

# Section I Metabolism and Kinetics

<i>I Products of Metabolism of Caffeine</i> (M. J. Arnaud) . . . . .	3
1 Discovery and Chemical Structure of Methylxanthines . . .	3
2 Formation of Uric Acid Metabolites . . . . .	5
3 Introduction of Chromatographic Techniques . . . . .	7
4 The Metabolic Studies by H. H. Cornish . . . . .	10
5 Use of Labeled Methylxanthines . . . . .	11
6 Metabolism of Theophylline in the Premature Infant . . . .	16
7 Metabolism of Labeled Theobromine and Identification of Uracil Derivatives . . . . .	19
8 Use of Methyl-Labeled Caffeine in Breath Tests . . . . .	21
9 Perinatal Caffeine and Theophylline Metabolism . . . . .	23
10 Quantitative Metabolic Pathways of Dimethylxanthines . .	26
11 Identification of an Acetylated Uracil Metabolite in Man . .	30
References . . . . .	32
 <i>II Measurement of Caffeine and Its Metabolites in Biological Fluids</i> (H. D. Christensen and A. H. Neims) . . . . .	39
1 Ultraviolet Spectrophotometry . . . . .	39
2 Liquid Chromatography . . . . .	40
3 Thin-Layer Chromatography . . . . .	42
4 Immunoassays . . . . .	43
5 Gas Chromatography – Mass Spectrometry . . . . .	44
6 Carbon Dioxide Breath Test . . . . .	44
7 Conclusions . . . . .	45
References . . . . .	45
 <i>III Interspecies Comparison of Caffeine Disposition</i> (M. Bonati and S. Garattini) . . . . .	48
1 Absorption . . . . .	48
2 Plasma Protein Binding . . . . .	48
3 Distribution . . . . .	48
4 Clearance . . . . .	49

4.1	Renal Clearance . . . . .	49
4.2	Metabolic Clearance . . . . .	49
4.3	Urinary Metabolism . . . . .	51
5	Kinetics of Primary Metabolites of Caffeine . . . . .	52
6	Nonlinear Kinetics . . . . .	52
7	Chronic Treatment in the Rat . . . . .	53
	References . . . . .	54

## Section II Intake

<i>IV Human Consumption of Caffeine</i> (J.J. Barone and H. Roberts) . . . . .	59
1 Introduction . . . . .	59
2 Sources and Levels . . . . .	60
2.1 Coffee . . . . .	60
2.2 Tea . . . . .	62
2.3 Cocoa and Chocolate Products . . . . .	62
2.4 Soft Drinks . . . . .	62
2.5 Drug Products . . . . .	63
2.6 Standard Caffeine Content Values . . . . .	63
3 Consumption Data Sources . . . . .	63
4 Consumption Estimates . . . . .	65
4.1 Market Research Corporation of America Survey . . . . .	65
4.2 Market Facts Survey . . . . .	66
4.3 Nationwide Food Consumption Survey . . . . .	67
4.4 1982 Coffee Drinking Study . . . . .	69
4.5 Standard Consumption Estimates . . . . .	70
4.6 Consumption by Pregnant Women . . . . .	71
5 Time Distribution of Caffeine Intake . . . . .	72
6 Summary . . . . .	72
References . . . . .	73

## Section III Physiological and Behavioral Effects

<i>V The Cardiovascular Effects of Caffeine</i> (D. Robertson and P. W. Curatolo) . . . . .	77
1 Introduction . . . . .	77
2 Myocardial Contractility . . . . .	78
3 Heart Rate . . . . .	78
4 Blood Pressure . . . . .	78
5 Clinical Pharmacology . . . . .	79
References . . . . .	83

<i>VI Behavioral Effects of Caffeine</i> (P. B. Dews) . . . . .	86
1 Introduction . . . . .	86
2 Man . . . . .	87
2.1 Performance in Laboratory Tests . . . . .	87
2.2 Individual Variation . . . . .	90
2.3 Effects in Children . . . . .	91
2.4 Adverse Effects in Man . . . . .	92
2.5 Comments on Studies of Behavioral Effects in Human Subjects . . . . .	93
3 Experimental Animals . . . . .	93
3.1 Mice . . . . .	93
3.2 Rats . . . . .	95
3.3 Other Species . . . . .	98
4 Conclusions . . . . .	99
References . . . . .	100

## Section IV Mechanisms of Effects

<i>VII Effects of Caffeine on Monoamine Neurotransmitters in the Central and Peripheral Nervous System</i> (J. D. Fernstrom and M. H. Fernstrom) . . . . .	107
1 Introduction . . . . .	107
2 Effects on Brain Monoamines . . . . .	107
2.1 Serotonin . . . . .	107
2.2 Catecholamines . . . . .	110
3 Effects on Catecholamines in the Peripheral Nervous System . . . . .	112
References . . . . .	115

<i>VIII Neuroendocrine Effects of Caffeine in Rat and Man</i> (E. R. Spindel and R. J. Wurtman) . . . . .	119
1 Introduction . . . . .	119
2 Studies on Experimental Animals . . . . .	119
3 Studies in Man . . . . .	124
4 Conclusions . . . . .	126
References . . . . .	126

<i>IX Adenosine as a Mediator of the Behavioral Effects of Xanthines</i> (S. H. Snyder) . . . . .	129
1 Physiologic Effects of Adenosine . . . . .	129
2 Adenosine Receptor Localization . . . . .	131
3 Adenosine Receptor Binding Properties . . . . .	133
4 Behavioral Effects of Xanthines and Adenosine Derivatives . . . . .	134
References . . . . .	140

<i>X</i>	<i>Caffeine and the Cardiovascular Effects of Physiological Levels of Adenosine</i> (R. W. von Borstel and R. J. Wurtman)	142
1	Introduction: Caffeine as an Antagonist of Endogenous Adenosine . . . . .	142
2	Effects of Circulating Adenosine . . . . .	143
3	Implications of the Interaction of Caffeine with Endogenous Adenosine . . . . .	148
	References . . . . .	149

**Section V Direct Assessments of Effects on Health**  
Editor of Section V: W. R. Grice

<i>XI</i>	<i>Influence of Ingested Caffeine on Animal Reproduction</i> (W. R. Gomes) . . . . .	153
1	Introduction . . . . .	153
2	Rats . . . . .	153
2.1	Details of Experimental Reports . . . . .	153
2.1.1	Caffeine in Drinking Solution . . . . .	153
2.1.2	Caffeine in Feed . . . . .	156
2.2	Summary and Conclusions . . . . .	157
3	Mice . . . . .	158
3.1	Details of Experimental Reports . . . . .	158
3.1.1	Caffeine in Drinking Water . . . . .	158
3.1.2	Caffeine Administered by Gavage . . . . .	160
3.1.3	Caffeine Administered by Injection . . . . .	160
3.2	Summary and Conclusions . . . . .	161
4	Domestic Chickens . . . . .	162
5	General Observations . . . . .	163
	References . . . . .	164

<i>XII</i>	<i>The Teratogenic Potential of Caffeine in Laboratory Animals</i> (J. G. Wilson and W. J. Scott Jr.) . . . . .	165
1	Introduction . . . . .	165
2	Results of Previous Animal Studies . . . . .	165
2.1	Concordant Results . . . . .	165
2.2	Discordant Results . . . . .	168
3	Previous Reviews of Animal Studies . . . . .	169
3.1	Federation of American Societies of Biology Report . . . . .	169
3.2	Citizens' Petition to the Food and Drug Administration . . . . .	170
3.3	Food and Drug Administration Review of Reproduction and Teratology Studies on Caffeine . . . . .	171
3.4	National Soft Drink Association's Critique of the Collins Gavage Study . . . . .	174
3.4.1	Procedural Criticisms . . . . .	175

3.4.2	Maternal Toxicity . . . . .	176
3.4.3	Skeletal Variants . . . . .	177
3.4.4	No-Effect Levels . . . . .	179
4	Remaining Unresolved Issues . . . . .	179
4.1	Mechanism(s) of Teratogenic Action in Rodents . . . . .	179
4.2	Skeletal Variants and Their Biological Significance . . . . .	182
4.3	Interaction of Caffeine with Known Teratogens . . . . .	183
4.4	Does Gavage in Animals Induce Complications Secondary to Emotional Stress? . . . . .	184
5	Summary and Conclusions . . . . .	184
	References . . . . .	185

### *XIII Epidemiologic Studies of Birth Defects (A. Leviton) . . . . 188*

1	What Is Epidemiology? . . . . .	188
2	Why the Need for Epidemiology? . . . . .	188
3	Limitations of Epidemiology . . . . .	189
3.1	Associations, Not Causes . . . . .	189
3.2	Quality of Data . . . . .	189
3.2.1	Measures of Exposure . . . . .	189
3.2.2	Outcome Data . . . . .	190
3.2.3	Covariates . . . . .	191
3.3	Biases . . . . .	192
4	The Past . . . . .	192
5	Recent Publications . . . . .	192
5.1	Harvard Study . . . . .	192
5.2	Boston University Study . . . . .	195
5.3	Loma Linda Study . . . . .	196
5.4	Yale Study . . . . .	197
5.5	Overview . . . . .	198
6	The Future . . . . .	199
	References . . . . .	199

### *XIV The Carcinogenic Potential of Caffeine (H. C. Grice) . . . . 201*

1	Animal Studies . . . . .	201
1.1	Published . . . . .	201
1.2	Unpublished . . . . .	202
1.3	Cited at Scientific Meetings and in Various Stages of Completion . . . . .	203
1.4	General Conclusions . . . . .	204
2	Chemical and Metabolic Studies . . . . .	205
2.1	Metabolic Evidence . . . . .	205
2.1.1	Direct Alkylation of DNA or Incorporation into DNA . . . . .	208
2.1.2	Does Caffeine Undergo Metabolic Activation? . . . . .	208
2.1.3	Does Caffeine Undergo Covalent Binding? . . . . .	209
2.2	Structure-Activity Relationships . . . . .	209

2.3	Associated Biological Activities of Caffeine . . . . .	209
2.4	Nitrosation Reactions . . . . .	210
2.5	Summary and Conclusions . . . . .	211
3	Epidemiological Evidence . . . . .	212
3.1	Cancer of the Urinary Bladder . . . . .	212
3.2	Cancer of the Pancreas . . . . .	214
3.3	Cancer of the Ovary . . . . .	216
3.4	Conclusions . . . . .	216
4	Summary of Evidence on Mutagenicity . . . . .	217
	References . . . . .	218

## *XV The Mutagenic Potential of Caffeine*

(R. H. Haynes and J. D. B. Collins) . . . . . 221

1	Introduction . . . . .	221
2	Exposure . . . . .	222
3	Results of Mutagenicity Tests . . . . .	222
3.1	Gene Mutations . . . . .	222
3.2	Chromosomal Aberrations . . . . .	225
3.3	Caffeine in Combination with Other Agents . . . . .	228
3.3.1	Micro-organisms . . . . .	228
3.3.2	<i>Drosophila melanogaster</i> . . . . .	229
3.3.3	Plants . . . . .	229
3.3.4	Mammalian Cells in Culture . . . . .	230
3.4	Summary and Risk Evaluation for Genetic Effects . . . . .	230
4	Related Effects of Caffeine . . . . .	231
4.1	Crossing-over . . . . .	231
4.2	DNA Repair . . . . .	232
4.3	Deoxyribonucleotide Pools . . . . .	233
5	Conclusions . . . . .	233
	References . . . . .	234

## *XVI Mechanism of Potentiation by Caffeine of Genotoxic Damage Induced by Physical and Chemical Agents:*

*Possible Relevance to Carcinogenesis* (J. J. Roberts) . . . . . 239

1	Introduction . . . . .	239
2	Enhancement by Caffeine of Toxicity and Chromosomal Damage Induced by Chemical Agents . . . . .	239
3	Effects of Caffeine Alone on Normal DNA Replication . . . . .	240
4	Effects of Genotoxic Agents on DNA Synthesis . . . . .	241
5	Effects of Post-treatment with Caffeine on DNA Synthesis in Mammalian Cells Treated with Genotoxic Agents . . . . .	242
6	Caffeine-Induced DNA Template Breakage in Treated Cells: Double-Strand Break Formation . . . . .	243
7	Caffeine-Induced Premature Mitosis . . . . .	244

8	Modifying Effects of Caffeine on Tumour Induction by Chemical and Physical Agents: Possible Role of DNA Repair . . . . .	245
9	Conclusions . . . . .	251
	References . . . . .	251
	 <b>Subject Index . . . . .</b>	 <b>255</b>
