|----------------------|-----------|
| <b>PREFACE .....</b> | <b>xi</b> |
|----------------------|-----------|

|  |           |
|--|-----------|
| <b>1. THE EVOLUTION OF PROGRAMMING LANGUAGES .....</b>       | <b>1</b>  |
| 1.1 Early History .....                                      | 3         |
| 1.2 Early Modern History .....                               | 5         |
| 1.3 FORTRAN and ALGOL 60 .....                               | 9         |
| 1.4 The Stormy '60s .....                                    | 13        |
| 1.5 Advances in the '70s .....                               | 22        |
| Concepts Discussed in This Chapter .....                     | 29        |
| Exercises .....  | 30        |
| <b>2. THE CHALLENGE OF PROGRAMMING LANGUAGE DESIGN .....</b> | <b>33</b> |
| 2.1 Criteria for Language Design .....                       | 35        |
| 2.2 Some Possible Solutions .....                            | 40        |
| Concepts Discussed in This Chapter .....                     | 45        |
| Exercises .....  | 45        |
| <b>3. DEFINING SYNTAX .....</b>                              | <b>47</b> |
| 3.1 The Character Set .....                                  | 47        |
| 3.2 BNF .....  | 51        |
| 3.3 Syntax Graphs .....                                      | 57        |
| 3.4 Syntax and Program Reliability .....                     | 63        |
| Concepts Discussed in This Chapter .....                     | 72        |
| Exercises .....  | 72        |
| <b>4. VARIABLES, EXPRESSIONS AND STATEMENTS .....</b>        | <b>77</b> |
| 4.1 Variables and the Assignment Statement .....             | 77        |
| 4.2 Binding Time and Storage Allocation .....                | 82        |
| 4.3 Constants and Initialization .....                       | 86        |

|           |   |            |
|-----------|---|------------|
| 4.4       | Expressions .....                             | 89         |
| 4.5       | Conditional Statements .....                  | 93         |
| 4.6       | Iterative Statements .....                    | 97         |
| 4.7       | The GOTO Statement and Labels .....           | 101        |
| 4.8       | A First Look at Ada .....                     | 105        |
|           | Concepts Discussed in This Chapter .....      | 108        |
|           | Exercises .....                               | 109        |
| <b>5.</b> | <b>TYPES .....</b>                            | <b>117</b> |
| 5.1       | Data Types and Typing .....                   | 117        |
| 5.2       | Enumerated Data Types .....                   | 119        |
| 5.3       | Elementary Data Types .....                   | 121        |
| 5.4       | Pointer Data Type .....                       | 132        |
| 5.5       | Structured Data Types .....                   | 137        |
| 5.6       | Type Coercion .....                           | 149        |
| 5.7       | Type Equivalence .....                        | 151        |
| 5.8       | A Look at Ada and Types .....                 | 154        |
|           | Concepts Discussed in This Chapter .....      | 159        |
|           | Exercises .....                               | 160        |
| <b>6.</b> | <b>SCOPE AND EXTENT .....</b>                 | <b>165</b> |
| 6.1       | The Basics .....                              | 165        |
| 6.2       | Run-time Implementation .....                 | 175        |
| 6.3       | An Extended Example .....                     | 183        |
| 6.4       | Binding, Scope and Extent Revisited .....     | 185        |
| 6.5       | A Look at Ada and Scope .....                 | 191        |
|           | Concepts Discussed in This Chapter .....      | 195        |
|           | Exercises .....                               | 196        |
| <b>7.</b> | <b>PROCEDURES .....</b>                       | <b>199</b> |
| 7.1       | General Features .....                        | 199        |
| 7.2       | Parameter Evaluation and Passing .....        | 202        |
| 7.3       | Call-By-Name .....                            | 205        |
| 7.4       | Specification of Objects in a Procedure ..... | 207        |
| 7.5       | Aliasing .....                                | 213        |
| 7.6       | Overloading .....                             | 214        |
| 7.7       | Generic Functions .....                       | 217        |
| 7.8       | Coroutines .....                              | 221        |
|           | Concepts Discussed in This Chapter .....      | 226        |
|           | Exercises .....                               | 227        |

|            |                                    |            |
|------------|------------------------------------|------------|
| <b>8.</b>  | <b>DATA ABSTRACTION</b>            | <b>233</b> |
| 8.1        | An Introduction                    | 233        |
| 8.2        | MODULA                             | 237        |
| 8.3        | Euclid                             | 243        |
| 8.4        | Ada                                | 247        |
| 8.5        | SIMULA 67                          | 251        |
| 8.6        | Abstract Data Types                | 256        |
|            | Concepts Discussed in This Chapter | 262        |
|            | Exercises                          | 262        |
| <b>9.</b>  | <b>EXCEPTION HANDLING</b>          | <b>265</b> |
| 9.1        | Design Issues                      | 265        |
| 9.2        | PL/I ON-Conditions                 | 269        |
| 9.3        | Exception Handling in CLU          | 273        |
| 9.4        | Exception Handling in MESA         | 275        |
| 9.5        | Exception Handling in Ada          | 278        |
|            | Concepts Discussed in This Chapter | 284        |
|            | Exercises                          | 284        |
| <b>10.</b> | <b>CONCURRENCY</b>                 | <b>287</b> |
| 10.1       | Basic Concepts                     | 287        |
| 10.2       | Semaphores                         | 291        |
| 10.3       | Monitors                           | 295        |
| 10.4       | Message Passing                    | 302        |
| 10.5       | Concurrency in Ada                 | 306        |
|            | Concepts Discussed in This Chapter | 320        |
|            | Exercises                          | 320        |
| <b>11.</b> | <b>INPUT-OUTPUT</b>                | <b>325</b> |
|            | Concepts Discussed in This Chapter | 339        |
|            | Exercises                          | 340        |
| <b>12.</b> | <b>FUNCTIONAL PROGRAMMING</b>      | <b>343</b> |
| 12.1       | What is Functional Programming     | 343        |
| 12.2       | The Basics of LISP                 | 346        |
| 12.3       | The LIST Interpreter               | 355        |
| 12.4       | FUNARGs and FEXPRs                 | 361        |
| 12.5       | The PROG Feature                   | 364        |

|        |   |            |
|--------|---|------------|
| 12.6   | Delayed Evaluation .....  | 368        |
|        | Concepts Discussed in This Chapter .....                                    | 371        |
|        | Exercises .....   | 371        |
| 13.    | <b>DATA FLOW PROGRAMMING LANGUAGES .....</b>                                | <b>373</b> |
| 13.1   | The Data Flow Model .....   | 373        |
| 13.2   | Language Design Goals .....   | 381        |
| 13.3   | VAL—A Data Flow Programming Language .....                                  | 384        |
|        | Concepts Discussed in This Chapter .....                                    | 392        |
|        | Exercises .....   | 393        |
| 14.    | <b>OBJECT ORIENTED PROGRAMMING LANGUAGES .....</b>                          | <b>395</b> |
|        | <i>Chapter 14 was written by Tim Rentsch.</i>                               |            |
| 14.1   | History .....   | 396        |
| 14.2   | Division of Smalltalk into Programming Language<br>and User Interface ..... | 396        |
| 14.3   | Smalltalk: Object Oriented Programming Language .....                       | 397        |
| 14.3.1 | Objects .....   | 398        |
| 14.3.2 | Messages .....  | 400        |
| 14.3.3 | Methods .....   | 402        |
| 14.3.4 | Classes .....   | 403        |
| 14.3.5 | Control Structures .....  | 404        |
| 14.3.6 | Classes Compared to Abstract Data Types .....                               | 406        |
| 14.3.7 | Inheritance and Subclassing .....   | 406        |
| 14.4   | Smalltalk: Object Oriented User Interface .....                             | 411        |
| 14.5   | Design Principles .....   | 415        |
|        | Concepts Discussed in This Chapter .....                                    | 418        |
|        | Exercises .....   | 418        |
|        | <b>REFERENCES .....</b>   | <b>421</b> |
|        | <b>INDEX .....</b>  | <b>433</b> |
