

Contents

1	Logics, Structures and Presentations	1
1.1	First-Order and Monadic Second-Order Logic	1
1.2	Linear Orders, Words and Trees	3
1.3	Automata on ω -Words	6
1.4	Automatic Structures	9
1.5	Interpretations and Complete Structures	11
1.6	Composition in Monadic Second-Order Logic	13
2	Game Quantifiers on Automatic Presentations	17
2.1	Open and Closed Game Quantifiers	17
2.2	Game Quantification over Infinite Words	20
2.3	Decidability and Determinacy for $\text{FO}[\exists]$	22
2.4	Expressive Power of $\text{FO}[\exists]$	23
2.5	Inductive Automorphisms	25
3	Games for Model Checking on Automatic Structures	29
3.1	Games on Graphs and Logic	29
3.2	Games with Hierarchical Imperfect Information	33
3.3	Alternation of Moves in Hierarchical Games	36
3.4	Model Checking with Hierarchical Games	40
4	Memory Structures for Infinitary Games	47
4.1	Memory Structures and Determinacy	48
4.2	Latest Appearance Record for Muller Games	49
4.3	Games with Infinitely Many Priorities	51
4.4	Finite Appearance Records	52
4.5	FAR Reductions for Infinitary Muller Games	53
4.6	Infinitary Zielonka-Tree Memory	62

5	Counting Quantifiers on Automatic Structures	67
5.1	Generalized Quantifiers Preserving Regularity.....	67
5.2	Defining Uncountability Using Equal Ends.....	69
5.3	FO[C] over ω -Automatic Structures.....	74
5.4	Presentations of Countable ω -Automatic Structures.....	75
6	Cardinality Quantifiers in MSO on Linear Orders	79
6.1	Infinity Quantifier.....	80
6.2	Unique and Doubling Intervals.....	81
6.3	Almost Complete Linear Orders.....	85
6.4	Reduction to Counting Cuts.....	87
6.5	Rationals.....	88
6.6	Sums of Linear Orders.....	90
6.7	All Countable Linear Orders.....	93
7	Cardinality Quantifiers in MSO on Trees	95
7.1	D-Nodes versus U-Nodes and Relevant Branches.....	95
7.2	Structure of D-Paths for Uncountably Many Sets.....	99
7.3	The Full Binary Tree and the Cantor Space.....	104
7.4	Formalizing Existence of Uncountably Many Branches.....	106
8	Outlook	109
	References	111
