

Part A. THE NORMAL LARYNX

1. Gross Anatomy	3
Regions	3
Cartilage and Elastic Membranes	3
Intrinsic Muscles	5
The Cords; the Ventricle and Saccule	7
2. Gross Examination in the Histopathology Laboratory	8
Preparation Technique	9
Appearances of Transverse Slices	13
3. Normal Histology	17
Epiglottis	17
False Cords	18
True Vocal Cords	19
Anterior and Posterior Commissures	20
Ventricle and Saccule	21
Laryngeal Joints	23
Subglottis	23
Laryngeal Cartilage	24
Intrinsic Laryngeal Muscles	27
Nerve Supply	29
Laryngeal Paraganglia	33
4. Development	35
Stages 9–15	36
Stages 16–23	37
Further Development	41
The Infant Larynx	41
5. Mechanism of Phonation	43

Part B. NON-NEOPLASTIC LESIONS

6. Congenital Laryngeal Anomalies.	47
Laryngomalacia	47
Vocal Cord Paralysis.	47
Congenital Subglottic Stenosis	48
Less Common Anomalies	48
7. Laryngocele, cysts, heterotopia.	51
Laryngocele	51
Cysts of the Sacculæ	55
Prolapse and Eversion of the Ventricle	55
Other Cysts.	55
Thyroid Tissue Within the Larynx	57
Tracheopathia Osteochondroplastica.	60
8. Laryngeal Biopsy	62
Laryngoscopy	62
Biopsy	62
Frozen Section	63
Laryngoscopic Biopsies at the Royal National Throat, Nose and Ear Hospital, London.	64
9. Infections	65
10. Acute Inflammation	68
Acute Epiglottitis	68
Acute Laryngotracheobronchitis	74
Allergic Laryngitis	75
Diphtheritic Laryngitis	76
11. Chronic Bacterial Infections and Related Conditions	78
Tuberculosis	78
Sarcoidosis	80
Leprosy.	82
Scleroma	83
Syphilis	86
Typhoid	87
Typhus Fever.	88
Anthrax.	88
12. Mycotic Infections	90
Histoplasmosis	90
Coccidioidomycosis	91
Cryptococcosis	92
North American Blastomycosis	92

South American Blastomycosis (Paracoccidioidomycosis)	94
Actinomycosis	94
Candidosis (Candidiasis, Moniliasis)	95
Aspergillosis	96
Phycomycosis (Mucormycosis)	96
Sporotrichosis	96
Rhinosporidiosis	97
13. Parasitic Diseases	98
Leishmaniasis	98
Trichinosis	98
Syngamosis	99
Ascariasis	100
Leeches (<i>Hirudinea</i>)	101
14. The Vocal Cord Polyp and Other Exudative Processes of Reinke's Space	102
Aetiology	102
Clinical and Gross Appearances	104
Microscopical Appearances	105
Treatment	107
15. Arthritis of Laryngeal Joints; Gout	110
Laryngeal Rheumatoid Arthritis	110
Gout	113
16. Hyaline Deposits: Amyloid and Lipoid Proteinosis	115
Amyloid Deposits	115
Lipoid Proteinosis	123
17. Relapsing Polychondritis and Wegener's Granulomatosis	125
Relapsing Polychondritis	125
Wegener's Granulomatosis	129
18. Trauma; Perichondritis	131
Laryngeal Fractures	131
Strangulation	132
Pathological Changes after Intratracheal Intubation	132
Reaction to Teflon Injection	142
Perichondritis	142
19. Bullous Skin Lesions	145
Pemphigus Vulgaris	145
Epidermolysis Bullosa Letalis	146

20. Neuromuscular Diseases	148
Clinical Features	148
Pathological Changes that Might Cause Damage to the Neuromuscular Pathway of Vocal Cord Movement	150
Pathological Changes Actually Observed in Studies of the Neuromuscular Pathway of Vocal Cord Movement	151

Part C. SQUAMOUS CELL NEOPLASMS

21. Squamous Cell Papillomas	159
Sites	160
Gross Appearances	163
Microscopical Appearances	163
Natural History	168
Viral Aetiology	171
22. Squamous Cell Carcinoma: Incidence and Epidemiology . .	174
Incidence	174
Epidemiological Factors	174
23. Precancerous Lesions.	178
Histogenesis of Epidermoid Metaplasia.	178
Epidermoid Metaplasia in the Larynx.	179
Necrotising Sialometaplasia	182
Dysplasia and Carcinoma in Situ	182
Classification	185
Technical Problems in Diagnosis	188
Differential Diagnosis	189
Carcinoma in Situ	189
Carcinoma in Situ Associated with Invasive Carcinoma . .	191
24. Origin and Differentiation of Squamous Carcinoma	193
Origin.	193
Differentiation	199
25. Spread of Squamous Cell Carcinoma.	208
Invasion of the Cartilaginous Framework	208
Spread Outside the Larynx	213
The Invasive Process	218
26. Pathological Anatomy of Invasive Squamous Carcinoma . .	220
Literature.	220
Gross Appearances	222
Fields of Origin.	224
Spread of Squamous Carcinoma of Laryngeal Airway. . .	225

27. Ventriculosaccular Carcinoma	231
Gross Appearances	231
Microscopical Appearances	232
Clinical Features	237
28. Some Histopathological Aspects of Therapy	239
Conservative Surgery: The Pathological Basis	239
Radiation Therapy	240
Post-Irradiation Biopsy	251
Laryngolith.	252
29. Atypical Forms of Squamous Cell Carcinoma: Spindle Cell Carcinoma, Verrucous Squamous Carcinoma	254
Spindle Cell Carcinoma	254
Verrucous Squamous Carcinoma	258
A Historical Note on a Famous Well-Differentiated Squamous Carcinoma	266
30. Reporting and Recording of Squamous Cell Carcinoma . . .	270

Part D. NON-EPIDERMOID NEOPLASMS

31. Non-Epidermoid Epithelial Neoplasms.	277
Benign Forms	277
Malignant Forms	278
32. Neuroectodermal Tumours	285
Granular Cell Tumour ("Myoblastoma")	285
Neurogenic Tumours	288
Paraganglioma	292
Carcinoid and Oat Cell Carcinoma	296
Malignant Melanoma	299
33. Vascular Neoplasms	301
Haemangioma	301
Haemangiosarcoma	304
Haemangiopericytoma.	305
Kaposi's Sarcoma	306
34. Fibroblastic Lesions, Synovial Sarcoma and Neoplasms of Adipose Tissue	307
Non-Neoplastic Fibroblastic Lesions	307
Neoplastic Collagenous Lesions.	307
Neoplastic Non-Collagenous Lesions—Fibrous Histiocytomas	308

Synovial Sarcoma	309
Neoplasms of Adipose Tissue	310
35. Myogenic Neoplasms; Alveolar Soft Part Sarcoma	312
Neoplasms of Smooth Muscle	312
Neoplasms of Striated Muscle	313
Alveolar Soft Part Sarcoma	317
36. Cartilaginous Neoplasms and Bone-Producing Lesions	320
Neoplasms of Hyaline Cartilage	320
Neoplasms of Elastic Cartilage	326
Elastic Cartilage Metaplasia	326
Bone-Producing Lesions	327
37. Lymphomas Including Plasmacytomas.	329
Gross Features	329
Classification	329
Natural History	336
Treatment	336
Pseudolymphomatous Conditions	336
Subject Index	341
