

Contents

1. What Is Meant by Disorders of Articulation?	1
Problems of Classification	1
Historical Aspects	2
Relationship of Articulation to Other Levels of Production	5
Dynamic Nature of Articulation	5
Terms of Reference	7
2. Neurophysiological Aspects of Speech Production	9
Cerebral Dominance	10
Localization	10
Descending Supraspinal Systems	12
The Pyramidal System	12
Corticospinal Tract	14
Corticobulbar Tract	15
Functions of the Pyramidal System	15
Other Descending Pathways	15
Striate Body (Basal Ganglia)	16
The Reticular System. Red Nucleus	18
Cerebellar System	18
The Peripheral Nervous System	22
Transmission	23
The Motor Neurone	23
Feedback	27
Cranial Nerves	28
Presetting of Cortical Mechanisms	32
3. Neurolinguistic Aspects of Speech Production	33
Ideation	34
Execution	34
Linguistic Programming	34
Motor Programming	37

Control	40
Types of Feedback	42
4. Correlation of Dysarthria	47
Classification	48
Spastic Dysarthria	54
Relationship Between Speech and Non Speech Movement	57
Dyskinetic Dysarthria	59
Athetosis	60
Hypokinetic Dysarthria	62
Ataxic Dysarthria	68
Peripheral (Lower Motor Neurone) Dysarthria	70
Mixed Dysarthrias	73
Changes in Speech Production with Advancing Age	74
Conclusion	76
5. Correlates of Verbal Dyspraxia	77
Motor Theory	78
Duality of Dyspraxia	80
Some Features of Dyspraxia	83
Linguistic Features of Dyspraxia	85
Stress and Timing	90
Rhythmicity	92
Sensory Feedback	92
Verbal Comprehension	93
Writing and Drawing	94
Summary	94
6. Management	98
Associated Conditions	101
Investigation and Assessments of Speech	102
Dysarthria	102
Objective Assessments	102
Perceptual Assessment	105
Linguistic Investigation	108
Dyspraxia	108
Intervention	111
Setting and Frequency	111
Groups Versus Individual Therapy	113
Multidisciplinary Involvement	114
Treatment Procedures	115
References	121
Author Index	129
Subject Index	132
