

# Contents

I	Fundamentals of Intrinsic Geodesy . . . . .	1
1	From Classical Geodesy to Geodesy in Three Dimensions (1959) . . . . .	3
2	Foundations of Intrinsic Geodesy (1951) . . . . .	13
	Introduction . . . . .	13
	A Absolute Approach . . . . .	16
	B Local Astronomical Approach . . . . .	23
	C Local and General Geodetic Approach . . . . .	29
	D Applications . . . . .	48
3	Generalized Legendre Expansions for Any Curve Whatever, Traced Out Upon Any Surface Whatever (1950) . . . . .	59
4	Generalized Legendre Expansions in Space (1950) . . . . .	66
5	Generalized Legendre Expansions for Any Curve Whatever in Space (1950) . . . . .	70
6	The Tidal Field of a Planet and the Related Intrinsic Reference Systems (1979) . . . . .	75
	1 The Gravity Field . . . . .	75
	2 The Tidal Field . . . . .	75
	3 The Cardinal and the Canonical Triads . . . . .	76
	4 The Tidal Triad . . . . .	77
	5 The Centrifugal Field . . . . .	79
	6 Reference Frames; Ricci's Coefficients . . . . .	80
	7 The Cardinal Frames . . . . .	81
	8 The Canonical Frame . . . . .	82
	9 The Tidal Frame . . . . .	83
II	Structure of the Gravity Field and Laplace's Equation . . . . .	85
1	On the Curvature and Torsion of the Gravity Field (1952) . . . . .	87
2	Generalization of Dalby's Theorem for Any Surface Whatever (1952) . . . . .	92

III Principles of Intrinsic Geodesy Applied to the Normal Reference Field . . . . .	99
1 Principles of Intrinsic Geodesy Applied to the Field of Somigliana (1950) . . . . .	101
2 The First Fundamental Problem of Geodesy Developed for the Field of Somigliana (1950) . . . . .	109
3 Differential Parameters in the Normal Gravity Field (1980) . . . . .	118
IV Mapping of the Actual Gravity Field onto the Normal Reference Field . . . . .	123
1 On the Representation of the Geoid on the Ellipsoid (1951) . . . . .	125
2 Some Remarks on the Use of Conformal Representations in Three-Dimensional Geodesy (1967) . . . . .	131
3 On the Three-Dimensional Computation of Geodetic Networks and Anomalies (1973) . . . . .	135
4 The Adjustment of Geodetic Networks in the Three-Dimensional Ellipsoidal Model Space of Somigliana (1981) . . . . .	142
V Mapping Between Surfaces . . . . .	147
1 Some Integral Properties of the Conformal Representations of Surfaces on Surfaces (1951) . . . . .	149
2 The a Priori Determination of the Modulus of Linear Deformation in the Gauss Conformal Representation (1951) . . . . .	153
3 Representations Between Surfaces Defined by Means of the Quadratic Form Which Determines Their Modulus of Deformation (1957) . . . . .	157
VI Propagation of Light in Continuous Isotropic Refracting Media . . . . .	167
1 An Analogy Between the Laws of Propagation of Light in Continuous Isotropic Refracting Media and Conformal Representations (1953) . . . . .	169
2 The Torsion of a Ray of Light in a Continuous Isotropic Refracting Medium (1953) . . . . .	173
VII Posthumous Work . . . . .	177
The Motion of a Free Particle and of a Spherical Pendulum in the Microgravitational Field of a Gravitationally Stabilized Satellite in Circular Orbit in a Central Field (A. Marussi and C. Chiaruttini) . . . . .	179

Appendix. Notations of Vector Analysis – the Vectorial Homographies of Burali-Forti and Marcolongo (W. I. Reilly) . . . . .	190
Bibliography of Prof. A. Marussi . . . . .	196
Index of Abbreviations (H. Hornik) . . . . .	203
Antonio Marussi: 1908–1984 A Personal History (H. Moritz) . . . . .	205
Name Index . . . . .	209
Subject Index . . . . .	211
