Preface *xi*

1	Concepts of Biomedical Engineering	1
1.1	Introduction	1
1.2	Frontiers in Biomedical Engineering	1
1.3	Impact of Biomedical Engineering	9
1.3.1	Target Drug Delivery	10
1.3.2	Early Stage Detection	10
1.3.3	Personalized Medicine	11
1.4	General Applications of Biomedical Engineering	11
1.4.1	Pharmaceutic	11
1.4.2	Medicine	12
1.4.3	Consumer Goods	12
1.5	Summary and Challenges	12
	References	13
2	Biomaterials	23
2.1	Introduction	23
2.2	Biomedical Materials	24
2.3	Biomaterials in Medicine	28
2.3.1	Gelatin	29
2.3.2	Pectin	30
2.3.3	Chitosan	31
2.3.4	Cyclodextrins (CD)	33
2.3.5	Dextran: Dextran-Spermine	33
2.3.6	Miscellaneous Polysaccharide Polymers	35
2.3.6.1	Pullulan	35
2.3.6.2	Schizophyllan	35
2.3.6.3	Alginate Acid	35
2.3.6.4	Hydroxypropyl Cellulose	37
2.3.6.5	Glycosaminoglycans	37
	References	41

3	Recent Advances and Applications of Hydrogels in Medicine	47
3.1	Introduction	47
3.2	Glucose-Responsive Hydrogels	54
3.2.1	Glucose Oxidase Hydrogels	54
3.2.2	Con A Hydrogels	56
3.2.3	Phenylboronic Acid Hydrogels	58
3.2.3.1	Hydrogel Swelling	59
3.2.3.2	Hydrogel Shrinking	60
3.2.3.3	Microgels and Nanogels	63
3.2.3.4	Multilayer Hydrogel Films	67
3.3	Protein-Responsive Hydrogels	68
3.3.1	Enzyme-Responsive Hydrogels	68
3.3.1.1	Formation of Enzyme-Responsive Hydrogels	69
3.3.1.2	Hydrogel Degradation	71
3.3.1.3	Hydrogel Swelling	73
3.3.1.4	Supramolecular Hydrogels	73
3.3.2	Antigen-Responsive Hydrogels	78
3.4	Nucleic Acid-Responsive Hydrogels	80
3.4.1	RNA-Responsive Hydrogels	80
3.4.2	DNA-Responsive Hydrogels	80
3.4.3	Aptamer-Responsive Hydrogels	81
3.4.4	PNA-Responsive Hydrogels	82
3.5	Future Prospects	83
	References	84
4	Self-Assembled Nanomaterials	95
4.1	Introduction	95
4.2	Classification of Self-Assembled Systems	98
4.2.1	Proteins and Peptides	98
4.2.2	Self-Assembly of Proteins and Peptides	99
4.2.3	Amphiphilic and Surfactant-like Peptides	100
4.2.4	Three-Dimensional Peptides Matrix	100
4.3	<i>In Vitro</i> Biological Approaches of Self-Assembled Systems	101
4.3.1	Antimicrobial Activities	101
4.3.2	Three-Dimensional Cell Culture	102
4.3.3	Self-Assembled Systems in Drug Delivery	104
4.3.4	Stabilization of Membrane Proteins	108
4.4	Future Prospects	109
	References	110
5	Cytotoxicity of Materials	115
5.1	Introduction	115
5.2	Mechanism of Toxicity	116
5.2.1	Oxidative Stress	116

5.2.2	Cell Death Mechanisms	118
5.2.2.1	Apoptosis	118
5.2.2.2	Autophagy	119
5.2.2.3	Necrosis	120
5.2.3	Genotoxicity	121
5.2.4	Immune Response	122
5.3	Toxicity Assessment of Nanomaterials	123
5.3.1	<i>In Vitro</i> Characterization	123
5.3.1.1	Scanning Electron Microscopy	123
5.3.1.2	Transmission Electron Microscopy	124
5.3.1.3	Atomic Force Microscopy	124
5.3.1.4	Confocal Laser Scanning Microscopy	125
5.3.1.5	Dark-Field Microscopy	126
5.3.1.6	Light-Scattering Microscopy	126
5.3.2	<i>In Vitro</i> Cell-Based Cytotoxicity Assay	127
5.3.2.1	Cell Viability Assays	127
5.3.2.2	Cell Cytotoxicity Assays	128
5.3.3	Validity of <i>In Vitro</i> Assays	129
5.3.4	<i>In Silico</i> Assay	130
5.3.5	<i>In Vivo</i> Studies	130
5.3.5.1	Blood Circulation	131
5.3.5.2	Pharmacokinetics	132
5.4	Physicochemical Properties of NPs Affecting Toxicity	138
5.4.1	Effect of Size	138
5.4.2	Effect of Shape	140
5.4.3	Effect of Surface Charge	141
5.5	Future Prospects	143
	References	144
6	Drug-Delivery Technology	163
6.1	Introduction	163
6.2	Biodegradable Polymers in Drug Delivery	164
6.2.1	Gene Delivery	164
6.2.2	siRNA Delivery	166
6.3	Target Drug Delivery	167
6.3.1	Target Therapy in Cells	167
6.4	Drug Delivery in Imaging Technology	169
6.4.1	MRI Technology	169
6.4.2	Ultrasound Technology	169
6.5	Summary and Challenges	170
	References	171
7	Early Stage Detection Technology	175
7.1	Introduction	175
7.2	Three-Dimensional (3D) Materials for Biological Application	176

7.3	Current Approaches of Nanofabrication by Using Lithography	178
7.4	Future Approaches	181
	References	184
8	Regenerative Medicine	187
8.1	Introduction	187
8.2	Tissue-Engineered Scaffolds	188
8.3	Specific Mediated Biomaterials	191
8.3.1	Self-Assembled Systems in Regenerative Medicine Therapy	193
8.3.2	Cartilage Regeneration and Biomineralization in Self-Assembled Systems	193
8.3.3	Angiogenesis in Self-Assembled Systems	194
8.3.4	Bone Regeneration in Self-Assembled Systems	197
8.3.5	Nerve Regeneration in Self-Assembled Systems	198
8.3.6	Cardiac Regeneration in Self-Assembled Systems	199
8.3.7	Tooth Regeneration in Self-Assembled Systems	200
8.3.8	Soft Tissue Regeneration in Self-Assembled Systems	201
8.3.9	Other Forms of Self-Assembled Systems in Regenerative Medicine Therapy	202
8.4	Future Prospects	203
	References	204
9	Nanobiotechnology	209
9.1	Introduction	209
9.2	Classification of Nanomaterials	210
9.2.1	Polymeric NPs	211
9.2.1.1	Dendrimers	212
9.2.1.2	Polymeric Micelles	212
9.2.1.3	Polycationic NPs	213
9.2.2	Lipid NPs	213
9.2.3	Magnetic NPs	214
9.2.4	Gold NPs	215
9.2.5	Silica NPs	217
9.2.6	Quantum Dots	218
9.2.7	Carbon Nanomaterials	219
9.2.7.1	Carbon Dots	220
9.2.7.2	Nanodiamonds	221
9.2.8	Nanofibers	221
9.2.9	Nanowires	222
9.2.10	Nanorods	225
9.2.11	Self-assembly of Proteins and Peptides	227
	References	229

10	3D <i>In Vitro</i> Systems	255
10.1	Introduction	255
10.2	Conventional 3D Technology	255
10.3	Advanced Techniques to Create 3D Systems	261
10.4	High-Throughput Screening (HTS) Technologies	262
10.5	Development of 3D <i>In Vitro</i> Cell Culture Technology	263
10.6	Future Prospects	263
	References	265
11	Frontiers in Biomedical Engineering	267
11.1	Introduction	267
11.2	Personalized Medicine	268
11.3	Intelligent Biomaterials	268
11.4	Artificial Intelligence (AI)	270
11.4.1	AI in Document Processing	272
11.5	Quality Assurance Statement of Biomaterials	272
11.6	Environmental, Health, and Safety Issues of Materials	273
11.7	Biohazard of Materials	274
11.8	Limitations of Materials in Medicine	275
11.9	Clinically Approved Biomaterials	277
11.10	Future Prospects	281
	References	282
	Index	295
