

Contents

CHAPTER 1	
Comparative Physiology of Invertebrates: Hearing and Vision. H. AUTRUM	
With 9 Figures	1
CHAPTER 2	
The Development of Auditory Neurophysiology. H. DAVIS	
With 10 Figures	25
CHAPTER 3	
Microstructure of the Inner Ear. H. ENGSTRÖM	
With 19 Figures	65
CHAPTER 4	
Biophysics of the Mammalian Ear. J. J. ZWISLOCKI	
With 24 Figures	109
CHAPTER 5	
Neurophysiology of the Retina. T. TOMITA	
With 15 Figures	151
CHAPTER 6	
Recollections of Early Laboratory Experiments on Vision. L. R. RIGGS	
With 8 Figures	191
CHAPTER 7	
The Perception of Light and Colour. W. D. WRIGHT	
With 6 Figures	229
CHAPTER 8	
Binocular Vision. G. A. FRY	
With 12 Figures	259

CHAPTER 9

Optics and Vision. G. A. FRY
With 15 Figures 279

CHAPTER 10

A Personal Vision. R. GRANIT 309

CHAPTER 11

Taste Electrophysiology, Sensory Coding, and Behavior. C. PFAFFMANN
With 4 Figures 325

CHAPTER 12

A Personalized History of Taste Biophysics. L. M. BEIDLER
With 4 Figures 351

CHAPTER 13

Insect Olfaction – Our Research Endeavour. D. SCHNEIDER
With 17 Figures 381

CHAPTER 14

Cutaneous Temperature Sensitivity. D. R. KENSHALO
With 19 Figures 419

CHAPTER 15

The Sensory Detection of Vibrations. W. D. KEIDEL
With 29 Figures 465

CHAPTER 16

Fifty Years of Vestibular Science. O. LOWENSTEIN 513
