

Contents

1. Elements of Potential Scattering Theory	1
1.1 The Möller Wave Operator	1
1.2 The Cross Section	6
1.3 Resolvent Operators and Green's Functions	11
1.4 Asymptotic Behaviour of the Scattering Wave Function	15
1.5 The S -, T -, and K -Matrices	20
1.6 S -Matrix Pole Trajectories	27
1.7 Criteria for Divergence or Convergence of the Neumann Series ..	34
2. Scattering Theory for the Two-Nucleon System	40
2.1 Density Matrices for the Initial and Final State	40
2.2 The General Spin Observable	43
2.3 The Wolfenstein Parametrisation of the Scattering Amplitude ..	44
2.4 Examples for Spin Observables	49
2.4.1 Polarisation	50
2.4.2 Asymmetry	51
2.4.3 Depolarisation	52
2.4.4 Spin Correlation Parameters	55
2.5 Partial-Wave Decomposition	57
2.6 Standard S -Matrix Representations	63
2.7 Numerical Methods	69
2.7.1 Coordinate Space	69
2.7.2 Momentum Space	72
2.7.3 Padé Method	76
3. Three Interacting Particles	83
3.1 Channels	83
3.2 The Fundamental Set of Lippmann-Schwinger Equations	86
3.3 Faddeev Equations and Other Coupling Schemes	96
3.3.1 Faddeev Equations	96
3.3.2 Faddeev Equations in Differential Form and the Asymptotic Behaviour of the Faddeev Amplitudes	103
3.3.3 Other Coupling Schemes and Spuriousities	109
3.4 Transition Operators	115

3.4.1	AGS-Equations	115
3.4.2	Unitarity	122
3.4.3	Multiple Scattering Series	127
3.4.4	Identical Particles	131
3.5	Examples of Numerical Studies in Few-Nucleon Scattering	137
3.5.1	Lovelace Equations	137
3.5.2	Kinematical Curves	141
3.5.3	Selected Numerical Studies	146
3.6	The Three-Nucleon Bound State	151
3.6.1	The Faddeev Equations with a Three-Body Force	152
3.6.2	Momentum Space Representation	153
3.6.3	A Technical Remark	157
3.6.4	Physical Remarks About the Triton	159
3.6.5	Appendix: The Recoupling Coefficient in Momentum Space	160
4.	Four Interacting Particles	165
4.1	The Fundamental Set of Lippmann-Schwinger Equations	165
4.2	Coupled Equations in Dummy Variables	170
4.3	Yakubovsky Equations	176
4.4	AGS-Equations for Transition Operators	183
4.5	Remarks on Equations of Higher Connectivity	186
	References	188
	Reviews, Monographies, and Conferences	193
	Subject Index	195
