

Index

Page numbers in *italics* refer to illustrations; those in **bold** refer to tables

a

accessory canals 56–57, 57
 Acute Defect Model 107, **111**
 Acute/Chronic Defect Model 107–108, **111–112, 115–116**
 air-polishing devices 195–196
 allograft 48–49
 alveolar ridge preservation 212–213
 amoxicillin 197–199
 animal models of regenerative furcation therapy 105–128
 available models 105–106
 dog 106
 miniature pig 106
 primates 106
 class II defects 110–117
 bone grafts 110–113
 cell therapy 114–117
 enamel matrix proteins 113–114
 growth factors 114, **115–116**
 guided tissue regeneration 110–113
 class III defects 117–124
 bone grafts 117–119
 cell therapy 124
 enamel matrix proteins 119–120, *121, 122, 123*
 growth factors 120–124
 guided tissue regeneration 117, **118–119**
 defect types 106–108
 critical size defect concept 108–110
 experimentally induced defects 107–108

 naturally occurring periodontitis 107, **111–112**
 ethical codes 127
 limitations 125–127
 antimicrobial treatment
 local 196–197, *198*
 systemic 197–199
 antiseptic treatment 196
 apical foramina 57–58

b

barrier membranes *see* guided tissue regeneration (GTR)
 bifurcation ridges 4–5, 4
 bite test 72
 bone grafts 48–49
 animal models 110–113, 117–119
 combined with enamel matrix derivative 147–148
 combined with guided tissue regeneration 139–144, **145**
 bone loss 232–233, 238
 implant positioning and 212–213
 bone morphogenetic proteins (BMPs), animal models 114, 121
 bone quality 211
 bone resorption 64

c

caries, after furcation tunnelling 185, *188, 237*
 cavity test 76
 cell therapy, animal models 114–116, 124, 125

cemento-enamel junction (CEJ) 5
 cervical enamel projections (CEPs) 6–8, 7, 8,
 48, 50
 classification 6
 Chronic Defect Model 107, **112**
 clinical diagnosis 15–22, 23
 examination 72
 reproducibility and validity 22
see also diagnosis
 cone-beam computed tomography
 (CBCT) 26–28, 26, 270
 costs
 cost-effectiveness studies 230,
 239–242, 241
 cost-of-disease studies 230
 cost-utility analyses 230
 cost–benefit analysis 230
 furcation involvement costs 231–239,
234–237

 cracked tooth syndrome 58
 cracked tooth testing 73
 critical size defect (CSD) 108–110
 curettes 39, 45, 46

d

debridement 34, 39–45, 46
 effectiveness studies 40–45, **41–44**
 healing after 33–34
 imperfect 34
 longitudinal studies 34–38, **35–37**
 open flap 48–49, 50
 versus guided tissue regeneration 139,
140–142
 versus non-surgical closed
 debridement 40
 dental floss 47
 dentine tubules 55–56
 diagnosis 71–77, 269–271
 algorithm 270, 270
 case examples 257, 262–263, **262**
 clinical 15–22, 23, 72
 pre-surgical 161–162
 radiographic 22–28, 25, 26, 73, 74,
 162, 269
 reproducibility and validity 22
 differential diagnosis **271**
 digital subtraction radiography (DSR)
 25, 25

disease progression 91–92
 documentation 22, 24

e

economic aspects *see* health economic
 aspects
 enamel matrix derivative (EMD)
 animal models 113–114, 119–120, *121*,
122, *123*, *125*
 degree II furcation defects 144–148,
 273, 274
 combination therapy 147–148
 mandibular molars 144–146, 147
 maxillary molars 146–147, 148
 versus guided tissue regeneration
 144–146, **147**
 degree III furcation defects 149
 regenerative periodontal surgery 150
 enamel pearls 8–9, 8, 9
 endodontic-periodontal disease
 bacteria involved 59
 classification 63–71
 primary endodontic lesion 64, 65, **65**, 66
 primary endodontic lesion with
 secondary periodontal
 involvement 66–68, **68**
 primary periodontal lesion 64–66, **67**
 primary periodontal lesion with
 secondary endodontic
 involvement 68–70, **69**
 true combined lesion 70–71, **71**, 72, 78
 diagnosis of *see* diagnosis
 effect on pulp tissue 60–63, **61–62**
 endodontically treated teeth 77–78
 management 77

 EuroQol Questionnaire 250

f

fibroblast growth factor (FGF), animal
 models 114, 120–121
 fistula tracking 73
 fistulous sinus track 73, 73
 furcation probes 16–17, *16*, 269
 furcation ridges 4–5, 4
 furcation tunnelling 177–185, *178*
 caries after 185, *188*, 237
 case examples 260, 261, **261**, 264
 degree II furcation defects 273–274, 276

degree III furcation defects 277, 278, 279
 follow-up studies **186–187**
 indications 177–179
 maintenance phase 185
 oral hygiene in the furcation 182–184, 183
 double tunnels 183–184, 184
 patient selection 179
 postoperative follow-up 182–183
 pulp reaction 184–185
 tunnelling procedure 179–182, 180,
 181, 182
 upper first premolar 184, 185

g

gingivectomy 179, 180
 gingivitis 10, 33
 Gracey curettes 39, 45, 46
 case examples 258, 263
 growth factors, animal models 114, **115–116**,
 120–124
 guided tissue regeneration (GTR) 79,
 109, 273
 animal models 109, 110–113, 117,
 124–125
 bone grafts and GTR 110–113
 degree II furcation defects 138–144
 animal models 110–113
 combination therapy 139–144, **145**
 long-term results 144
 non-resorbable versus biodegradable
 barrier membranes 139, **143**
 versus enamel matrix derivative
 144–146, **147**
 versus open-flap debridement 139,
 140–142
 degree III furcation defects 148–149
 animal models 117
 mandibular molars 149
 maxillary molars 149
 regenerative periodontal surgery 150
