

# Contents

Introduction . . . . .	1
1 Physical Basis of Heat Transfer . . . . .	4
1.1 Temperature and Temperature Gradient . . . . .	4
1.2 Heat Flow Density, Thermal Conductivity and Thermal Diffusivity . . . . .	5
1.3 The Heat Conduction Equations . . . . .	6
2 Thermal Properties of Common Rocks . . . . .	9
2.1 Thermal Conductivity . . . . .	9
2.1.1 Temperature Influence on Thermal Conductivity . . . . .	10
2.1.2 Pressure Influence on Thermal Conductivity . . . . .	12
2.1.3 Thermal Conductivity of Anisotropic Bodies . . . . .	13
2.1.4 Thermal Conductivity of Porous Rocks . . . . .	14
2.2 Specific Heat . . . . .	15
2.3 Radiogenic Heat Production . . . . .	16
2.3.1 Radioactivity of Rocks on the Earth's Surface . . . . .	16
2.3.2 Methods for Estimating Radioactive Heat Production in the Earth's Interior . . . . .	17
3 Analytical Treatment of Conductive Cooling in the Crust . . . . .	22
3.1 Thermal Equilibration in the Homogenous Half Space . . . . .	23
3.1.1 Half Space with a Boundary Surface . . . . .	23
3.1.2 Subsurface with a Cover of Lava . . . . .	24
3.2 Temperature Equilibration in Model Bodies . . . . .	26
3.2.1 Cooling of Igneous Dikes . . . . .	26
3.2.2 Cooling of Spherical Intrusions . . . . .	28
3.2.3 Cooling of Rectangular Intrusions . . . . .	29
4 Thermal State of the Earth's Interior . . . . .	32
4.1 Thermal State of the Upper Crust . . . . .	32
4.1.1 Influence of Climatic Variations on the Surface Temperature . . . . .	32
4.1.1.1 Diurnal and Annual Variations of the Surface Temperature . . . . .	33

4.1.1.2 Long-Term Temperature Variations . . . .	35
4.1.2 Topographic Influence on the Subsurface Temperature Field . . . . .	37
4.1.3 Changes in the Temperature Field Caused by Water Movement . . . . .	39
4.1.4 Temperature Fields in Different Types of Geological Structures . . . . .	42
4.1.5 Terrestrial Heat Flow Density . . . . .	45
4.1.5.1 Regional Variation of Heat Flow Density . .	46
4.1.5.2 Secular Variation of Heat Flow Density . .	52
4.2 Thermal State in the Lower Crust and Deeper Interior . .	54
4.2.1 Thermal State of the Lower Crust and Upper Mantle . . . . .	54
4.2.2 Thermal State of the Lower Mantle . . . . .	57
4.2.3 Thermal State of the Core . . . . .	59
4.3 Thermal Aspects of Plate Tectonics . . . . .	60
5 Methods for Determining Temperature . . . . .	65
5.1 Geothermometers for Evaluating Reaction Temperatures .	65
5.1.1 Solution Equilibria as Temperature Indicators . . .	65
5.1.1.1 The $\text{SiO}_2$ -Thermometer . . . . .	66
5.1.1.2 The Na-K-Ca-Thermometer . . . . .	68
5.1.2 Isotope Ratios as a Geothermometer . . . . .	69
5.1.3 Trace Elements in Salts and Ores . . . . .	71
5.1.4 The Garnet-Pyroxene Thermometer . . . . .	74
5.1.5 The Dolomite-Calcite Thermometer . . . . .	76
5.1.6 The Degree of Coalification of Organic Inclusions in Sedimentary Rocks . . . . .	77
5.2 Geophysical Methods for Determining Temperatures . .	80
5.2.1 Direct Measurements at the Earth's Surface and in Borehole . . . . .	81
5.2.2 Indirect Methods for Determining Temperatures . .	85
5.2.2.1 Temperature Determination from Gravimetric Measurements . . . . .	86
5.2.2.2 Temperature Determination from Geoelectric Measurements . . . . .	87
5.2.2.3 Results from Magnetotellurics as Temperature Indicators . . . . .	88
5.2.2.4 Shape of the Curie-Point as an Isotherm . .	90
5.2.2.5 Temperature Estimates from Seismic Results	91
6 Geothermal Heat as an Energy Source . . . . .	93
6.1 Prospecting Methods for Thermal Reservoirs . . . . .	93

6.1.1 Geochemical and Geological Methods . . . . .	94
6.1.1.1 Mapping Hydrothermal Alteration . . . . .	94
6.1.1.2 Investigations of Thermal Water . . . . .	94
6.1.1.3 Trace Elements in the Soil . . . . .	96
6.1.1.4 Alteration of Coaly Materials in Sedimentary Rock . . . . .	98
6.1.2 Geophysical Methods . . . . .	99
6.1.2.1 Infrared Measurements . . . . .	99
6.1.2.2 Shallow Temperature Measurements and Heat Flow Density . . . . .	100
6.1.2.3 Gravimetric Measurements . . . . .	103
6.1.2.4 Geoelectric Measurements . . . . .	104
6.1.2.5 Seismic Methods . . . . .	106
6.2 Utilization of Geothermal Energy . . . . .	107
6.2.1 Use of Thermal Water in Swimming Pools . . . . .	108
6.2.2 Thermal Water of Space Heating . . . . .	109
6.2.3 Converting Geothermal Energy to Electrical Energy . . . . .	111
6.2.3.1 Exploitation of Steam . . . . .	112
6.2.3.2 Hot Dry Rock as an Energy Source . . . . .	114
6.2.3.3 Exploitation of Hot Water . . . . .	115
6.2.4 Environmental Impact of Geothermal Exploitation . . . . .	116
7 Appendix . . . . .	118
7.1 Error Function . . . . .	118
7.2 Answer to the Problems . . . . .	121
8 References . . . . .	126
9 Subject Index . . . . .	139
