A. BARRACO, B. CUNY, and G. ISHIOMIN: Dynamics for Flexible Systems	1
R. BOGACZ: Stability of Several Degrees of Freedom Moving Subsystem Interacting with Waves of Continuous Media ...	17
H. BRAUCHLI and R.W. WEBER: Canonical Approach to Multibody Systems Using Redundant Coordinates	31
K. DESOYER, P. LUGNER, and H. SPRINGER: Dynamic Effects of Active Elements in Manipulators and their Influence upon the Controlling Drives	43
E.J. HAUG, S.C. WU, and S.S. KIM: Dynamcis of Flexible Machines: A Variational Approach	55
R.L. HUSTON: Useful Procedures in Multibody Dynamics	69
A.YU. ISCHLINSKY, V.A. STOROJENKO, and M.E. TEMCHENKO: On Steady-State Motions of an Axisymmetric Rigid Body on a "String" Suspension	79
T. IWATSUBO, Y. YAMAMOTO, and R. KAWAI: Startup Torsional Vibration of Rotating Machine Driven by Synchronous Motor	91
J.B. JONKER: Dynamics of Active Mechanisms with Flexible Links	103
D.M. KLIMOV: Dynamics of Gyroscopic Systems for Indicating the Vertical on Ships	119

L.K. LILOV: Dynamics of Elastic Multibody Systems Involving Closed Loops	129
L. LILOV and J. WITTENBURG: Dynamics of Chains of Rigid Bodies and Elastic Rods with Revolute and Prismatic Joints	141
P.E. NIELAN and T.R. KANE: Symbolic Generation of Efficient Simulation/Control Routines for Multibody Systems	153
P. PEDERSEN: Identification of Models for Dynamic Systems	165
F. PFEIFFER: Modelling Optimal Prescribed Manipulator Trajectories	177
K. POPP, P.C. MÜLLER, and H. WINDRICH: Analysis of Nonlinear Stochastic Multibody Systems	189
M. RENAUD: A Near Minimum Iterative Analytical Procedure For Obtaining a Robot-Manipulator Dynamic Model	201
F.P.J. RIMROTT: Global Treatment of Energy Dissipation Effects for Multibody Satellites	213
R.E. ROBERSON and V.A. SARYCHEV: Equilibria and Stability of Satellite Gyrostats: A Comprehensive Review	227
J.C. SAMIN and P.Y. WILLEMS: Multibody Formalism Applied to Non-Conventional Railway Systems	237
W. SCHIEHLEN and E. KREUZER: Strength Estimations in Multibody Systems	249
R. SCHWERTASSEK and R.E. ROBERSON: A Perspective on Computer-Oriented Multibody Dynamical Formalisms and their Implementations	261

XIV

R. SINGH, R. VANDERVOORT, and P. LIKINS: Interactive Design for Flexible Multibody Control	275
W. SZCZYGIELSKI and G. SCHWEITZER: Dynamics of a High-Speed Rotor Touching a Boundary	287
J. UNDA, J.M. JIMENEZ, A. AVELLO, and J. GARCIA DE JALON: Computer Analysis of Multibody Systems with "Natural Coordinates"	299
F. ZIEGLER and H.L. HASSLINGER: Earthquake Vibrational Response of Turbo-Machines	311
