

Table of Contents

Hyperactivity of Sympathetic Innervation: A Common Factor in Disease
(Irvin M. Korr) 1

Pain Physiology as a Neurological Model for Manipulation
(Scott Haldeman) 9

The Respiratory-Circulatory Model: Concepts and Applications
(Fred L. Mitchell, Jr.) 19

Biomechanics Modeling and Concepts (Robert William Little) 34

Human Behavior: The Influence of Perceptions on Neuromuscular
Problem Solving (Robert C. Ward) 37

Stereoradiographic Measurement and Analysis of Three-Dimensional
Body Movement (Herbert M. Reynolds) 42

Mechanical Behavior of Connective Tissue (Robert P. Hubbard) 47

Kinematic and Myoelectric Analysis of Symmetric and Asymmetric
Cervical Function (Joseph Vorro) 55

Structural and Functional Concepts of Cranio-Sacral Mechanisms
(Ernest W. Retzlaff) 58

The Cranio-Sacral System: Clinical Applications and Research
(John E. Upledger) 66

Somatic Dysfunction: Palpable Findings and Conceptual Models
(William L. Johnston) 71

Structural Diagnosis and Manipulative Management of Patients with
Chronic Obstructive Pulmonary Disease: Development of a Model
Protocol (John P. Goodridge) 78

Randomized Clinical Trials in the Validation of Cervical and Lumbar
Manipulation (M.H. Branson, A.A. Buerger) 90

Peripheral Sensory Problems (Robert E. Kappler)	106
The Theory of Joint Play: Distance and Coherence (H.D. Wolff)	108
Diagnosis and Treatment of Pelvic Girdle Lesions (H.D. Neumann) . . .	111
Subject Index	119
