

Contents

Chapter 1	
Introduction	1
Chapter 2	
From Democritus to Pythagoras	8
Chapter 3	
Philosophy of Experience	12
3.1 The Copenhagen Interpretation	17
3.2 Discussion	19
Chapter 4	
Nonseparability	25
4.1 The Lemmas	26
4.2 The Case of Measurements	28
4.3 Considering Pairs	29
4.4 The Basic Theorem	32
4.5 Coming Back to Physics	35
4.6 The Experimental Test	39
4.7 Nonseparability	43
4.8 Indivisibility	48
Chapter 5	
Unkind Artless Interlude	51
5.1 Matter	51
5.2 Objectivity	51
Chapter 6	
Comments on Scientism	55
6.1 Postulate of Physical Realism	57
6.2 Postulate of Strong Objectivity	58
6.3 Postulate of Multitudinism	60

Chapter 7	
Einstein's Objections to the Philosophy of Experience	63
7.1 Einstein's View	65
7.2 A New Criticism from Einstein	68
7.3 The Experimental Verdict	71
Chapter 8	
Other Approaches: Elements for Skepticism	73
Chapter 9	
Veiled Reality	82
9.1 Beyond the Customhouse	83
9.2 Veiled Reality	92
9.3 Empirical Reality	101
Chapter 10	
Myths and Models	105
10.1 Convergences–Divergences	108
10.2 Animism	115
Chapter 11	
Science and Philosophy	121
11.1 The Macroscopic Diversion	122
11.2 The Philosopher's Beeline	129
Chapter 12	
Nonseparability and Counterfactuality	133
12.1 Epistemological Difficulties Concerning the Problem of Defining Dispositional Terms	134
12.2 Link with the Concept of Physical Laws	137
12.3 Connection with Physical Realism as Applied to Objects	138
12.4 Counterfactuality and Separability	138
12.5 Discussion	142
12.6 Nonseparability and New Logics	144
Chapter 13	
Glances	146
Chapter 14	
Conclusions	165

Contents	ix
Appendix I	
Explicit Proof of the Theorem in the Case of Bar-Magnet Pairs	169
Appendix II	171
Glossary	173
References	179
Index	181
