

LIST OF FIGURES	IX
LIST OF TABLES	XVII
CHAPTER 1. INTRODUCTION	1
References	18
2. OBJECTIVES AND SCOPE	19
3. HISTORY OF GAS PRODUCER ENGINE SYSTEMS	22
Introduction	22
History	22
References	42
4. LITERATURE REVIEW	46
References	49
5. CHEMISTRY OF GASIFICATION OF RICE HULLS	50
Introduction	50
Formation Reactions	51
Reaction Zones	53
Model I	58
Example	62
Computer Program	64
Analysis of the Results	73
Influence of the Moisture Content	73
Higher Heating Values of the Computed Gas Compositions	76
Summary for Model I	77
Modell II	79
Species Concentration Equation	81
The Energy Equation	86
Flame Temperatures of Producer Gas	87
Computer Program	88
Comparison of Theoretical Results and Experimental Data	94

List of Symbols	96
References	98
6. PHYSICAL PROPERTIES OF RICE HULLS	99
Densities	99
Introduction	99
Phase Fractions	110
Surface Area of Loose Rice Hulls and Rice Hull Pellets	111
Determination of $A_{\beta\sigma}$ for rice hulls	112
Apparent Surface $A_{\beta\sigma}$ of Pellets	115
Weight of a Single Rice Hull	115
Accuracy of the Results	116
Caking and Slagging Behavior of Rice Hulls	118
Slagging of Rice Hull Ash	121
Cause of Slagging	126
Caking of Rice Hulls and Pellets	130
Summary	130
Pressure Drop in a Rice Hull Fuel Bed and Superficial Velocities	132
Experimental Set Up and Results	133
Discussion of the Results	134
Theoretical Treatment of the Pressure Drop in a Rice Hull Fuel Bed	138
Size Distribution of Rice Hulls and Rice Hull Char	141
List of Symbols	144
References	146
7. PHYSICAL APPEARANCE OF RICE HULLS UNDER THERMAL DECOMPOSITION	148
Introduction	148
Micrographs of Rice Hulls Before Thermal Decomposition	148
Micrographs of Rice Hulls After Thermal Decomposition	151
Size Reduction of Pelletized Rice Hulls	156
Summary	159
8. LOW TEMPERATURE ENERGY CONVERSION OF RICE HULLS	160
Introduction	160

Products of Pyrolysis	161
Mechanism of Pyrolysis	165
Pyrolysis Experiments in a Pure Nitrogen Atmosphere	169
Heat-up Period for a Single Rice Hull	170
Experimental Set Up and Procedures	172
Discussion of the Experimental Results	174
Composition of the Gas Phase	174
Ultimate Elemental Analysis of Rice Hulls and Char as Function of Temperature	175
Weight Fractions of Char, Gas, Tar and Water	177
Energy Balance	178
Summary	182
References	183
 9. TAR CRACKING IN A RICE HULL AND RICE HULL PELLET FUEL BED	 184
Introduction	184
Tar Conversion in a Downdraft Gas Producer	184
Mechanism of Tar Conversion	186
Design Criteria for Tar Cracking in Past Downdraft Gas Producers	187
Experimental Set Up	192
Cases Tested	192
Test Material	194
Charred Fuel Bed	195
Filter Train	195
Tar Injection	196
Results and Discussion	197
Water Dissociation in a Hot Rice Hull Char Bed	199
Example	202
Experimental Set up and Procedure	203
Results	205
Summary	210
List of Symbols	211
References	212

10. DESIGN CONSIDERATIONS FOR A RICE HULL GAS PRODUCER	213
Introduction	213
Italian Balestra Type Updraft Rice Hull Gas Producer (1910 - 1944)	216
Chinese Rice Hull Gas Producer	221
Design Considerations for Ash Removal Systems	224
Ash Removal Designs	226
Summary	237
Design Considerations for the Gas Exit	237
Air Injection Designs	243
Design of a Small (2 - 20 hp) Rice Hull Gas Producer	246
Open Core Gas Producer	256
Mode of Operation	258
Gas Cleaning Train	278
Sieve Plate Scrubber and Dry Packed Bed Filter	280
Experimental Procedures and Results	284
Summary	295
List of Symbols	296
References	298
