

# Contents

## **The Selection of Doses in Chronic Toxicity/ Carcinogenicity Studies**

I.	Introduction	9
II.	Factors Relating to the Dose Selection	21
III.	Principles for Dose Selection	35
IV.	Evaluation and Interpretation of Experimental Findings	37
V.	Recommendations for Future Research on Dose Selection	38
VI.	Summary	39
VII.	Glossary of Terms – As They Pertain to Toxicology	40
VIII.	References	41

## **Age-Associated (Geriatric) Pathology: Its Impact on Long-Term Toxicity Studies**

I.	Introduction	57
II.	Types of Long-Term Tests	58
III.	Factors Related to the Aging Process that Influence the Design and Conduct of Long-Term Rodent Studies	59
IV.	Age-Associated Diseases: How They Complicate Long-Term Toxicity Studies	66
V.	Effect of Aging on Drug Metabolism	71
VI.	Duration of Long-Term Studies	86
VII.	Cost of Conducting Toxicity Studies with Durations of 18, 24, or 30 Months	89
VIII.	Conclusions	92
IX.	Areas in Need of Future Research	93
X.	Summary	94
XI.	References	95
