338

Papers on Power Series

[2] Bemerkung über Singularitäten gewisser mit Lücken behafteter Potenzreihen (Remark on singularities of power series with gaps) (1933) 342

[87] Power series with gaps (1960) 348

[120] (With E. G. Straus) Divisors of polynomials and power series with positive coefficients (1969) 349

Papers on Approximation Theory

[55] (With I. J. Schoenberg) On lineal entire functions of n complex variables (1952) 361

[71] (With J. L. Walsh) Least pth power polynomials on a finite point set (1956) 371

[74] (With J. L. Walsh) Underpolynomials and infrapolynomials (1957) 397

[79] (With J. L. Walsh) Polynomials of best approximation on a real finite point set, I (1959) 418

[80] (With J. L. Walsh) Polynomials of best approximation on an interval (1959) 433

[85] (With J. L. Walsh) Best approximators within a linear family on an interval (1960) 439

[89] (With J. L. Walsh) Conformal maps of small disks (1961) 448
[91] (With J. L. Walsh) Polynomials of best approximation on an interval, II (1962) 454
[135] (With A. Sharma and E. G. Straus) Averaging Interpolation (1973) 459

Miscellaneous Papers

[31] (With A. Robinson) The characterization of algebraic plane curves (1947) 502
[58] (With W. Wasow) On the approximation of linear elliptic differential equations by difference equations with positive coefficients (1953) 519
[66a] Evaluation of rational functions (1955)
[66b] Evaluation of polynomials (1955) 526
[67] A proof of Hilbert's Nullstellensatz. (1955) 527
