

Contents

Session 1

Chairman: R. Eppler

Craik A.D.D.	*)	Resonant interactions in shear flows	1
Levchenko V.Ya.	*)	New experimental data on the boundary layer transition	+) 9
Herbert T.	*)	Secondary instability of plane shear flows-theory and application	9

Session 2

Chairman: V.N. Zhigulev

Maslennikova I.I. Zelman M.B.	On subharmonic-type laminar-turbulent transition in boundary layer	21
Kleiser L.	Three-dimensional numerical simulation of laminar-turbulent transition and its control by periodic disturbances	29
Lessen M. Koh P.H.	Instability and turbulent bursting in the boundary layer	39
Zheltukhin N.A.	Secondary flows in boundary layers and jets	53

Poster Session

Kachanov Yu.S. Kozlov V.V. Levchenko V.Ya. Ramazanov M.P.	On nature of K-breakdown of a laminar boundary layer. New experimental data	61
Zhigulev V.N. Sidorenko N.V.	On the issue of the nonlinear theory of the instability waves	75
Reutov V.P.	The critical layer and nonlinear waves in the wall flows	81

Vancoillie G.	A turbulence model for the numerical simulation of transitional boundary layers	87
Hackeschmidt M. Rössler M. Hilbrich H.D.	Characteristic fields of the natural transitional boundary layer	93
Hackeschmidt M.	Causes of vortex bursting in transitional boundary layers	97
Tetyanko B.A.	Experimental investigation of statistical characteristics of velocity fluctuations in natural laminar-turbulent transition	101

Session 3

Chairman: O.C. Ryzhov

Gaster M.	*) A non-linear transfer function description of wave growth in a boundary layer	107
Kachanov Yu.S.	Development of spatial wave packets in boundary layer	115
Mack L.	Instability wave patterns from harmonic point and line sources in laminar boundary layers	125
Landahl M.T.	*) The growth of instability waves in a slightly nonuniform medium	133

Session 4

Chairman: M.A. Goldshtik

Narasimha R.	Subtransitions in the transition zone	141
Gasley C. Wazzan A.R.	Control of water boundary layer stability and transition by surface temperature distribution	153

Session 5

Chairman: M. Landahl

Rozhdestvensky B.L.	*) Secondary flows in the channels and pipes, their connection to and comparison with turbulent flows	163
Nishioka M. Asai M.	*) 3-D wave disturbances in plane Poiseuille flow	173
Ramazanov M.P.	Development of finite-amplitude disturbances in Poiseuille flow	183
Goldshtik M.A. Lifschitz A.M. Shtern V.N.	Threshold regimes in the plane channel flow	191

Session 6

Chairman: M. Gaster

Yanenko N.N.	Stability of finite-amplitude autooscillations in Poiseuille flow	199
Scobolev B.Yu. Zharilkasinov A.		
Stettler J.C. Hussain A.K.M.F.	On transition of the pulsatile pipe flow	*)
Wadih M.	On linear 3-D stability of pipe Poiseuille flow	207
Schultz-Grunov F.	Formation of vortical particles in inviscid flow	215

Poster Session

Simakin I.N.	Numerical simulation of 2-D and 3-D non stationary viscous fluid flows in a plane channel	221
Christov C.I. Nartov V.P.	On a bifurcation and emerging of a stochastic solution in a variational problem for Poiseuille flows	227

Kosorygin V.S. Levchenko V.Ya. Polyakov N.Ph.	On generation and evolution of waves in a laminar boundary layer ..	233
Gilev V.M.	Tollmien-Schlichting waves excitation on the vibrator and laminar-turbulent transition control	243
Fedorov A.V.	Excitation of Tollmien-Schlichting waves by acoustic disturbances in a compressible boundary layer	249
Ezerskii A.B.	Acceleration of transition to turbulence in a boundary layer due to the combination effect of sound waves ..	255
Sidorenko N.V. Erofeev E.A.	Interaction of vortex disturbances and boundary layer on blunt bodies	261
Grek H.R. Kozlov V.V. Ramazanov M.P.	Three types of disturbances from the point source in the boundary layer	267

Session 7

Chairman: W.S. Saric

Zhigulev V.N.	The problems of a theoretical description of the transition zone of a laminar boundary layer into a turbulent one	273
Leehey P. Gedney C.J. Her J.Y.	The receptivity of a laminar boundary layer to external disturbances ..	283
Tumin A.M. Fedorov A.V.	Excitation of instability waves by a vibrator localized in the boundary layer	295
Terentiev E.D.	Linear problem on vibrator on a flat plate in subsonic boundary layer ...	303

Session 8

Chairman: P. Leehey

Ruban A.I.	On Tollmien-Schlichting wave generation by sound	313
------------	--	-----

Levina G.V.	Resonance-induced self-oscillations	
Nepomnyaschy A.A.	in fluid with wavy boundary motion ..	321
Pozdeev A.A.		
Yurchenko N.F.	The control of the three-D distur-	
Babenko V.V.	bances development in the transitio-	
Kozlov L.F.	nal boundary layer	329

Session 9

Chairman: T. Herbert

Ryzhov O.S.	*) Stability and separation of viscous flows	337
Kozlov V.V.	*) Interrelation of the flow separation and stability	349
Dovgal A.V.	Development of vortical disturbances in flow with laminar separation	359

Session 10

Chairman: O.F. Vasiliev

Yanenko N.N.	The study of shear layer stability by the method of vortex particles method	367
Rudyak V.Ya.		
Veretensev A.N.		
Rabinovich M.I.	*) The effect of external fields on tran- sition to turbulence in free shear	
Sushchik M.M.	flows	375
Zhang Yu.Q.	The mixing layer forced by fundamen- tal and subharmonic	385
Ho Ch.M.		
Monkewitz P.		
Miksad R.W.	Experiments on nonlinear interactions in wake transition	397
Jones F.L.		
Powers E.J.		

Session 11

Chairman: M. Nishioka

Isataev S.I.	Experimental investigation of a lami- nar-turbulent transition in free and semi-limited jet flow	411
--------------	--	-----

Savulescu S.N.	Stochastic behaviour of velocity profiles leading to shear flow turbulence	419
Goldshtik M.A. Shtern V.N. Zhdanova E.M.	Supercritical regimes in axisymmetric submerged jets	423

Session 12

Chairman: V.Ya. Levchenko

Saric W.S. Yeats L.G.	*) Generation of crossflow vortices in a 3-D flat-plate flow	429
Srivastava K.M.	Nonlinear interaction of streamwise vortices in non-parallel boundary layers on concave surfaces	439
Aihara Y. Tomita Y. Ito A.	Generation, development and distortion of longitudinal vortices in boundary layers along concave and flat plates	447
Michel R. Arnal D. Coustols E.	Stability calculations and transition criteria on 2- or 3-D flows	455

Session 13

Chairman: D.M. Bushnell

Itoh N.	Stability calculations of the 3-D boundary layer flow on a rotating disk	463
Reed H.L.	An analysis of wave interactions in swept-wing flows	471
Gersenshtein S.Y. Zheliqovsky V.A. Nikitin N.V. Rudnitsky A.Y. Sukhorukov A.N. Filjand L.V.	On some transition processes in 3-D shear flows	479

Poster Session

Petrov G.V.	Stability of thin viscous shock layer on a wedge in hypersonic flow of a perfect gas	487
Lysenko V.I. Maslov A.A.	The effect of cooling on the supersonic boundary layer stability and transition	495
Zheltovodov A.A. Pavlov A.A. Shilein E.H. Yakovlev V.N.	Interconnectionship between the flow separation and the direct and inverse transition at supersonic speed conditions	503
Babenko V.V. Kozlov L.F. Dovgiy S.A. Yurchenko N.F. Ivanov V.P. Gnitetskiy N.A. Korobov V.I.	The influence of the outflow generated vortex structures on the boundary layer characteristics	509
Goldfeld M.A.	On the reverse transition of compressible turbulent boundary layer in a transverse flow around a convex corner configuration	515
Goldfeld M.A. Zatoloka V.V.	Supersonic boundary layer transition in the presence of shock effect	521
Novopashin S.A.	Density pulsation and laminar-turbulent transition in the mixing layer of supersonic jets	529
Glaznev V.N.	Transformation of external disturbances into eigenoscillations in supersonic unbalanced jets	535
Zanin B.Yu.	Transition at natural conditions and comparison with the results of wind tunnel studies	541
Pavlyuchenko A.M. Tyutin A.A. Maksimova E.M. Bragin O.A.	On the problem of transition of a compressible laminar boundary layer into turbulent one under natural conditions	547

Session 14

Chairman: C.W. Van Atta

Michel R. Arnal D. Coustols E. Juillen J.C.	Experimental and theoretical studies of boundary layer transition on a swept infinite wing	553
Malik M.R. Poll D.I.A.	Effect of curvature on cross-flow in- stability	563
Kobayashi R. Kohama Y.	Spiral vortices in boundary-layer transition on a rotating cone	573

Session 15

Chairman: M. Mack

Gaponov S.A.	On the development of disturbances in nonparallel supersonic flows	581
Beckwith I.E. Malić M.R. Chen F.J. Bushnell D.M.	*) Effects of nozzle design parameters on the extent of quiet test flow at Mach 3.5	589
Kosinov A.D. Maslov A.A.	Development of artificially excited disturbances in supersonic boundary layer	601

Session 16

Chairman: M.I. Rabinovich

Van Atta C.W. Mautner T.S.	The wall shear stress signature of a turbulent spot: Direct measurements and momentum integral calculations ..	607
Lindberg P.A. Fahlgren E.M. Alfredsson P.H. Johansson A.V.	An experimental study of the struc- ture and spreading of turbulent spots	617
Matsui T. Okude M.	Visualization of generation process of a turbulent spot	625

Sadovsky V.S. Taganov G.I.	Model description of two kinds of organized structures dominating in turbulent shear flows	635
-------------------------------	--	-----

Session 17

Chairman: B.L. Rozhdestvensky

Babenko K.I. Afendikov A.L.	On incompressible viscous fluid flow between rotating cylinders	645
Lukashchuk S.N. Lvov V.S. Predtechensky A.A. Chernykh A.I.	First bifurcations in circular Couette flow: laboratory and nume- rical experiments	653
Schrauf G. Krause E.	Symmetric and asymmetric Taylor vor- tices in a spherical gap	659
Belyaev Yu.N. Monakhov A.A. Scherbakov S.A. Yavorskaya I.M.	Some routes to turbulence in spheri- cal Couette flow	669
Bühler K. Zierep J.	New secondary instabilities for high Re-number flow between two rotating spheres	677

Poster Session

Cayzac R. Fauchas J. Clarion C.	Stability of unsteady parallel flows by the method of energy	687
Zwick W.	On a multigrid method for the nume- rical solution of Navier-Stokes equations	693
Masuda S. Okamae K. Ariqa I.	Transition of boundary layer on ro- tating flat plate	699
Repic Ye.U. Sosedko Yu.P.	Quantitative analysis of intermit- tency phenomenon in the wall region of a turbulent boundary layer	705
Nehring U.	Model equations simulating unsteady viscous flows	711

Vladimirov V.A. Tarasov V.F.	Resonance instability of the flows with closed streamlines	717
Zhuk V.I.	On long-wave asymptotic solutions of the Orr-Sommerfeld equation for boundary layer	723
Burnat M.	On some models of turbulent flow ...	729

Session 18

Chairman: J. Zierep

Moiseev S.S. Punqin V.G. Suyasov N.V.	Finite-amplitude disturbances and near-threshold instability of hydro- dynamic flows	735
Polezhaev V.I. Bune A.V. Griaznov V.L.	Structure, characteristics of tran- sition and of turbulence in the thermal convection given by the di- rect numerical modelling	741
Gershuni G.Z. Zhukhovitsky E.M. Nepomnyashchy A.A. Simanovsky I.B.	Development of disturbances and transition to turbulence at the con- vection in 2-layer systems	749
Shkadov V.Ya. Demekhin V.A.	On some transition processes in spa- tial flows with a transversal veloc- ity gradient	755
