Introduction	1
Chapter I. Microdifferential Operators	5
Summary	5
§ 1. Construction of the Ring $\mathcal{E}_X$	6
1.1. Differential Operators	6
1.2. Formal Microdifferential Operators	9
1.3. Microdifferential Operators	11
Exercises	13
§ 2. Division Theorems	14
2.1. A Banach Algebra of Operators	14
2.2. The Späth and Weierstrass Theorems	16
Exercises	19
§ 3. Refined Microdifferential Cauchy-Kowalewski Theorem	20
3.1. Statement of the Theorem	20
3.2. The Abstract Cauchy-Kowalewski Theorem in Scales of Banach Spaces	22
3.3. Proof of Theorem 3.1.1	24
Exercises	25
§ 4. Microdifferential Modules Associated to a Submanifold	26
4.1. The Sheaf $\mathcal{E}_{Z X}$	26
4.2. The Case when Z is a Hypersurface	30
4.3. The Sheaf $\mathcal{E}_{Y \rightarrow X}$	32
Exercises	33
§ 5. Quantized Contact Transformations	34
5.1. Division by an Ideal	34
5.2. Adjoint	36
5.3. Quantized Contact Transformations	37
5.4. Examples	39
Exercises	41

§ 6. Systems with Simple Characteristics	43
6.1. Equivalence of Operators	43
6.2. The Regular Involutive Case	44
6.3. Holonomic Systems with Simple Characteristics	46
Exercises	47
Notes	48
Chapter II. $\mathcal{E}_X$-modules	50
Summary	50
§ 1. Filtered Rings and Modules	51
1.1. Noetherian and Zariskian Filtrations	51
1.2. Homological Properties	58
1.3. Characteristic Ideal	61
1.4. Sheaves of Filtered Modules	65
1.5. Examples	69
Exercises	71
§ 2. Structure of the Ring $\mathcal{E}_X$	72
2.1. The Ring $\mathcal{E}_X(0)$	72
2.2. Main Properties of $\mathcal{E}_X$	76
2.3. Characteristic Cycle	79
2.4. Holonomic Modules	81
2.5. Adjunction of a Dummy Variable	84
2.6. $\mathcal{D}_X$ -modules	86
Exercises	88
§ 3. Operations on $\mathcal{E}_X$ -modules	90
3.1. Definitions	90
3.2. Operations on $\mathcal{B}_{SIX}$	94
3.3. Operations on $\mathcal{C}_{SIX}$	99
3.4. Operations on $\mathcal{E}_X$ -modules	102
3.5. Complement on Inverse Images	108
Exercises	111
Notes	112
Chapter III. Cauchy Problem and Propagation	114
Summary	114
§ 1. Microcharacteristic Varieties	116
1.1. Normal Cones	116
1.2. 1-microcharacteristic Variety	119
1.3. Characteristic Varieties Associated to a Submersion	124
1.4. Characteristic Varieties Associated to an Embedding	127
1.5. Characteristic Variety of the Systems Induced on a Submanifold	130

1.6. Coherency of the Systems Induced on a Submanifold	133
Exercises	136
§2. The Cauchy Problem	137
2.1. The Cauchy Problem for a System	137
2.2. Application: The Cauchy Problem with Data Ramified along Hypersurfaces	143
Exercises	147
§3. Propagation	148
3.1. Propagation at the Boundary for one Operator	148
3.2. Propagation for Systems	155
Exercises	157
§4. Constructibility	158
4.1. Real and Complex Stratifications	158
4.2. Micro-support of Sheaves	163
4.3. Micro-supports and Microcharacteristic Varieties	165
Exercises	169
Notes	171

Appendices 173

A. Symplectic Geometry	173
A.1. Symplectic Vector Spaces	173
A.2. Symplectic Manifolds	174
A.3. Homogeneous Symplectic Structures	175
A.4. Contact Transformations	176
B. Homological Algebra	179
B.1. Categories and Derived Functors	179
B.2. Rings and Modules	184
B.3. Graded Rings and Modules	186
B.4. Koszul Complexes	187
B.5. The Mittag-Leffler Condition	189
C. Sheaves	190
C.1. Presheaves and Sheaves	190
C.2. Cohomology of Sheaves	192
C.3. Čech Cohomology	194
C.4. An Extension Theorem	195
C.5. Coherent Sheaves	198
D. $\mathcal{O}_X$ -modules	199
D.1. Support and Multiplicities	199
D.2. Homological Dimension	202

Bibliography 203

List of Notations and Conventions 207
