

Contents

Chapter A

| | |
|--|---|
| Introduction | 1 |
| 1 Environmental Pollution | 1 |
| 2 Sources, Pathways and Reservoirs | 1 |
| 3 Aquatic Ecosystems | 2 |

Chapter B

| | |
|--|----|
| Toxic Metals (G. Wittmann) | 3 |
| 1 Metals | 3 |
| 1.1 Classification of the Elements | 3 |
| 1.2 Classification of Metals | 6 |
| 1.3 Trace Metal Species in Aquatic Systems | 7 |
| 2 Trace Metals and Organic Life | 8 |
| 2.1 Trace Elements Essential to Human Life | 9 |
| 2.2 Deficiency and Oversupply | 11 |
| 2.3 Metal Toxicity | 12 |
| 2.4 Health Hazard Due to Certain Trace Elements | 14 |
| 2.5 Accumulation of Toxic Substances in the Aquatic Food Chain | 17 |
| 2.6 Catastrophic Episodes of Metal Poisonings | 18 |
| 2.6.1 Mercury Poisoning | 18 |
| 2.6.2 Cadmium Poisoning | 21 |
| 2.6.3 Lead Poisoning | 23 |
| 2.6.4 Chromium Poisoning | 24 |
| 2.6.5 Arsenic Poisoning | 25 |
| 2.7 Recent Studies on Metal Intoxication | 25 |
| 3 Water Quality Criteria: Standards | 26 |
| 3.1 Introduction | 26 |
| 3.2 Criteria Development | 26 |
| 3.3 Water Quality Criteria | 29 |
| 4 The Sources of Metal Pollution | 30 |
| 4.1 Geologic Weathering | 31 |
| 4.2 Mining Effluents | 33 |
| 4.3 Industrial Effluents | 38 |

| | |
|--|----|
| 4.4 Domestic Effluents and Urban Stormwater Runoff | 43 |
| 4.4.1 Domestic Effluents | 43 |
| 4.4.2 Urban Storm Water Runoff | 44 |
| 4.4.3 Spoil Heaps | 47 |
| 4.5 Metal Inputs from Rural Areas | 48 |
| 4.6 Atmospheric Sources | 49 |
| 4.7 Special Sources | 55 |
| 4.8 Multi-Source Effects | 57 |
| 5 Metal Analysis | 61 |
| 5.1 Media of Pollution Assessment | 62 |
| 5.2 Sampling and Analytic Methods | 68 |
| 5.2.1 Sampling | 68 |
| 5.2.2 Analytic Methods | 68 |

Chapter C

Metal Concentrations in River, Lake, and Ocean Waters (U. Förstner) 71

| | |
|--|-----|
| 1 Distribution of Major Ions | 71 |
| 1.1 Natural Salt Concentrations | 71 |
| 1.2 Man-Made Contamination | 73 |
| 2 Chemical Conditions for Trace Metals in Natural Waters | 73 |
| 2.1 Chemical Speciation in Freshwater and Seawater | 75 |
| 2.1.1 Analysis of Trace Metal Speciation | 75 |
| 2.1.2 Freshwater/Seawater Model | 78 |
| 2.2 Redox Conditions in Natural Waters | 79 |
| 3 Trace Metals in Seawater | 82 |
| 3.1 Natural Distribution | 83 |
| 3.2 Man-Made Effects | 86 |
| 3.2.1 Atmospheric Input of Metals | 88 |
| 3.2.2 Metal Input from Sewage Effluents | 89 |
| 4 Trace Metals in Inland Waters | 90 |
| 4.1 Natural Contents | 90 |
| 4.2 Metal Pollution in River Water: Regional Examples | 93 |
| 4.2.1 Heavy Metal Pollution in United States Water Systems | 93 |
| 4.2.2 Metal Pollution in Inland and Coastal Waters of Great Britain | 96 |
| 4.2.3 Heavy Metals in River Water of the Federal Republic of Germany | 98 |
| 4.2.4 Metals in Waters of the People's Republic of China | 100 |
| 4.2.5 Heavy Metals in River Water of the U.S.S.R. | 102 |
| 4.2.6 Heavy Metals in Waters of Japan | 103 |
| 4.3 Metal Transport in Freshwater Systems | 104 |
| 4.3.1 Water Discharge and Metal Transport | 104 |
| 4.3.2 Annual Cycles of Metal Transport | 106 |

| | |
|---|-----|
| Chapter D | |
| Metal Pollution Assessment from Sediment Analysis (U. Förstner) | 110 |
| 1 Introduction | 110 |
| 1.1 Soluble/Solid Equilibrium | 110 |
| 1.2 Surface Samples and Sediment Cores | 112 |
| 2 Metal Investigations on Aquatic Sediments | 113 |
| 2.1 Sampling and Storage | 114 |
| 2.1.1 Soils and Sediments | 114 |
| 2.1.2 Grab and Sore Samplers | 114 |
| 2.1.3 Bottom Sediment Traps | 115 |
| 2.1.4 Suspended Materials | 115 |
| 2.1.5 Recovery of Pore Waters | 115 |
| 2.1.6 Storage | 115 |
| 2.2 The Mechanical Sediment Analysis | 116 |
| 2.3 Mineralogical Analysis | 116 |
| 2.4 Chemical Analysis of Nutrient Components (C–N–P) | 117 |
| 2.4.1 Determinations of Oxidizable Matter (Organic Carbon) by the Chromic Acid Method | 117 |
| 2.4.2 Determination of Kjeldahl Nitrogen | 117 |
| 2.4.3 Determination of Total Phosphorus | 117 |
| 2.5 Sediment Digestion in Metal Analysis | 118 |
| 2.5.1 Hydrofluoric Acid Decomposition | 118 |
| 2.5.2 Hydrochloric-Nitric Acid (Aqua Regia) Decomposition or Digestion by Nitric Acid | 118 |
| 2.5.3 Lithium Metaborate Fusion (with Simultaneous Determination of Silica) | 118 |
| 2.5.4 Transfer of Solid Suspensions into Graphite Cuvettes | 118 |
| 3 Geochemical Reconnaissance of Aquatic Sediments | 119 |
| 4 Grain-Size Effects | 121 |
| 4.1 Grain-Size Dependencies of Trace Metal Concentrations | 122 |
| 4.2 Reduction of Grain-Size Effects | 124 |
| 4.2.1 Extrapolation from Grain-Size Distribution | 124 |
| 4.2.2 Metal Concentrations vs Surface Area | 126 |
| 4.2.3 Separation of Clay/Silt and Fine Sand Fractions by Sieving | 126 |
| 4.2.4 Separation of the Pelitic Fraction (< 2 μ m) in Settling Tubes | 127 |
| 4.2.5 Treatment with Dilute Acids (Hydrochloric Acid, Nitric Acid) | 128 |
| 4.2.6 Mineral Separation: Quartz Correction Method | 128 |
| 4.2.7 Comparison with “Conservative” Elements | 129 |
| 4.2.8 The Relative Atomic Variations of Elements | 130 |
| 5 Factors Controlling the Distribution of Metals in Aquatic Sediments | 131 |

| | | |
|-------|--|-----|
| 6 | Natural Metal Content—Civilizational Accumulation | 133 |
| 6.1 | Average Shale: Global Standard Value | 133 |
| 6.2 | Fossil Lake Sediments: Standards Regarding Environmental Data | 135 |
| 6.3 | Fossil Fluviatile Deposits: Regional Influences | 135 |
| 6.4 | Short, Dated Sediment Cores: 200 Years of Industrial Development | 136 |
| 6.5 | Recent Lake Deposits in Relatively Unpolluted Areas | 137 |
| 6.6 | Metals in Suspended Matter: Background Values in Storm Water | 137 |
| 6.7 | Background Values and Nonpoint Sources | 138 |
| 7 | Lake Sediments as Indicators of Heavy Metal Pollution | 140 |
| 7.1 | Interference: Geochemical Background and Man's Impact | 140 |
| 7.2 | Metal Pollution in Lake Sediments (Examples) | 143 |
| 7.3 | Metal Contamination Recorded in Dated Sedimentary Cores | 146 |
| 7.4 | Mercury Poisoning of Lakes | 151 |
| 7.4.1 | Sources of Mercury Pollution | 151 |
| 7.4.2 | Swedish Lakes | 152 |
| 7.4.3 | Canadian Lakes: Clay Lake | 153 |
| 7.4.4 | Laurentian Great Lakes | 153 |
| 8 | Metal Pollution in River Sediments | 157 |
| 8.1 | Geochemical Reconnaissance of Mercury | 158 |
| 8.2 | Stream Sediments: a Response to Environmental Contamination | 158 |
| 8.3 | Heavy Metal Enrichment of River Sediments by Man-Made Influences | 163 |
| 9 | Assessing Metal Pollution in the Sea by Sediment Study | 171 |
| 9.1 | Mercury Contamination—Forms of Metal Enrichment in Coastal Sediments | 172 |
| 9.1.1 | Minamata—Industrial Metal Contamination in Japanese Coastal Waters | 172 |
| 9.1.2 | Firth of Clyde—Sewage Sludge Disposal | 174 |
| 9.1.3 | Southern Californian Coast—Sewer Outfalls and Atmospheric Influences | 176 |
| 9.1.4 | New Haven—Unregulated Effluent Discharge | 178 |
| 9.2 | Marine Waste Deposits in the New York Metropolitan Region | 178 |
| 9.3 | Industrial Effluents in New Bedford Harbor, Mass. | 182 |
| 9.4 | Heavy Metal Enrichment in the North Sea, Baltic Sea, and Mediterranean Sea | 184 |
| 9.4.1 | Metal Pollution in the Mediterranean Sea | 184 |
| 9.4.2 | Metal Pollution in the North Sea | 185 |
| 9.4.3 | Metal Contamination of the Baltic Sea | 188 |
| 9.4.4 | Other Restricted Basins—Fjords | 189 |
| 9.5 | Heavy Metal in Estuarine Sediments | 191 |
| 9.5.1 | The Estuarine Environment | 191 |

| | |
|--|------------|
| 9.5.2 The Rhine Estuary | 193 |
| 9.5.3 The Elbe Estuary | 194 |
| 9.5.4 Mixing Processes | 194 |
| Chapter E | |
| Metal Transfer Between Solid and Aqueous Phases (U. Förstner) . . . | 197 |
| 1 Residence Times of Metals in Aquatic Systems | 197 |
| 2 Types of Metal Association in Sediments | 200 |
| 2.1 Classification of Chemical Phases in Sediment | 201 |
| 2.2 Heavy Metals in Detrital Minerals | 201 |
| 2.3 Heavy Metal Precipitation | 203 |
| 2.3.1 Hydroxides | 203 |
| 2.3.2 Sulfides | 205 |
| 2.3.3 Carbonates | 205 |
| 2.4 Cation Exchange and Adsorption | 207 |
| 2.5 Sorption onto Clay Minerals | 210 |
| 2.6 Sorption and Coprecipitation on Hydrous Fe/Mn-Oxides and Fe-Sulfides | 213 |
| 2.6.1 Formation of Hydrous Mn and Fe Oxides | 214 |
| 2.6.2 Sorption of Heavy Metals onto Fe/Mn Oxides | 216 |
| 2.6.3 Coprecipitation of Trace Elements with Iron Sulfides .. | 218 |
| 2.7 Metal Associations with Organic Substances | 220 |
| 2.7.1 Organic Substances in Natural Waters | 221 |
| 2.7.2 Sorption and Complexation of Metals by Humic Substances | 222 |
| 2.7.3 Coagulation and Flocculation of Metal-Organic Matter .. | 223 |
| 2.7.4 Associations of Metal-Organic Compounds to Sediments | 224 |
| 2.8 Sorption of Trace Elements on Carbonates and Phosphates .. | 227 |
| 3 Metal Accumulation in Aquatic Sediments—Interactions and Effects of Various Processes and Sinks | 230 |
| 3.1 Hydroxidic Coatings on Clay Minerals | 230 |
| 3.2 Organic Coatings on Clay Minerals | 232 |
| 3.3 Interactions Between Hydrous Metal Oxides, Organic Substances, Carbonate, and Phosphate | 232 |
| 3.4 Significance of the Different Sinks in Natural Systems | 234 |
| 3.5 Non-Conservative Effects of Trace Metals in Estuaries | 236 |
| 4 Determination of Chemical Phases in Natural and Polluted Sediments | 238 |
| 4.1 Proportion of the Individual Types of Metal Associations in Natural and Polluted Aquatic Sediments | 239 |
| 4.2 Grain Size and Chronological Variations; Phase Concentration Factor | 245 |
| 5 Mobilization of Heavy Metals from Sediments | 247 |

| | | |
|-------|---|-----|
| 5.1 | Saltwater/Sediment Interactions | 247 |
| 5.1.1 | Desorption Experiments | 248 |
| 5.1.2 | Estuary-Sediment Boundary | 249 |
| 5.2 | Redox Changes and Metal Release | 250 |
| 5.2.1 | Chemical Factors Affecting Metal Distribution in Interstitial Water | 252 |
| 5.2.2 | Physical Processes Affecting Metal Release from Pore Water | 254 |
| 5.3 | Metal Release by Acidic Water | 258 |
| 5.3.1 | Acid Mine Drainage | 259 |
| 5.3.2 | Acid Precipitation | 260 |
| 5.4 | Mobilization of Metals by Organic Complexing Agents | 262 |
| 5.5 | Mobilization of Heavy Metals by Microbial Activity | 265 |
| 5.5.1 | Microbial Interactions in Natural Environments | 265 |
| 5.5.2 | Bacterial Leaching of Metals | 266 |
| 5.5.3 | Microbial Action in the Mercury Cycle | 267 |
| 5.5.4 | Bacterial Methylation of Arsenic, Lead, and Selenium | 269 |

Chapter F

| | |
|--|-----|
| Heavy Metals in Aquatic Organisms (F. Prosi) | 271 |
|--|-----|

| | | |
|-------|--|-----|
| 1 | Physico-Chemical Influences on the Toxicity and the Uptake of Heavy Metals with Respect to Organisms | 273 |
| 1.1 | Temperature and Oxygen Content | 273 |
| 1.2 | Water Hardness | 274 |
| 1.3 | Organic Compounds | 276 |
| 1.4 | pH Values | 279 |
| 1.5 | Salinity | 280 |
| 2 | Biologic Factors Affecting Heavy Metal Concentrations in Aquatic Organisms | 281 |
| 2.1 | General Physiologic Behavior | 282 |
| 2.2 | Life Cycle and Life History of the Organism | 282 |
| 2.3 | Seasonal Variations of Metal Content in Organisms | 284 |
| 2.4 | Species-Specific and Individual Variability | 285 |
| 2.5 | Contamination by Food and Intestine Content | 285 |
| 3 | Heavy Metal Enrichment in Limnic and Marine Organisms at Different Trophic Levels | 286 |
| 3.1 | Autotrophic Organisms | 286 |
| 3.1.1 | Phytoplankton | 286 |
| 3.1.2 | Marine Macroalgae | 288 |
| 3.1.3 | Freshwater Algae | 290 |
| 3.1.4 | Mosses | 291 |
| 3.1.5 | Higher Water Plants | 292 |

| | |
|--|-----|
| 3.2 Heterotrophic Organisms | 294 |
| 3.2.1 Zooplankton | 295 |
| 3.2.2 Bivalves | 297 |
| 3.2.3 Higher Marine Crustaceans | 304 |
| 3.2.4 Freshwater Crustaceans | 305 |
| 3.2.5 Marine and Freshwater Fish | 306 |
| 3.3 The Mobilization of Heavy Metals from Sediment by Aquatic Biota | 313 |
| 3.4 Food Chain Enrichment in Aquatic Life | 318 |

Chapter G**Trace Metals in Water Purification Processes**

| | |
|--|-----|
| (U. Förstner and J. H. van Lierde) | 324 |
|--|-----|

| | |
|---|-----|
| 1 Heavy Metal Removal for the Production of Drinking Water | 324 |
| 1.1 Obtaining Water by Bank Filtration | 324 |
| 1.2 Artificial Recharge of Groundwater by Land Spreading and Injection | 327 |
| 1.3 Direct Water Purification by Traditional Physico-Chemical Treatment (PCT) and Related Advanced Methods | 330 |
| 1.3.1 Traditional Removal of Trace Metals by Pre-Clarification, Chlorination, Flocculation, and Filtration | 331 |
| 1.3.2 Heavy Metal Removal by Chemical Precipitation | 333 |
| 1.3.3 Activated Carbon Filtration in Drinking Water Purification | 334 |
| 1.3.4 Heavy Metal Removal by Ion Exchange | 336 |
| 1.3.5 Potential Metal Enrichments in the Water Distribution System | 337 |
| 2 Heavy Metals in Industrial and Domestic Effluents | 340 |
| 2.1 Effluents from the Electroplating Industry | 340 |
| 2.2 Mercury Removal from Chlor-Alkali Plant Effluents | 343 |
| 2.3 Prevention and Control of Acidic Mine Drainage | 344 |
| 2.4 Heavy Metals in Urban Drainage Systems—Biologic Treatment (BT) | 345 |
| 2.4.1 Metal Extraction in the Mechanical (Primary) Sedimentation Unit | 346 |
| 2.4.2 Reduction of Metal Loads in the Biologic Stage | 346 |
| 2.5 Tertiary Physico-Chemical Treatment of Wastewater | 347 |
| 3 Heavy Metals in Sewage Sludges | 352 |
| 3.1 Land Application of Sewage Sludges | 352 |
| 3.2 Impact of Heavy Metals on Groundwater Quality | 355 |
| 3.3 Sewage Sludge Disposal to the Sea | 358 |
| 3.4 Incineration of Sewage Sludge | 359 |

| | |
|---------------------------|-----|
| Chapter H | |
| Concluding Remarks | 360 |
| 1 Disposal Versus Reuse | 363 |
| 2 Alternative Materials | 364 |
| Appendix | 367 |
| References | 399 |
| Subject Index | 475 |
