Introduction	ix
CHAPTER I	
Topological Spaces	1
1.1. Open Sets and Closed Sets in a Metric Space	1
1.2. Topological Spaces	4
1.3. Neighborhoods	6
1.4. Interior, Exterior, Boundary	7
1.5. Closure	9
1.6. Separated Topological Spaces	10
CHAPTER II	
Limits. Continuity	12
2.1. Filters	13
2.2. Limits Along a Filter Base	14
2.3. Mappings Continuous at a Point	17
2.4. Continuous Mappings	18
2.5. Homeomorphisms	20
2.6. Adherence Values Along a Filter Base	22
CHAPTER III	
Constructions of Topological Spaces	25
3.1. Topological Subspaces	25
3.2. Finite Products of Topological Spaces	29
3.3. Infinite Products of Topological Spaces	34
3.4. Quotient Spaces	34

CHAPTER IV

Compact Spaces	36
4.1. Definition of Compact Spaces	36
4.2. Properties of Compact Spaces	37
4.3. Complement: Infinite Products of Compact Spaces	42
4.4. The Extended Real Line	44
4.5. Locally Compact Spaces	45

CHAPTER V

Metric Spaces	49
5.1. Continuity of the Metric	49
5.2. The Use of Sequences of Points in Metric Spaces	51
5.3. Uniformly Continuous Functions	53
5.4. Equicontinuous Sets of Functions	54
5.5. Complete Metric Spaces	55
5.6. Complete Spaces and Compact Spaces	59
5.7. The Method of Successive Approximations	60

CHAPTER VI

Limits of Functions	62
6.1. Uniform Convergence	62
6.2. Simple Convergence	67
6.3. Ascoli's Theorem	69

CHAPTER VII

Numerical Functions	70
7.1. Bounds of a Numerical Function	71
7.2. Limit of an Increasing Numerical Function	73
7.3. Limit Superior and Limit Inferior of a Numerical Function	74
7.4. Semicontinuous Functions	77
7.5. Stone-Weierstrass Theorem	80
7.6. Normal Spaces	85

CHAPTER VIII

Normed Spaces	90
8.1. Definition of Normed Spaces	90
8.2. Continuous Linear Mappings	93
8.3. Bicontinuous Linear Mappings	96
8.4. Pre-Hilbert Spaces	98
8.5. Separated Pre-Hilbert Spaces	101
8.6. Banach Spaces, Hilbert Spaces	104
8.7. Linear Subspaces of a Normed Space	106
8.8. Riesz's Theorem	108

CHAPTER IX

Infinite Sums	113
9.1. Summable Families	113
9.2. Associativity, Commutativity	115

9.3. Series 117

9.4. Summable Families of Real or Complex Numbers 119

9.5. Certain Summable Families in Hilbert Spaces 123

CHAPTER X

Connected Spaces 125

10.1. Connected Spaces 125

10.2. Arcwise Connected Spaces. 127

10.3. Connected Components 128

Exercises 129

Index of Notations 137

Index of Terminology 139
