Introduction: Plate Tectonics and Geology	1
--	----------

Part I Convergent Plate Boundary Environments

Chapter 1 Principal Arcs and Their Associated Metal Deposits	14
1.1 Porphyry-Type Deposits	14
1.1.1 Associated Igneous Rocks	16
1.1.2 Mineralization and Alteration Patterns	17
1.1.3 Fluid Inclusions and Stable Isotopes	18
1.1.4 The El Salvador Porphyry Copper Deposit, Chile	19
1.1.5 Genetic Models for Porphyry Copper Deposits	21
1.1.6 Suggestions for Exploration	22
1.2 Copper-Bearing Breccia Pipes	23
1.2.1 Distribution and Associated Igneous Rocks . .	23
1.2.2 Mineralization and Alteration	23
1.2.3 Formation and Mineralization of Breccia Pipes	24
1.2.4 The Cumobabi Breccia Pipe Deposits, Mexico	26
1.2.5 Suggestions of Exploration	29
1.3 Skarn Deposits	30
1.3.1 Distribution and Associated Igneous Rocks . .	30
1.3.2 Mineralization	31
1.3.3 Genesis of Contact Metasomatic Skarn Deposits	34
1.3.4 Discussion and Suggestions for Exploration . .	36
1.4 Vein Deposits	38
1.4.1 Distribution and Associated Igneous Rocks . .	38
1.4.2 Mineralization and Alteration	39
1.4.3 The Baguio, Philippines and Tayoltita, Mexico Vein Systems	39
1.4.4 Discussion and Suggestions for Exploration . .	46

1.5	Precious Metal Deposits of the Western United States	46
1.5.1	Vein Deposits	46
1.5.2	Carbonate-Replacement Gold Deposits	49
1.5.3	Hot Spring-Type Gold Deposits	53
1.5.4	Discussion	55
1.6	Additional Deposits of Principal Arcs	55
1.6.1	Massive Magnetite Deposits	55
1.6.2	Manto-Type Copper Deposits	56
1.7	Discussion	58

Chapter 2 Metal Deposits on the Inner Sides of Principal Arcs 61

2.1	Contact Metasomatic Deposits	62
2.1.1	Mineralization	62
2.1.2	The Providencia Ag–Pb–Zn–Cu Deposit, Zacatecas, Mexico	66
2.1.3	Discussion and Suggestions for Exploration	68
2.2	Polymetallic Vein Systems	69
2.2.1	The Casapalca Ag–Pb–Zn–Cu Deposit, Peru	70
2.2.2	Discussion and Suggestions for Exploration	72
2.3	Tin-Tungsten Deposits	74
2.3.1	Mineralization	77
2.3.2	The Llallagua Tin Porphyry Deposits, Bolivia	78
2.3.3	Discussion and Suggestions for Exploration	81

Chapter 3 Metal Deposits of Arc-Related Rifts 82

3.1	Climax-Type Porphyry Molybdenum Deposits	83
3.1.1	Mineralization and Alteration Patterns	85
3.1.2	Discussion and Suggestions for Exploration	88
3.2	Additional Lithophile Suite Deposits in Arc-Related Rifts	91
3.3	Kuroko-Type Massive Sulfide Deposits	92
3.3.1	Mineralization and Alteration Patterns	96
3.3.2	Fluid Inclusion and Stable Isotope Data	99

3.3.3	Buchans Polymetallic Sulfide Deposit, Newfoundland	101
3.3.4	Discussion and Suggestions for Exploration . .	105
3.4	Base and Precious Metal Vein Deposits	106
Chapter 4 Additional Aspects of Arc-Related Metallogeny		109
4.1	Metal Deposits Related to Fore-Arc Felsic Magmatism	109
4.2	Paleozoic and Older Porphyry Copper Deposits	110
4.3	Massive Sulfide Deposits of the Caledonides, Scandinavia	112
4.3.1	Similar Massive Sulfide Deposits Elsewhere . .	115
4.4	Massive Sulfide Deposits in Greenstone Belts .	118
4.4.1	The Kidd Creek Massive Sulfide Deposit, Ontario	121
4.4.2	Discussion and Suggestions for Exploration . .	123
4.5	Additional Aspects of Greenstone Belt Metallogeny	124
4.6	Gold Deposits in Greenstone Belts	128
4.6.1	The Homestake Gold Mine, South Dakota . .	129
4.6.2	Discussion and Suggestions for Exploration . .	132
4.7	Overview of Arc-Related Metallogeny	132
4.7.1	Relation of Arc Metallogeny to Subduction Style	132
 Part II Divergent Plate Boundary Environments		
Chapter 5 Metallogeny of Oceanic-Type Crust		138
5.1	Generation of Oceanic-Type Crust	138
5.2	Contemporary Mineralization at Oceanic Spreading Ridges	141
5.2.1	The Salton Sea Geothermal System	143
5.3	Massive Sulfide Deposits of the Troodos Ophiolite, Cyprus	144
5.4	Additional Examples of Cyprus-Type Massive Sulfide Deposits	147

5.5	Discussion	150
5.6	Chromite Deposits in Ophiolite Complexes . . .	151
5.6.1	The Chromite Deposits of the Vourinos Complex, Greece	155
5.6.2	The Chromite Deposits of Selukwe, Zimbabwe . .	155
5.7	Additional Minor Mineralization in Ophiolite Complexes	156
Chapter 6 Intracontinental Hotspots, Anorogenic Magmatism, and Associated Metal Deposits		158
6.1	Tin Deposits Associated with Anorogenic Granites	159
6.2	Iron-Titanium Deposits Associated with Anorthosites	163
6.3	Hotspot-Related Layered Mafic Complexes and Associated Ores	166
6.3.1	The Geology and Ores of the Bushveld Igneous Complex, South Africa	167
6.3.2	The Platinum Deposits of the Stillwater Complex, Montana	170
6.3.3	The Copper-Nickel Ores of the Sudbury Irruptive, Ontario, Canada	171
6.3.4	Discussion	173
6.4	Metal Deposits Related to Carbonatites	173
6.5	Afterword	176
Chapter 7 Metal Deposits Associated with the Early Stages of Continental Rifting		177
7.1	General Considerations	177
7.2	Hydrothermal Copper Deposits	180
7.2.1	The Messina Copper Deposits, South Africa . .	180
7.2.2	Discussion	184
7.3	Rift-Related Molybdenum Deposits	185
7.4	Rift-Related Stratiform Copper Deposits . . .	187
7.4.1	Lithologic Setting	187
7.4.2	Mineralization	189

7.4.3 Ores of the Zambian Copper Belt	189
7.4.4 Discussion and Suggestions for Exploration . . .	195
7.5 Rift-Related Magmatic Copper-Nickel Deposits . . .	197
7.5.1 Copper-Nickel Deposits of the Noril'sk-Talnakh Region, U.S.S.R.	198
7.5.2 Discussion	198
7.6 Carbonate-Hosted Lead-Zinc Deposits in Relation to Rifting	201
7.6.1 Mississippi Valley-Type Deposits	201
7.6.2 Alpine-Type Lead-Zinc Deposits	207
7.6.3 Irish-Type Lead-Zinc Deposits	208
7.6.4 Discussion and Suggestions for Exploration . . .	211

Chapter 8 Metal Deposits Related to Advanced Stages of Rifting 213

8.1 General Observations	213
8.2 Metalliferous Deposits of the Red Sea	214
8.2.1 Metalliferous Deposits of the Atlantis II Deep . . .	215
8.2.2 Discussion	217
8.3 Sediment-Hosted Massive Sulfide Deposits . . .	219
8.3.1 Settings of Sediment-Hosted Massive Sulfide Deposits	219
8.3.2 Mineralization	222
8.3.3 The Sullivan Massive Sulfide Deposit	223
8.3.4 Discussion and Suggestions for Exploration . . .	225
8.4 Volcanic-Hosted Massive Sulfide Deposits . . .	226
8.4.1 Massive Sulfide Deposits of the Bathurst- Newcastle District, New Brunswick, Canada . . .	228
8.4.2 Discussion	231
8.5 Massive Sulfide Deposits in High-Grade Metamorphic Terrains	233
8.6 Additional Facets of Rift-Related Metallogeny . . .	237
8.6.1 Early Proterozoic Uraniferous Conglomerates and Rifting	241
8.6.2 Major Occurrences of Banded Iron Formation in Relation to Rifting Events	242

8.7	Metallogenesis and Rifting – Some Final Thoughts	243
-----	---	-----

Part III Collisional Environments and Other Matters

Chapter 9 Metal Deposits in Relation to Collision

	Events	246
9.1	Ophiolite-Hosted Metal Deposits	251
9.2	Tin-Tungsten Deposits Associated with Collisional Granites	252
9.2.1	Mineralization	255
9.2.2	The Panasqueira Tin-Tungsten Deposits, Northern Portugal	255
9.2.3	Discussion and Suggestions for Exploration	259
9.3	Uranium Deposits Associated with Collision Granites	260
9.3.1	The Rossing Uranium Deposit, Namibia	264
9.3.2	Discussion and Suggestions for Exploration	266
9.4	Additional Examples of Collision-Related Terrains and Metallogenic Implications	266
9.5	Metallogenesis and Collision Events – Some Final Thoughts	269

Chapter 10 Metal Deposits and Plate Tectonics –

	an Attempt at Perspective	270
10.1	Lineaments and Metal Deposits	270
10.2	Transform Faults and Metal Deposits	271
10.3	Plate Tectonics and Metal Deposits of Surficial Origin	274
10.4	An Enigmatic Class of Uranium Deposits	275
10.5	Metal Deposits and Plate Tectonics: Time-Space Perspectives	279
10.6	Metal Deposits and Plate Tectonics: Exploration Perspectives	280
	Afterword	281
	References	282
	Subject Index	317
