SISTEMI DINAMICI E TEOREMI ERGODICI

P.R. Halmos:	Entropy in ergodic theory	1
E. Hopf:	Some topics of ergodic theory	47
J. Massera:	Les equations différentielles linéaires dans les espaces de Banach	113
L. Amerio:	Funzioni quasi-periodiche astratte e problemi di propagazione.	133
L. Markus:	Sistemi dinamici con stabilità strutturale	149
G. Prodi:	Teoremi ergodici per le equazioni della idrodinamica	159
A. N. Feldzamen:	The Alexandra Ionescu Tulcea proof of Mcmillan's theorem	179

CONTENTS

PREFACE

CHAPTER I. CONDITIONAL EXPECTATION

- Section 1. Definition
- Section 2. Examples
- Section 3. Algebraic properties
- Section 4. Dominated convergence
- Section 5. Conditional probability
- Section 6. Jensen's inequality
- Section 7. Transformations
- Section 8. Lattice properties
- Section 9. Finite fields
- Section 10. The martingale theorem

CHAPTER II. INFORMATION

- Section 11. Motivation
- Section 12. Definition
- Section 13. Transformations
- Section 14. Information zero.
- Section 15. Additivity
- Section 16. Finite additivity
- Section 17. Convergence
- Section 18. McMillan's theorem

CHAPTER III. ENTROPY

- Section 19. Definition
- Section 20. Transformations
- Section 21. Entropy zero
- Section 22. Concavity

Section 23. Additivity

Section 24. Finite additivity

Section 25. Convergence

CHAPTER IV. APPLICATION

Section 26. Relative entropy

Section 27. Elementary properties

Section 28. Strong monotony

Section 29. Algebraic properties

Section 30. Entropy

Section 31. Generated fields

Section 32. Examples
