

Contents

1 The Mechanism of Continence (Paul Hilton)	1
Introduction	1
Embryology of the Lower Urinary Tract	2
Development of the Embryonic Plate	2
Formation of the Cloaca	2
Partitioning of the Cloaca	2
Development of Nephrogenic Mesoderm	2
Formation of the Bladder, Urethra and Trigone	2
Epithelium of the Bladder Base and Urethra	3
Anatomy of the Lower Urinary Tract	3
The Bladder	3
The Urethra	4
Pubourethral Ligaments	5
Neurological Control of Micturition	6
Innervation of the Detrusor	7
Innervation of Urethral Smooth Muscle	7
Innervation of Striated Muscle	7
Central Nervous Connections of the Lower Urinary Tract	8
Physiology of the Lower Urinary Tract	8
The Behaviour of the Bladder	8
The Urethra	8
The Normal Micturition Cycle	10
Pathophysiology of Urinary Incontinence	13
General Considerations	13
Genuine Stress Incontinence	13
The Effects of Incontinence Surgery on Urethral Function	17
Conclusions	19
 2 Investigation of Incontinence (Stuart L. Stanton)	 23
Introduction	23
Classification of Incontinence	24
Adverse Factors	24
Indications for Urodynamic Studies	25

Clinical Assessment	25
History	25
Examination	32
Investigations	34
Urethrocystoscopy	34
Uroflowmetry	34
Urethral Function Tests	36
Cystometry	38
Radiology	40
Electromyography	48
Ultrasound	52
Perineal Pad Test	53
The Future	54
 3 Congenital Causes of Incontinence (Anthony M. K. Rickwood)	57
Introduction	57
Assessment of the Wet Girl	58
General	58
History Taking	58
Physical Examination	58
Investigations	59
Ureteric Ectopia	59
Embryology	59
Duplex System Ureteric Ectopia	59
Single System Ureteric Ectopia	62
Urogenital Sinus Abnormalities	62
Vaginal Atresia and Wide Urethra	63
Vaginal Confluence with Wide Bladder Neck	63
Cloaca	64
Exstrophic Anomalies	64
Embryology	65
Bladder Exstrophy	65
Epispadias	68
Cloacal Exstrophy	68
Congenital Neuropathic Bladder	69
Presentations	70
Classification and Pathophysiology	70
Investigation	74
Management	74
 4 Anterior Repair (David Warrell)	77
Introduction	77
Pre-operative Evaluation	78
Patient Selection	79
Contraindications	79
Pre-operative Preparation	79
Operative Technique	80
Post-operative Management	83
Care	83

Complications	84
Follow-up Assessment	84
Results	84
Mechanism of Failure	85
 5 The Marshall-Marchetti-Krantz Procedure (<i>Kermit E. Krantz</i>)	 87
Introduction	87
Indications and Contraindications	87
Pre-operative Evaluation	88
Operative Technique	88
Post-operative Management	92
Complications	92
Follow-up Assessment	93
Results	93
Summary	93
 6 Colposuspension (<i>Stuart L. Stanton</i>)	 95
Introduction	95
Terminology	95
Indications and Contraindications	96
Pre-operative Evaluation	96
Pre-operative Preparation	97
Operative Technique	97
Post-operative Management	101
Complications	101
Follow-up Assessment	102
Results	102
Causes of Failure	103
 7 Sling Procedures (<i>Rudolf Hohenfellner and Eckhard Petri</i>)	 105
Introduction	105
Indications	106
Classification	106
Pre-operative Evaluation	106
Operative Technique	106
Inguinovaginal Fascial Sling	106
Dural and Alloplastic Sling	108
Post-operative Management	109
Complications	110
Follow-up Assessment	110
Results	110
Summary	112
 8 Endoscopic Suspension of the Vesical Neck (<i>Thomas A. Stamey</i>)	 115
Introduction	115
Indications and Contraindications	115

Pre-operative Evaluation	116
Operative Technique	120
Abdominal Incision	120
Vaginal Incision	120
Stamey Needles	120
Use of Endoscopy	122
The New Pereyra-Lebherz Suspension	126
Post-operative Management	126
Care	126
Complications	127
Follow-up Assessment	128
Results	129
Summary	131
 9 Abdominoperineal Urethral Suspension: The Zacharin Procedure (<i>Robert F. Zacharin</i>)	133
Introduction	133
Indications and Contraindications	135
Pre-operative Investigations and Preparation	135
Operative Technique	138
Post-operative Management	139
Complications	140
Follow-up Assessment	140
Results	141
Mechanism of Failure	142
Conclusions	142
 10 Neourethra: Rationale, Surgical Technique and Indications (<i>Emil A. Tanagho</i>)	145
Introduction	145
Anatomical Considerations and Rationale for Operation	145
Indications	146
Pre-operative Evaluation	147
Operative Technique	147
Tanagho Technique (Anterior Bladder Flap)	147
Leadbetter Technique (Trigonal Tube)	147
Post-operative Management	149
Complications	149
Case Examples	149
Results	151
Mechanism of Failure	152
Summary	152
 11 Artificial Sphincter (<i>William L. Furlow</i>)	155
Introduction	155
Developmental History	156
The First Model, AS 721	157
Sphincter with Pressure-Regulation Balloon, AS 761	157

Automatic Reflation Sphincter AS 742	159
Automatic Reflation Sphincter AS 791/792	160
Model AS 800; Controlled Activation and Deactivation	161
Indications	161
Pre-operative Evaluation	162
Selection of Model	163
Operative Technique	163
Aseptic Technique	163
Patient Position	164
Instrumentation	164
Surgical Procedure	164
Selection of Cuff Size	166
Cuff Implantation	167
Selection of Balloon Pressure Reservoir	168
Post-operative Management	170
Results and Discussion	170
Summary	172
 12 Urinary Diversion (<i>Peter R. Riddle</i>)	175
Introduction	175
Classification of Patients	175
Choice of Diversion	176
Ileal Loop	176
Pre-operative Management	176
Technique	176
Post-operative	181
Ureterocolic Anastomosis	181
Pre-operative Management	181
Technique	182
Post-operative	182
Continent Ileal Pouch	184
 13 Urethrotomy (<i>Peter H. L. Worth</i>)	185
Introduction	185
Methods of Investigation	185
Techniques	186
Urethral Dilatation	186
Internal Urethrotomy	187
Bladder Neck Procedures	188
Alternative Techniques	189
Bladder Drainage	190
Conclusions	191
 14 The Management of Vesicovaginal and Urethral Fistulae (<i>John B. Lawson and Christopher N. Hudson</i>)	193
Aetiological Groups	193
Obstetric	193

Surgical Trauma	193
Pelvic Malignancy	194
Clinical Presentation	194
Pre-operative Care	195
Early Management	195
Associated Conditions	195
Concurrent Rectovaginal Fistulae	196
Local Assessment	196
Surgical Repair	198
General	198
Vaginal Route	199
Abdominal Route	204
Post-operative Management	206
Complications	207
Results	208
Management of Failure	208

15 Ureterovaginal Fistulae (W. Keith Yeates) 211

Introduction	212
Operative Injuries	212
Obstetric Laceration	212
Invasion by Growth	212
Time of Occurrence	212
Early	212
Intermediate	213
Late	213
Recognition of Fistula	213
Confirmation of Urinary Leakage	213
Confirmation of Ureteric Fistula	213
Spontaneous Closure of Fistulae	214
Timing of Operative Intervention	215
Pre-operative Investigation and Preparation	215
Identification of the Side of the Fistula	215
Recognition of Level	217
Operative Procedures	217
Objectives	217
Exploratory Laparotomy	218
Selection of Procedure	219
Direct Reimplantation	220
Indirect Reimplantation	222
Bilateral Ureteric Injuries	225
Primary Nephrectomy	225
Urinary Diversion	225
Post-operative Complications	226
Leakage	226
Stenosis	226
Urinary Infection	226
Reflux	227
Late Recurrence of Ureterovaginal Fistula	227
Summary	227

16 Pharmacology of the Bladder and Urethra (<i>Alan J. Wein</i>)	229
Introduction	229
Pharmacology of the Lower Urinary Tract	229
Principles of Pharmacological Therapy	232
Specific Methods of Pharmacological Therapy	233
Therapy to Facilitate Bladder Emptying	233
Therapy to Facilitate Urine Storage	238
Effect of Tricyclic Antidepressants	244
Effects of Other Pharmacological Agents	245
 17 Electrostimulation (<i>Emil A. Tanagho</i>)	 251
Introduction	251
Sacral Root Stimulation	252
Background	252
Animal Studies	252
Human Studies	253
Electrode Implantation	253
Pre-operative Evaluation	255
Method	255
Accomplishments from Human Implantations	255
Other Applications of Percutaneous Sacral Root Implantation	256
Summary	257
 18 Post-operative Voiding Dysfunction (<i>Richard A. Schmidt</i>)	 259
Pathophysiology	259
Problems of Inhibition—the Large Bladder	260
Problems of Facilitation—the Unstable Bladder	262
Surgical Causes	263
Prevention	263
Treatment	265
Long-term Management	265
 19 Post-operative Catheter Drainage (<i>Richard A. Schmidt</i>)	 267
Introduction	267
Indications	267
Suprapubic Versus Urethral Drainage	269
Technique	269
Urethral	269
Suprapubic	270
Conclusion	273
 20 Choice of Surgery (<i>Stuart L. Stanton and Emil A. Tanagho</i>)	 275
PART I (<i>Stuart L. Stanton</i>)	275
Introduction	275
Coexistent Gynaecological Conditions	275

Urodynamic Contraindications	276
Urodynamic Factors	276
Bladder Neck Elevation	276
Urethral Alignment	276
Urethral Resistance	277
Choice of Surgery	278
PART II (<i>Emil A. Tanagho</i>)	279
Introduction	279
Differential Diagnosis	279
Treatment	280
Problems in Management	281
Subject Index	283
