

Table of Contents

<i>W. Steinbrunn and P. R. Lichtlen</i> Prognosis of Patients with Coronary Heart Disease Evaluated Using Data Obtained by Invasive Methods	1
<i>R. A. Bruce</i> Prognosis of Coronary Heart Disease Patients Evaluated by Data Obtained by Noninvasive Methods	16
<i>K. Bachmann, W. Niederer, H. Fuchs, and H. Holzberger</i> Prognosis of Coronary Heart Disease Patients Evaluated by Data Obtained by Invasive and Noninvasive Methods	24
<i>R. Balcon, M. Cattell, and K. Wong</i> Prognosis of Coronary Heart Disease Patients Evaluated by Data Obtained by Angiography and Exercise Testing	36
<i>M. Kaltenbach and W.-D. Bussmann</i> Prognostic Relevance of Findings from Invasive and Noninvasive Investigations in Coronary Heart Disease Patients	44
<i>H. Gohlke, L. Samek, P. Betz, and H. Roskamm</i> Prognostic Relevance of Invasive and Noninvasive Data in Angiographically Defined Subgroups of Coronary Heart Disease Patients	54
<i>V. F. Froelicher</i> Angiographic Findings and Prognosis in Asymptomatic Men with Rest and Exercise Electrocardiographic Abnormalities	67
<i>J. S. Borer, J. Wallis, J. Holmes, H. L. Goldberg, J. W. Moses, and J. Fisher</i> Prognostication in the Patient with Coronary Artery Disease: Preliminary Results of Radionuclide Cineangiographic Studies	91
<i>F. M. Weld, J. T. Bigger, jr., J. Coronilas, L. M. Rolnitzky, and W. E. DeTurk</i> The Prognostic Significance of Ventricular Arrhythmias After Acute Myocardial Infarction: Is It Independent of Left Ventricular Function? .	95

<i>G. Breithardt, M. Borggrefe, and L. Seipel</i> Significance of Late Ventricular Potentials for the Identification of Patients at Risk of Sudden Death or Ventricular Tachycardia After Acute Myocardial Infarction	102
<i>W. C. Sheldon, W. L. Proudfit, A. V. G. Bruschke, and J. S. Lim</i> Prognosis in Patients with Mild Coronary Atherosclerosis	111
<i>G. G. Gensini</i> Prognosis of Patients with Normal Coronary Arteries at Middle Age . .	118
<i>J. Jehle, M. Heerdt, P. Spiller, A. Krian, and F. Loogen</i> Follow-Up of Patients with Left Ventricular Aneurysm and Nonsurgical Therapy	123
<i>M. Stolte, D. Wittek, and B. Braun</i> Progression and Regression of Coronary Arteriosclerosis – A Pathologist's Point of View	130
<i>J. R. Kramer, H. Kitazume, W. L. Proudfit, Y. Matsuda, G. W. Williams, and F. M. Sones, jr.</i> Progression of Coronary Atherosclerosis in Nonoperated Patients: Relation to Risk Factors	137
<i>P. Stürzenhofecker, K. Peters, E. Steinmann, P. Betz, and H. Roskamm</i> Progression of Coronary Arteriosclerosis in Nonoperated Patients	141
<i>M. G. Bourassa, M. Enjalbert, L. Campeau, and J. Lespérance</i> Progression of Coronary Artery Disease Between 10 and 12 Years After Coronary Artery Bypass Graft Surgery	150
<i>R. W. Brower, P. W. Serruys, and P. G. Hugenholtz</i> Progression and Regression of Disease in the Native Coronary Circulation and Bypass Graft Surgery	157
<i>R. T. Palac, M. H. Hwang, W. R. Meadows, H. S. Loeb, C. Gohlke-Bärwolf, R. Pifarre, and R. M. Gunnar</i> The Influence of Medical and Surgical Therapy on Progression of Coronary Artery Disease – Insights From a Randomized Study	165
<i>M. H. Frick, M. Valle, and P.-T. Harjola</i> Progression of Coronary Artery Disease: A Prospective Angiographic Study of Medical and Surgical Patients	177
<i>W. Rafflenbeul, S. Peters, M. Kreft, and P. R. Lichtlen</i> Quantitative Coronary Angiography: Progression and Regression of Coronary Artery Disease Over 3–5 Year Intervals	184

W. Wijns, P. W. Serruys, M. van den Brand, H. Suryapranata,

C. J. Kooijman, J. H. C. Reiber, and P. G. Hugenholtz

Progression to Complete Coronary Obstruction Without Myocardial
Infarction in Patients Who Are Candidates for Percutaneous Transluminal
Angioplasty: A 90-Day Angiographic Follow-Up 190

V. Kallio

The Influence of Physical Rehabilitation and Risk-Factor Control on
Long-Term Prognosis of Postinfarction Patients 196

Å. Hjalmarson and L. Wilhelmsen

The Influence of Beta-Blockers on Long-Term Prognosis in Postinfarction
Patients 207

C. R. Klimt and S. A. Forman

Secondary Prevention of Myocardial Infarction with Antiplatelet Drugs . 218

E. A. Loeliger

Oral Anticoagulants and/or Aspirin 223

J. F. Hansen

The Influence of Verapamil Treatment During Acute Myocardial
Infarction on Long-Term Prognosis 231

W.-D. Bussmann

The Possible Influence of Nitrates on Prognosis in Patients with Coronary
Heart Disease 232

E. Varnauskas

Selection of Patients for Coronary Bypass Surgery 239

Subject Index 246
