List of Tables ix
Preface xi
Translator's Preface xiii
Preface to the English-language Edition xv
Introduction to the *International Series in Heat and Mass Transfer* xvii
Frequently Used Symbols xix

1 INTRODUCTORY REMARKS 1

1.1 Fundamental Concepts 1
1.2 Fourier's Equation 1
1.3 Initial and Boundary Conditions 3

2 TRANSPORT PROPERTIES 7

2.1 Thermal Conductivity of Metals and Alloys 7
2.2 Transport Processes in Dilute Gases 11
2.3 Heat Conduction through Laminated Bodies 12
2.3.1 Heat Flow Normal to Lamina 14
2.3.2 Heat Flow Parallel to the Layers 15
2.3.3 Comparison between k_n and k_p 15
2.4 Order of Magnitude of Heat Fluxes and Coefficients 16

3	**ONE-DIMENSIONAL, STEADY-STATE HEAT CONDUCTION**		**19**
	3.1	Introductory Remarks	19
	3.2	Péclet's Equations	21
	3.3	Quasi-steady Heat Conduction	25
		3.3.1 Heat Loss in Lagged Pipes	25
		3.3.2 Temperature Drop in Pipes	25
		3.3.3 Cooling of Reservoirs	26
		3.3.4 Thermometer in Heated Bath	27
	3.4	Extended Surfaces	29
4	**STEADY-STATE CONDUCTION IN THE PRESENCE OF HEAT SOURCES**		**37**
5	**STEADY-STATE CONDUCTION IN SEVERAL DIMENSIONS**		**41**
	5.1	Shape Factor and Shape Resistance	41
	5.2	Kirchhoff's Transformation	43
	5.3	Conformal Mapping	45
		5.3.1 Eccentric Pipes and Related Problems	50
	5.4	Fictitious Heat Sources and Sinks	55
	5.5	Graphical Methods	57
	5.6	Relaxation Method	60
	5.7	Experimental Analogs	63
		5.7.1 Electrolytic Tank	63
		5.7.2 Soap-film Analogy	64
	5.8	Summary of Shape Factors	65
6	**NONSTEADY ONE-DIMENSIONAL HEAT CONDUCTION**		**71**
	6.1	Fundamental Solutions of the Fourier Equation	71
	6.2	Dimensional Analysis	73
	6.3	Semi-infinite Body	75
	6.4	Two Semi-infinite Bodies in Thermal Contact	79
	6.5	Duhamel's Theorem	82
	6.6	Temperature Equalization in Simple Bodies	86
	6.7	Approximate Solutions	91
	6.8	Method of Finite Differences	97
	6.9	Experimental Analogs	103
		6.9.1 The Electric Analog (Beuken, 1936)	103
		6.9.2 The Hydraulic Model (Moore, 1935; Lukyanov, 1936)	105
	6.10	The Laplace Transformation	107
	6.11	Periodic Temperature Variation	111
7	**THERMAL EXPLOSIONS**		**119**
8	**CONTINUOUSLY OPERATING HEAT SOURCES**		**125**

9 MOVING SOURCES 131

10 NONSTEADY HEAT CONDUCTION IN SEVERAL DIMENSIONS 137

11 NONSTEADY HEAT CONDUCTION WITH PHASE TRANSITION 143

11.1 Neumann's Exact Solution 144
11.2 The Quasi-steady Approximations 150
