

# Contents

<b>1</b>	<b>Background</b>	<b>1</b>
1.1	Introduction	1
1.1.1	The Search for Functorial Solutions to Certain Representation Problems	2
1.1.2	Partially Functorial Solutions to Representation Problems	5
1.1.3	Contents of the Book	8
1.1.4	How Not to Read the Book	12
1.2	Basic Concepts	14
1.2.1	Set Theory	14
1.2.2	Stone Duality for Boolean Algebras	15
1.2.3	Partially Ordered Sets (Posets) and Lattices	15
1.2.4	Category Theory	17
1.2.5	Directed Colimits of First-Order Structures	20
1.3	Kappa-Presented and Weakly Kappa-Presented Objects	24
1.4	Extension of a Functor by Directed Colimits	26
1.5	Projectability Witnesses	33
<b>2</b>	<b>Boolean Algebras That Are Scaled with Respect to a Poset</b>	<b>35</b>
2.1	Pseudo Join-Semilattices, Supported Posets, and Almost Join-Semilattices	35
2.2	$P$ -Normed Spaces, $P$ -Scaled Boolean Algebras	38
2.3	Directed Colimits and Finite Products of $P$ -Scaled Boolean Algebras	41
2.4	Finitely Presented $P$ -Scaled Boolean Algebras	43
2.5	Normal Morphisms in $\mathbf{Bool}_P$ and in $\mathbf{BTop}_P$	45
2.6	Norm-Coverings of a Poset; The Structures $\mathbf{2}[p]$ and $\mathbf{F}(X)$	47
<b>3</b>	<b>The Condensate Lifting Lemma (CLL)</b>	<b>51</b>
3.1	The Functor $A \mapsto A \otimes \vec{S}$ ; Condensates	51
3.2	Lifters and the Armature Lemma	53

3.3	The Löwenheim–Skolem Condition and the Buttrass Lemma .....	57
3.4	Ladders and the Condensate Lifting Lemma .....	60
3.5	Infinite Combinatorics and Lambda-Lifters .....	63
3.6	Lifters, Retracts, and Pseudo-Retracts .....	70
3.7	Lifting Diagrams Without Assuming Lifters .....	74
3.8	Left and Right Ladders .....	77
<b>4</b>	<b>Getting Ladders from Congruence Lattices of First-Order Structures .....</b>	<b>81</b>
4.1	The Category of All Monotone-Indexed Structures .....	82
4.2	Directed Colimits of Monotone-Indexed Structures .....	86
4.3	The Relative Congruence Lattice Functor with Respect to a Generalized Quasivariety .....	89
4.4	Preservation of Small Directed Colimits by the Relative Compact Congruence Functor.....	94
4.5	Ideal-Induced Morphisms and Projectability Witnesses in Generalized Quasivarieties.....	95
4.6	An Extension of the Löwenheim–Skolem Theorem .....	98
4.7	A Diagram Version of the Grätzer–Schmidt Theorem .....	101
4.8	Right $\aleph_0$ -Ladders from Congruence-Proper Quasivarieties ....	104
4.9	Relative Critical Points Between Quasivarieties .....	108
4.10	Strong Congruence-Properness of Certain Finitely Generated Varieties of Algebras.....	113
4.11	A Potential Use of Ladders on Non-regular Cardinals.....	114
<b>5</b>	<b>Congruence-Permutable, Congruence-Preserving Extensions of Lattices .....</b>	<b>117</b>
5.1	The Category of Semilattice-Metric Spaces .....	118
5.2	The Category of All Semilattice-Metric Covers .....	119
5.3	A Family of Unliftable Squares of Semilattice- Metric Spaces.....	120
5.4	A Left Ladder Involving Algebras and Semilattice-Metric Spaces .....	124
5.5	CPCP-Retracts and CPCP-Extensions.....	126
<b>6</b>	<b>Ladders from Von Neumann Regular Rings.....</b>	<b>131</b>
6.1	Ideals of Regular Rings and of Lattices .....	131
6.2	Right Ladders from Regular Rings .....	136
<b>7</b>	<b>Discussion .....</b>	<b>139</b>
	<b>References.....</b>	<b>143</b>
	<b>List of Figures.....</b>	<b>146</b>
	<b>Symbol Index.....</b>	<b>149</b>
	<b>Subject Index .....</b>	<b>153</b>
	<b>Author Index .....</b>	<b>157</b>
