Neuromorphological Background of Pathochemical Studies in Major Psychoses K. JELLINGER (With 1 Figure)	1
The Significance of Psychopathological Classification in Interpreting Biochemical Findings E. GABRIEL	24
Receptors, Neuroleptics and Dopamine Concentrations in Schizophrenia – Postmortem Studies of Human Brain Tissue G. P. REYNOLDS	29
Brain Biochemistry in Schizophrenia: An Assessment P. RIEDERER and G. P. REYNOLDS	35
Biochemical Disturbances in Psychiatric Disorder: Are They Specific to Diagnosis or to Certain Symptoms? C. M. BANKI, M. ARATÒ, and Z. PAPP (With 4 Figures)	44
Further Studies on the Tyramine Conjugation Deficit in Depressive Illness M. SANDLER and S. M. BONHAM CARTER	54
Disturbances in Serine-Glycine Metabolism in Relation to Acute Psychoses with Psychedelic Symptoms J. BRUINVELS and L. PEPPLINKHUIZEN (With 2 Figures)	59
Peptides and Amines in Affective Disorders A. GJERRIS and O. J. RAFAELSEN (With 5 Figures)	74
Biochemical and Neuroendocrine Studies in Schizophrenics: Attempts to Characterize the Illness Biochemically M. ACKENHEIL, M. ALBUS, B. BONDY, F. MÜLLER-SPAHN, U. MÜNCH, and D. NABER (With 8 Figures)	78
Decreased Spinal Fluid Monoamine Metabolites and Norepinephrine in Schizophrenic Patients with Brain Atrophy D. P. VAN KAMMEN, L. S. MANN, M. SCHEININ, P. T. NINAN, W. B. VAN KAMMEN, and M. LINNOILA (With 4 Figures)	88

The Use of Platelet Monoamine Oxidase in Multifactorial Research on Endogenous Psychoses L. DEMISCH, F. REINHUBER, and H. J. BOCHNIK (With 1 Figure)	96
Neuroendocrine Responses to Serotonin Agonists as Possible Markers of the Functional State of Serotonergic Neurotransmission in Psychiatric Disorders E. A. MUELLER, L. J. SIEVER, and D. L. MURPHY (With 1 Figure)	110
Cerebrospinal Fluid Amine Metabolite Studies in Depression: Research Update D. C. JIMERSON and W. BERRETTINI (With 1 Figure)	129
CSF Studies in Schizophrenia: A Multidimensional Approach W. F. GATTAZ, T. GASSER, and H. BECKMANN (With 1 Figure)	144
